Tank 241-U-203: Tank Characterization Plan, 20:15125 (R;US)
Tank Farm Instrumentation and Data Acquisition/Management Upgrade Plan. Revision 5, 20:15127 (R;US)
Tank Waste Project Quality Assurance Program Plan. Revision 1, 20:15113 (R;US)
Tank waste remediation system high-level waste feed processability assessment report, 20:15128 (R;US)
Tank Waste Remediation System Tank Waste Analysis Plan. FY 1995, 20:15110 (R;US)
Technical task plan for Acquire Commercial Technology for Retrieval, 20:15084 (R;US)
Test plan for K Basin Sludge Canister and Floor Sampling Device, 20:15071 (R;US)
Test plan for non-radioactive testing of vertical calciner for development of direct denitration conversion of Pu-bearing liquors to stable, storage solids, 20:15056 (R;US)
Test specification for decant pump and winch assembly. Revision 2, 20:15060 (R;US)
Testing of a benchscale Reverse Osmosis/Coupled Transport system for treating contaminated groundwater, 20:16567 (R;US)
TWRS tank waste pretreatment process development hot test siting report, 20:15118 (R;US)
Vault 102 cemented waste solidification testing system. Final report, 20:15115 (R;US)
Vegetation management 1994 fiscal year end report, 20:15197 (R;US)
Video Graphic Recorder (VGR) calibration, 20:15090 (R;US)
W-320 pit liner vs. coating cost risk benefit analysis, 20:15081 (R;US)
Walkdown procedure: Seismic adequacy review of safety class 3 & 4 commodities in 2736-Z & ZB buildings at PFP facility, 20:15187 (R;US)
Waste handling Quality Assurance Program Plan for Engineered Process Applications. Revision 2, 20:15059 (R;US)
Westinghouse Hanford Company Data Management Plan Template. Revision 1, 20:17321 (R;US)
WRAP Module 1 sampling and analysis plan, 20:15073 (R;US)

Westinghouse Savannah River Co., Aiken, SC (United States)

Analytical considerations in the code qualification of piping systems, 20:15477 (R;US)
Analytical modeling of the effect of crack depth, specimen size, and biaxial stress on the fracture toughness of reactor vessel steels, 20:15901 (R;US)
Detection of chlorinated aromatic compounds, 20:16173 (PA;US)
Exposure rate response analysis of criticality accident dectector at Savannah River Site, 20:16286 (R;US)
Resistance Weld Qualifcation Analysis for Radioactive Waste Canisters, 20:15129 (R;US)
Startup and Operation of a Metal Hydride Based Isotope Separation Process, 20:15220 (R;US)

Wall thinning acceptance criteria for degraded carbon steel piping systems using FAD methodology, 20:14915 (R;US)
Waste Minimization Measurement and Progress Reporting, 20:15045 (R;US)

Wisconsin Univ., Madison, WI (United States)
International lighting in controlled environments workshop: Proceedings, 20:15742 (R;US)

Wisconsin Univ., Madison, WI (United States). Dept. of Mechanical Engineering
100 Hour test of the pressurized woodchip-fired gravel bed combustor, 20:15252 (R;US)
Development of a gravel bed combustor for a solid fueled gas turbine for the period February 1, 1989 to June 30, 1991, 20:15251 (R;US)

Wisconsin Univ., Madison, WI (United States). Dept. of Physics
Physics goals of a $\mu^+ \mu^-$ collider, 20:16779 (R;US)

Worcester Polytechnic Inst., MA (United States)
Methane coupling by membrane reactor. Quarterly technical progress report, June 25, 1994–September 24, 1994, 20:15275 (R;US)

Personal Author Index

Authors' surnames are indexed in the form appearing in the publication cited; given names generally have been reduced to initials. For documents with multiple authors, each author name is indexed. The entry for a primary author (first author listed on an abstracted document) includes the full document title and citation number. Entries for other authors provide a cross-reference to the primary author. Also included is information on the document type, country of publication, and the document language listed in parentheses in the format (J;FR;In French and English). Accent marks are not input because of computer alphabetization. Spelling and transliteration follow standard conventions.

Subject Index

This index is arranged by subject descriptors selected from those assigned to each citation in this publication. Subject descriptors are selected from a controlled thesaurus of terms, ETDE/PUB–2(Rev.1), *International Energy: Subject Thesaurus*. In order to enhance indexing, subject descriptor entries generally consist of a pair of descriptors: a main term and a qualifier term. Each entry includes the full title (which may be followed by supplementary descriptive information in parentheses) and the citation number. Additional information given in parentheses indicates the document type (an abbreviation such as B for book), the country of publication (such as DE for Federal Republic of Germany), and the language if non-English.

See references guide users from synonymous terms to the descriptors selected for the concept. *See also* references indicate subject concepts that are more specific than a particular descriptor. To gain complete subject coverage, all such terms should be reviewed.

A

A-BOMB SURVIVORS
Activities of the National Academy of Sciences in relation to the Radiation Effects Research Foundation. Progress report, June 1, 1993–September 30, 1994, 20:16665 (R;US)
Report of a workshop on the application of molecular genetics to the study of mutation in the children of atomic-bomb survivors, 20:16698 (R;JP)

Preliminary design for Arctic atmospheric radiative transfer experiments, 20:16508 (R;US)

ARGON
Modelling of nitric acid production in the Advanced Cold Process Canister due to irradiation of moist air, 20:16206 (R;SE)
Production cross sections of recoiled Ar ions in charge changing collisions of carbon ions on Ar atoms,, 20:16945 (IA;JP;In Japanese)

ARGON IONS
Irradiation effects of Ar cluster ion beams on Si substrates, 20:16079 (IA;JP;In Japanese)

ARGONNE NATIONAL LABORATORY
See ANL

ARGONOX PROCESS
See COMBINED SOXNOX PROCESSES

ARGUS EVENT
See NUCLEAR EXPLOSIONS

ARMS
Task oriented evaluation system for maintenance robots, 20:15466 (IA;JP)

ARMS CONTROL
APSTNG: Associated particle sealed-tube neutron generator studies for arms control. Final report on NN-20 Project ST220, 20:15814 (R;US)
The Cooperative On-site Sampling and Analysis Experiment (COSAX), 20:16479 (R;US)

ARSENIC
Interactions between trace metals, sodium and sorbents in combustion. Quarterly report No. 1, October 1, 1994–December 31, 1994, 20:14789 (R;US)
Speciation of arsenic in water samples, 20:16170 (RA;XA)
Trace element emissions. Semi-annual report, October 1994–February 1995, 20:14723 (R;US)

ARTHUR D LITTLE COAL LIQUEFACTION PROCESS
See COAL LIQUEFACTION

ARTIFICIAL INTELLIGENCE
Off-training-set error for the Gibbs and the Bayes optimal generalizers, 20:17376 (R;US)

ASH CONTENT
Development of a video-based slurry sensor for on-line ash analysis. First quarterly technical progress report, October 1, 1994–December 31, 1994, 20:14749 (R;US)

ASHES
See also FLY ASH
Disposal of fluidized bed combustion ash in an underground mine to control acid mine drainage and subsidence. Progress report, September 1, 1994–November 30, 1994, 20:14752 (R;US)
Suppression of fine ash formation in pulverized coal flames. Quarterly technical progress report No. 9, October 1, 1994–December 31, 1994, 20:14762 (R;US)

ASPHALTS
Hanford Permanent Isolation Barrier Program: Asphalt technology development, 20:16296 (R;US)

ASSE SALT MINE
The HAW project. Test storage of high-level radiation sources in the Asse salt mine. Documentation and assessment of the storage system, 20:14989 (R;DE;In German)

ASSESSMENTS
See CHARGES

ASTATINE 211
Establishment of an European Astatine Collaboration, 20:16237 (RA;US)
Utilization of the CS-30 cyclotron at the Duke University Medical Center, 20:16234 (RA;US)

ASTRA REACTOR
Spent fuel storage at the ASTRA reactor, Seibersdorf, 20:14922 (RA;XA)

ATGAS PROCESS
See COAL GASIFICATION

ATMOSPHERIC CIRCULATION
Large-eddy simulation of the development of stably-stratified atmospheric boundary layers over cool flat surfaces, 20:16516 (R;US)
Proceedings of the Fourth Atmospheric Radiation Measurement (ARM) Science Team Meeting, 20:16482 (R;US)

ATMOSPHERIC PRECIPITATIONS
Chemical and isotopic variations of precipitation in the Los Alamos Region, New Mexico, 20:16500 (R;US)
Drought tolerance and osmotic adjustment of four deciduous tree species under altered precipitation: Preliminary results, 20:16703 (R;US)

ATOM COLLISIONS
See also ION-ATOM COLLISIONS
PHOTON-ATOM COLLISIONS
International bulletin on atomic and molecular data for fusion. No. 48, 20:16942 (I;XA)
Quantum versus semiclassical treatment of multiphonon effects in He atom scattering from surfaces, 20:16943 (R;XA)

ATOMIC BOMBS

ATRIA
Draught risk from cold vertical surfaces, 20:15732 (R;DK)
Model experiments for the determination of airflow in large spaces, 20:15733 (R;DK)
The effect of obstacles on the boundary layer flow at a vertical surface, 20:15735 (R;DK)

AUSTENITIC STEELS
Fracture toughness of irradiated candidate materials for ITER first wall/blanket structures, 20:17213 (RA;US)
Joining dissimilar stainless steels for pressure vessel components, 20:15900 (R;FI)
Status of U.S./Japan Collaborative Program Phase II HFIR target and RB* capsules, 20:17198 (RA;US)
The applications miniature tensile specimens to determine mechanical properties of irradiated austenitic stainless steel, 20:15839 (R;PL;In Polish)
The evolution of microstructure of austenitic stainless steels OH18N10T and OOH17N14M2 irradiated with high energy ions, 20:15841 (R;PL;In Polish)

AUSTRIA
Status of instrumentation and control activities in Austria, 1990-1991. Summary, 20:15510 (RA;XA)
AUSTRIAN RESEARCH REACTOR
See ASTRA REACTOR
AUTOMATION
Validation of programmable industrial automation systems for safety critical applications in NPP's; dynamic testing, 20:15563 (RA;XA)
AUTOMOBILE EFFICIENCY STANDARDS
See AUTOMOBILES
AUTOMOBILE EXHAUST REACTORS
See AFTERBURNERS
AUTOMOBILE INDUSTRY
See AUTOMOTIVE INDUSTRY
AUTOMOBILES
Analysis of energy consumption in car transportation. Actual status of district transportation (truck) in the metropolitan area, and influence of the NOx law, 20:15770 (R;JP;In Japanese)
Analysis of the potential for new automotive uses of magnesium, 20:15809 (R;US)
Field assessment of an aluminum intensive passenger car, 20:15808 (R;US)
AUTOMOTIVE FUELS
BioFacts: Fueling a stronger economy. Methanol from biomass. Revision 2, 20:15239 (R;US)
AUTOMOTIVE INDUSTRY
Design considerations for NDE systems in a factory setting and the application to transmission manufacture at the Chrysler Transmission Plant in Kokomo, Indiana, 20:16298 (R;US)
AUXILIARY SYSTEMS
METC Combustion Research Facility, 20:16299 (R;US)
AVG PROCESS
See COAL GASIFICATION
AXIAL-VECTOR CURRENTS
Axial Anomaly at the Arbitrary External Momenta, 20:16819 (R;XJ;In Russian)
AXIONS
Status of the large-scale dark-matter axion search, 20:16778 (R;US)

B

BACKGROUND RADIATION
Estimation of collective effective dose equivalent from environmental radiation and radioactive materials in Japan. A preliminary study, 20:16691 (RA;JP;In Japanese)
BACON

BARIUM COMPOUNDS
See also BARIUM OXIDES
Anisotropy of crystal lattice expansion crystalline electric fields and charge redistribution in high-Tc superconductors, 20:17111 (IA;RU)
Anisotropy of electronic light scattering in $YBa_2Cu_3O_{6+x}$ crystals, 20:17114 (IA;RU)
Anomalous Hall effect and current-voltage characteristics in $REBa_2Cu_3O_{7-\delta}$ epitaxial films, 20:17116 (IA;RU)
Damages in Y-Ba-Cu-O films produced by ^4He ions, 20:16040 (IA;RU)
Investigation of AC Josephson effect in YBaCuO, 20:17098 (IA;RU)
Mechanism(s) for the suppression of the switchable polarization in PZT and $BaTiO_3$, 20:16048 (R;US)
Microstructure investigations of melt-textured $YBa_2Cu_3O_x$, 20:16042 (IA;RU)
Neutron depolarization in the rotating $YBa_2Cu_3O_{6.9}$, 20:17065 (IA;RU;In Russian)
New correlations between critical temperature, structural and optical characteristics of high-temperature superconducting materials, 20:17115 (IA;RU)
Phase states and transitions in flux lattice in superconducting films, 20:17099 (IA;RU)
Solution based temperature of Perovskite-type oxide films and powders, 20:16043 (R;US)
Studies of magnetization processes in high-T_c superconductors using magnetooptic techniques, 20:17112 (IA;RU)
Temperature dependence of the electromagnetic penetration depth and fluctuation paraconductivity in the $(Y,Sm)_1Ba_2Cu_3O_{7-x}$ epitaxial films, 20:17097 (IA;RU)
BARIUM ISOTOPES
Phase transformations in barium, cerium and neodymium isotopes, 20:16858 (R;RU;In Russian)
BARIUM OXIDES
Hall effect in the $Gd_{1-x}Pr_xBa_2Cu_3O_{7-y}$ system. Comparison with $Y_{1-x}Pr_xBa_2Cu_3O_{7-y}$, 20:15983 (IA;RU;In Russian)
Phase stability of Tl, Pb-1223, 20:15907 (RA;US)
Thick-film and power-in-tube processing for superconducting thallium oxide tape via an electrodeposition process, 20:15906 (RA;US)
BATTERIES (ELECTRIC)
See ELECTRIC BATTERIES
BAUXITE
Interactions between trace metals, sodium and sorbents in combustion. Quarterly report No. 1, October 1, 1994–December 31, 1994, 20:14789 (R;US)
BCR PROCESS
See COAL GASIFICATION
BEAM DYNAMICS
ACS OPUS use for nonlinear particle dynamic analysis, 20:17364 (RA;RU)
Calculation of beam dynamics in magnetic field with phase symmetry using the method of immersion in the moment phase space, 20:16357 (RA;RU)
BEAM EXTRACTION
The problems of high efficient extraction from the isochronous cyclotron, 20:16380 (R;PL)
BEAM OPTICS
Notes on lie algebraic analysis of achromats, 20:16364 (R;US)
The linear parameters and the decoupling matrix for linearly coupled motion in 6 dimensional phase space. Informal report, 20:16355 (R;US)
BEAM STRIPPERS
Development of stripper films made of high strength, long life carbon nitride, 20:16379 (IA;JP;In Japanese)
BEAM TRANSPORT
Complex REDUCE-programs for analytical solving some problems of beam transport system, 20:17361 (RA;RU)
BECQUERELITE
Kinetic and thermodynamic studies of uranium minerals. Assessment of the long-term evolution of spent nuclear fuel, 20:15039 (R;SE)
BEEF
See MEAT
BELGIAN REACTOR 3
See BR-3 REACTOR
BELGIUM
Highlights on nuclear power plant instrumentation and control activities in Belgium, 20:15511 (RA;XA)
Storage experience with fuel from research reactors in Belgium, 20:14923 (RA;XA)

BENCHMARKS
FENDL activation benchmark: Specifications for the calculational activation benchmark, 20:17245 (R;XA)
FENDL neutronics benchmark: Specifications for the calculational neutronics and shielding benchmark, 20:17244 (R;XA)
BENHAM EVENT
See NUCLEAR EXPLOSIONS
UNDERGROUND EXPLOSIONS
BENIOFF ZONE
See EARTHQUAKES
BENTONITE
Heat conductivity of buffer materials, 20:15043 (R;SE)
Literature study on the microstructure of bentonite and its effect on diffusion, 20:15134 (R;FI)
BENZENE
Photocatalytic oxidation of gas-phase BTEX-contaminated waste streams, 20:16193 (R;US)
BERYLLIUM
Localization effects and superconductivity in two-dimensional beryllium films, 20:15863 (IA;RU;In Russian)
Production of multiply charged Be ions by bombarding heavy projectiles, 20:17001 (IA;JP;In Japanese)
RCRA designation of discarded americium/beryllium sealed sources, 20:14969 (R;US)
BERYLLIUM IONS
Production of low energy beryllium ions utilizing a heavy ion sputtering ion source and its application to electron transfer collisions, 20:17010 (IA;JP;In Japanese)
BERYLLIUM MODERATORS
See BERYLLIUM
BESSEL DIFFERENTIAL EQUATION

Aging and service wear of spring-loaded pressure relief valves used in safety-related systems at nuclear power plants, 20:15604 (R;US)
Application of NUREG/CR-5999 interim fatigue curves to selected nuclear power plant components, 20:15405 (R;US)
Environmentally assisted cracking in light water reactors. Semiannual report, October 1993–March 1994. Volume 18, 20:15384 (R;US)
HEXTRAN - a 3-D reactor dynamics code for VVER accident analysis, 20:15399 (RA;FI)
New generation main control room of enhanced safety NPP with MKER reactor, 20:15499 (RA;XA)
Nonlinear stability models and analyses of the nuclear-coupled thermal-hydraulic behavior of boiling water reactors. Interim report, October 1, 1992–May 30, 1993, 20:15382 (R;US)
Overview of severe accident research at the Nuclear Protection and Safety Institute of CEA, 20:15396 (RA;FI)
Piping benchmark problems for advanced reactor standardized designs, 20:15454 (R;US)
Research of severe accidents in Finland, 20:15383 (RA;FI)
Technical support for a proposed decay heat guide using SAS2H/ORIGEN-S data, 20:14935 (R;US)
Technology and costs for decommissioning of Swedish nuclear power plants, 20:15386 (R;SE)

BY-PRODUCTS
High-volume, high-value usage of Flue Gas Desulfurization (FGD) by-products in underground mines Phase 1: Laboratory investigations. Quarterly report, July 1994–September 1994, 20:14744 (R;US)

C

C CODES
CORDIS - a Program of True Distributions Unfolding from Experimental Data Distorted by Detectors with Finite Resolution, 20:17369 (R;XJ;In Russian)
Electronic Guide for Nuclear Cross-Sections (Version 1994), 20:17355 (R;XJ)

CABRI REACTOR
High burn-up fuel and reactivity accident, 20:15395 (RA;FI)
CABRIOLET EVENT
See NUCLEAR EXPLOSIONS
CADARACHE SWIMMING POOL REACTOR
See CABRI REACTOR
CADMIUM
Detection of contaminants along boreholes with prompt gamma spectroscopy, 20:16426 (R;US)
Interactions between trace metals, sodium and sorbents in combustion. Quarterly report No. 1, October 1, 1994–December 31, 1994, 20:14789 (R;US)
Trace element emissions. Semi-annual report, October 1994–February 1995, 20:14723 (R;US)
CADMIUM 111
Recovery of enriched stable isotopes in radionuclide production, 20:16127 (RA;US)
CADMIUM 112
Recovery of enriched stable isotopes in radionuclide production, 20:16127 (RA;US)
CADMIUM ALLOYS
Effect of exchange interaction on the energy spectrum of localized states in p-$Hg_{1-x-y}Cd_xMn_yTe$ alloys in magnetic field, 20:16103 (IA;RU;In Russian)
Inter-ion Auger-transitions and current carriers duration in narrow-zone p-type semiconductors with strong hole degeneration, 20:16104 (IA;RU;In Russian)
Shybniko-de Haas effect in inversion layers on the grain boundary of $Hg_{1-x}Cd_xTe$ bicrystals under uniaxial compression, 20:16960 (IA;RU;In Russian)
CADMIUM TELLURIDE DETECTORS

^3He RFQ for PET isotope production: A UW/SAIC progress report, 20:16338 (RA;US)
RF linacs for radioisotope production, 20:16337 (RA;US)
CARBON 12 TARGET
Probing the ground state and transition densities of halo nuclei, 20:16880 (R;DE)
CARBON DIOXIDE
A calcium oxide sorbent process for bulk separation of carbon dioxide. Final report, 20:14720 (R;US)
An efficient system for the preparation of [^{11}C]-HCN, CO_2 and CO, 20:16226 (RA;US)

BioFacts: Fueling a stronger economy, Global warming and biofuels emissions, 20:16506 (R;US)
Carbon dioxide concentrations in surface water and the atmosphere during 1986–1989 NOAA/PMEL cruises in the Pacific and Indian Oceans, 20:16588 (R;US)
Coal use in the People's Republic of China, Volume 2: The economic effects of constraining coal utilization, 20:14770 (R;US)
Decontamination of surfaces by blasting with crystals of H_2O and CO_2, 20:15179 (R;US)
Environmental impacts of ocean disposal of CO_2. 2nd quarterly report, October 1, 1994–December 31, 1994, 20:15651 (R;US)
Evaluation and analysis survey on new energy introduction. 3, 20:15285 (R;JP;In Japanese)
Irradiation-effects of CO_2 cluster ion beams on solid surface, 20:17017 (IA;JP;In Japanese)
Radiation effects in condensed films of cryocrystals, 20:16096 (IA;RU;In Russian)

CARBON DIOXIDE ACCEPTOR PROCESS
See COAL GASIFICATION

CARBON FIBERS
Influence of electron radiation on fracture behavior of CFRP, 20:16082 (IA;JP;In Japanese)

CARBON IONS
Cross sections of electron capture process of low energy ions,, 20:16944 (IA;JP;In Japanese)
Production cross sections of recoiled Ar ions in charge changing collisions of carbon ions on Ar atoms,, 20:16945 (IA;JP;In Japanese)

CARBON MONOXIDE
An efficient system for the preparation of [^{11}C]-HCN, CO_2 and CO, 20:16226 (RA;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, January 1993–March 1993, 20:14779 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, July 1994–September 1994, 20:14784 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, April 1994–June 1994, 20:14783 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, October 1994–December 1994, 20:14785 (R;US)
Expedited demonstration of molten salt mixed waste treatment technology. Final report, 20:15047 (R;US)
Selective catalytic reduction of sulfur dioxide to elemental sulfur. Quarterly technical progress report No. 7, January–March 1994, 20:14760 (R;US)
The economical production of alcohol fuels from coal-derived synthesis gas. Quarterly technical progress report number 13, October 1–December 31, 1994, 20:15272 (R;US)
The economical production of alcohol fuels from coal-derived synthesis gas. Quarterly technical progress report number 12, July 1–September 30, 1994, 20:15271 (R;US)

CARBON STEELS
See also STEEL-ASTM-A533-B
Assessment of short through-wall circumferential cracks in pipes. Experiments and analysis: March 1990–December 1994, 20:15606 (R;US)
Assessment study of the stresses induced by corrosion in the Advanced Cold Process Canister, 20:15895 (R;SE)
Influence of static magnetic field on fatigue life, 20:17280 (RA;JP)
Research on corrosion aspects of the advanced cold process canister, 20:15894 (R;SE)

CARBON TETRACHLORIDE
Geology, hydrology, chemistry, and microbiology of the in situ bioremediation demonstration site, 20:15180 (R;US)

CARBONATE ROCKS
See also LIMESTONE
Geophysical exploration in the Lautertal at the Combat Maneuver Training Center, Hohenfels, Germany, 20:16518 (R;US)

CARGO
Standards and conventions for the Worldwide Port System (WPS) regional Integrated Cargo Database (ICDB), 20:15773 (R;US)

CARPETBAG EVENT

UNDERGROUND EXPLOSIONS

CASKS
See also SPENT FUEL CASKS
CNS 1-13G Cask lid support frame structural analysis, 20:15594 (R;US)

CASTING MOLDS
Urethane foam process improvements. Final report, 20:15784 (R;US)

CASTOR TOKAMAK
Study of boundary plasma in CASTOR tokamak, 20:17176 (IA;CZ;In Czech)

CATALYST SUPPORTS
Development of a catalyst for conversion of syngas-derived materials to isobutylene. Quarterly report No. 14, July 1, 1994–September 30, 1994, 20:15270 (R;US)

CATALYSTS
Chemical Activation
Technology development for iron Fischer-Tropsch catalysis. Quarterly technical progress report, October–December, 1994, 20:14740 (R;US)

Chemical Preparation
Development of vanadium-phosphate catalysts for methanol production by selective oxidation of methane. Quarterly technical progress report No. 6, July–Septembedr 1994, 20:15273 (R;US)
Direct catalytic decomposition of nitric oxide. Quarterly technical progress report No. 13, October–December 1994, 20:14758 (R;US)
Technology development for cobalt F-T catalysts. Topical report No.1, Effects of supports and promoters on cobalt F-T catalyst behavior in fixed bed vs. slurry bubble column reactors, 20:14714 (R;US)
Technology development for cobalt F-T catalysts. Topical report No.2, Comparison of patented F-T cobalt catalysts, 20:14715 (R;US)
Technology development for cobalt F-T catalysts. Topical report No.3, Zirconia promotion of Fischer-Tropsch cobalt catalysts: Behavior in fixed-bed and slurry bubble column reactors, 20:14716 (R;US)
The economical production of alcohol fuels from coal-derived synthesis gas. Quarterly technical progress report number 12, July 1–September 30, 1994, 20:15271 (R;US)

Deactivation
Catalytic fabric filtration for simultaneous NO_x and particulate control. Final report, 20:15374 (R;US)

Materials Recovery
Microbial recovery of metals from spent coal liquefaction catalysts. Quarterly report, April–June, 1992, 20:14754 (R;US)
Microbial recovery of metals from spent coal liquefaction catalysts. Quarterly report, January–March, 1992, 20:14753 (R;US)

Microbial Leaching
Microbial recovery of metals from spent coal liquefaction catalysts. Quarterly report, January–March, 1992, 20:14753 (R;US)
Microbial recovery of metals from spent coal liquefaction catalysts. Quarterly report, April–June, 1992, 20:14754 (R;US)

Performance Testing
Alternative catalyst and exhaust gas sensor work at Argonne National Laboratory, 20:15810 (R;US)
Catalytic multi-stage liquefaction of coal. Final eighth quarterly report, 1 July 1994–30 September 1994, 20:14737 (R;US)
Development of a catalyst for conversion of syngas-derived materials to isobutylene. Quarterly report No. 14, July 1, 1994–September 30, 1994, 20:15270 (R;US)
Development of a catalyst for conversion of syngas-derived materials to isobutylene. Quarterly technical report No. 12, January 1, 1994–March 31, 1994, 20:15268 (R;US)
Development of a catalyst for conversion of syngas-derived materials to isobutylene. Quarterly technical report No. 13, April 1, 1994–June 30, 1994, 20:15269 (R;US)
Low-temperature catalytic gasification of wet industrial wastes. FY 1993–1994 interim report, 20:15247 (R;US)

Technology development for cobalt F-T catalysts. Topical report No.1, Effects of supports and promoters on cobalt F-T catalyst behavior in fixed bed vs. slurry bubble column reactors, 20:14714 (R;US)
Technology development for cobalt F-T catalysts. Topical report No.2, Comparison of patented F-T cobalt catalysts, 20:14715 (R;US)
Technology development for cobalt F-T catalysts. Topical report No.3, Zirconia promotion of Fischer-Tropsch cobalt catalysts: Behavior in fixed-bed and slurry bubble column reactors, 20:14716 (R;US)

Photoelectron Spectroscopy
Direct catalytic decomposition of nitric oxide. Quarterly technical progress report No. 13, October–December 1994, 20:14758 (R;US)

Precursor
Novel bimetallic dispersed catalysts for temperature-programmed coal liquefaction. Technical progress report, July–September 1994, 20:14735 (R;US)

Solvent Extraction
Microbial recovery of metals from spent coal liquefaction catalysts. Quarterly report, January–March, 1992, 20:14753 (R;US)

CATHODIC PROTECTION
Engineering Task Plan: PUREX cathodic protection system survey and maintenance, 20:15105 (R;US)

CDF

Symmetries and first integrals of chiral Skyrme model, 20:16806 (RA;RU)
CHLOR-ALKALI INDUSTRY
See CHEMICAL INDUSTRY
CHLORINE
CHLORINATED ALIPHATIC HYDROCARBONS
See also CARBON TETRACHLORIDE
Atmospheric chemistry of hydrofluorocarbons and hydrochlorofluorocarbons, 20:16205 (R;DK)
Retardation of volatile organic compounds in ground water in low organic carbon sediments, 20:16591 (R;US)
CHLORINATED AROMATIC HYDROCARBONS
See also POLYCHLORINATED BIPHENYLS

Detection of chlorinated aromatic compounds, 20:16173 (PA;US)

CHLORINE
Detection of contaminants along boreholes with prompt gamma spectroscopy, 20:16426 (R;US)
Risk from a compressed toxic gas system: Part 1, Dispersal probability, 20:15185 (R;US)

CHLORINE 34
Stereo organic halogen hot atom chemistry. Present solutions, future projects, 20:16241 (RA;JP)

CHLORINE CHLORIDES
See CHLORINE

CHLOROFLUOROCARBONS
Compatibility of refrigerants and lubricants with motor materials under retrofit conditions, 20:15778 (R;US)
Urethane foam process improvements. Final report, 20:15784 (R;US)

CHOLESTEROL
Low density lipoprotein subclasses and response to a low-fat diet in healthy men, 20:16602 (R;US)

CHROMATIC ABERRATIONS
Notes on lie algebraic analysis of achromats, 20:16364 (R;US)

CHROMIUM
Activated carbon adsorption for chromium treatment and recovery, 20:15781 (R;IT;In Italian)
Atom probe field ion microscopy characterization of vanadium-titanium-chromium alloys, 20:15832 (RA;US)
Monte Carlo simulation of the surface magnetic phase transition in chromium, 20:16959 (R;XA)
On the possibility of a two-state magnetic structure for nanocrystalline chromium, 20:15816 (R;US)
Remediation options for a chromium contaminated landfill using cementitious grouts, 20:16519 (R;US)

CHROMIUM 52
Detailed study of uncertainties and correlations in the neutron nuclear data of ^{52}Cr, ^{56}Fe, ^{58}Ni and ^{60}Ni for the European fusion file, 20:16899 (RA;AT)
Detailed study of uncertainties and correlations in the neutron nuclear data of ^{52}Cr, ^{56}Fe, ^{58}Ni and ^{60}Ni for the European Fusion File, 20:16910 (RA;AT)
Evaluation of 14 MeV cross sections for the main isotopes of the structural materials Cr, Fe and Ni, 20:16900 (RA;AT)

CHROMIUM ALLOYS
See also CHROMIUM STEELS
STEEL-CR2MO
STEEL-CR2MOV
Analysis of grain boundaries in a V-5Cr-5Ti alloy using Auger Electron Spectroscopy, 20:15833 (RA;US)
Atom probe field ion microscopy characterization of vanadium-titanium-chromium alloys, 20:15832 (RA;US)
Creep of a fine-grained, fully-lamellar, two-phase TiAl alloy at 760°C, 20:15898 (R;US)
Development of electrical insulator coatings: In-situ electrical resistance measurements on CaO-coated V-5%Cr-5%Ti in liquid lithium, 20:17227 (RA;US)
Fracture toughness of V-5Cr-5Ti alloy at room temperature and 100°C, 20:15834 (RA;US)
Room temperature elastic properties of V-5Cr-5Ti, 20:15830 (RA;US)
The relationship between recrystallization temperature, grain size, and the Charpy impact properties of V-Cr-Ti alloys, 20:15829 (RA;US)
Thermophysical properties of V-5Cr-5Ti, 20:15831 (RA;US)
Void swelling in binary Fe-Cr alloys at 200 dpa, 20:17208 (RA;US)

CHROMIUM OXIDES
Observation of Hysteresis at Spin-Flop Transition Induced by a Pulsed Magnetic Field, 20:16993 (R;XJ;In Russian)

CHROMIUM STEELS
Development of low-chromium, chromium-tungsten steels for fusion, 20:17210 (RA;US)
Investigation of mechanical properties in a rotor blank of an improved 10% chromium steel manufactured through the PM/HIP process, 20:15897 (R;SE)

CHROMODYNAMICS

CLIMATES
The land-surface climate program. Final report, 20:16494 (R;DE;In German)

CLIMATIC CHANGE
See also GREENHOUSE EFFECT
Integrative assessment of mitigation, impacts, and adaptation to climate change, 20:15650 (R;AT)
Preliminary design for Arctic atmospheric radiative transfer experiments, 20:16508 (R;US)
Proceedings of the Fourth Atmospheric Radiation Measurement (ARM) Science Team Meeting, 20:16482 (R;US)

CLOUDS
Feasibility of tropospheric water vapor profiling using infrared heterodyne differential absorption lidar, 20:16489 (R;US)

CLUSTER BEAM INJECTION
Irradiation effects of Ar cluster ion beams on Si substrates, 20:16079 (IA;JP;In Japanese)

CO-GENERATION
See COGENERATION

COAL
See also BLACK COAL
BROWN COAL
COAL FINES
SUBBITUMINOUS COAL

Ash Content
Development of a video-based slurry sensor for on-line ash analysis. First quarterly technical progress report, October 1, 1994–December 31, 1994, 20:14749 (R;US)

Biodegradation
Development of biological coal gasification (MicGAS process). 18th Quarterly report, 20:14721 (R;US)

Briquetting
Emissions reductions in coal-fired home heating stoves through use of briquettes. Quarterly report, October 1, 1994–December 31, 1994, 20:14712 (R;US)

By-Products
High-volume, high-value usage of Flue Gas Desulfurization (FGD) by-products in underground mines Phase 1: Laboratory investigations. Quarterly report, July 1994–September 1994, 20:14744 (R;US)

Chemical Reactions
Mechanism of hydrogen incorporation in coal liquefaction. Fourteenth progress report, October 1994–December 1994, 20:14733 (R;US)

Cleaning
Bench-scale testing of the micronized magnetite process. Second quarterly technical progress report, October 1994–December 1994, 20:14709 (R;US)
Engineering development of advanced physical fine coal cleaning technologies - froth flotation. Quarterly technical progress report No. 23, April 1, 1994–June 30, 1994, 20:14706 (R;US)

Engineering development of advanced physical fine coal cleaning technologies - froth flotation. Quarterly technical progress report No. 24, July 1, 1994–September 30, 1994, 20:14726 (R;US)

Cocombustion
Producing usable fuel from municipal solid waste, 20:15240 (R;US)

Combustion
Coal use in the People's Republic of China, Volume 2: The economic effects of constraining coal utilization, 20:14770 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems, Phase 3, January 1994–March 1994, 20:14782 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems, Phase 3, Technical progress report, July 1993–September 1993, 20:14781 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, January 1993–March 1993, 20:14779 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, April 1993–June 1993, 20:14780 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, October 1992–December 1992, 20:14778 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, July 1992–September 1992, 20:14777 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, October 1994–December 1994, 20:14785 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, April 1992–June 1992, 20:14776 (R;US)
Feasibility survey of the environmental harmony type coal utilization system. Case in Indonesia, 20:14796 (R;JP;In Japanese)
Interactions between trace metals, sodium and sorbents in combustion. Quarterly report No. 1, October 1, 1994–December 31, 1994, 20:14789 (R;US)
Suppression of fine ash formation in pulverized coal flames. Quarterly technical progress report No. 9, October 1, 1994–December 31, 1994, 20:14762 (R;US)

Combustion Kinetics
Combustion fume structure and dynamics. Period of performance: 8/16/91–2/15/92, 20:14787 (R;US)

Desulfurization
Production of elemental sulfur from H_2S and CO_2 derived from a coal desulfurization process. Quarterly technical progress report, October 1, 1994–December 31, 1994, 20:14739 (R;US)

Flotation
Characterization of multiphase fluid flow during air-sparged hydrocyclone flotation by x-ray CT. Final report, 14 August 1990–13 August 1994, 20:14708 (R;US)

Fluidized-Bed Combustion
Analysis/control of in-bed tube erosion phenomena in the fluidized bed combustion (FBC) system. Technical progress report No. 9, [October 1, 1994–December 31, 1994], 20:14775 (R;US)
Disposal of fluidized bed combustion ash in an underground mine to control acid mine drainage and subsidence. Progress report, September 1, 1994–November 30, 1994, 20:14752 (R;US)
Tidd PFBC demonstration project: Technical progress report, third quarter 1994, 20:14772 (R;US)

Fuel Consumption
Fiscal 1993 actual energy supply/demand and short-term prospect. Report of the energy supply/demand trend survey committee, 20:15689 (R;JP;In Japanese)

Indonesia
Feasibility survey of the environmental harmony type coal utilization system. Case in Indonesia, 20:14796 (R;JP;In Japanese)

Pollution Abatement
Feasibility survey of the environmental harmony type coal utilization system. Case in Indonesia, 20:14796 (R;JP;In Japanese)

Processing
Supercritical thermodynamics of sulfur and nitrogen species. Final technical report, October 1, 1991–September 30, 1994, 20:14732 (R;US)

Pyrolysis
Structure and thermochemical kinetic studies of coal pyrolysis. Final technical report, 20:14727 (R;US)

Staged Combustion
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, July 1994–September 1994, 20:14784 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, April 1994–June 1994, 20:14783 (R;US)

Surface Properties
Coal surface structure and thermodynamics. Final report, 20:14745 (R;US)

Taxes
SFS 1994:1776 Act of 20 December 1994 on taxes on energy, 20:15707 (I;SE;In Swedish)

COAL FINES
Engineering development of advanced physical fine coal cleaning for premium fuel applications. Quarterly technical progress report 9, October 1, 1994–December 31, 1994, 20:14710 (R;US)
Evaluation of hyperbaric filtration for fine coal dewatering. Ninth quarterly technical progress report, October 1–December 31, 1994, 20:14711 (R;US)

COAL GAS
A calcium oxide sorbent process for bulk separation of carbon dioxide. Final report, 20:14720 (R;US)
Trace element emissions. Semi-annual report, October 1994–February 1995, 20:14723 (R;US)

COAL GASIFICATION
Development of an advanced, continuous mild gasification process for the production of co-products. Quarterly report, October 1–December 31, 1994, 20:14717 (R;US)
Development of biological coal gasification (MicGAS process). 18th Quarterly report, 20:14721 (R;US)
Hot gas particulate cleanup for advanced coal-based power systems, 20:14725 (R;US)
Japan's New Sunshine Project. 1993 Annual Summary of Coal Liquefaction and Gasification, 20:14741 (R;JP;In Japanese)
On possibility for creation of residue-free TPP on solid fuel with high ecological and energetic characteristics, 20:14793 (I;BG;In Russian)
Trace element emissions. Semi-annual report, October 1994–February 1995, 20:14723 (R;US)

COAL GASIFICATION PLANTS
The economical production of alcohol fuels from coal-derived synthesis gas. Quarterly technical progress report number 13, October 1–December 31, 1994, 20:15272 (R;US)

COAL INDUSTRY
Coal mining in the power industry of the Federal Republic of Germany in 1992, 20:14792 (I;DE;In German)
Federal investment in fossil energy technology, 20:15704 (R;US)
Model documentation coal market module of the National Energy Modeling System, 20:14791 (R;US)
U.S. energy industry financial developments: 1994 Fourth quarter, 20:14790 (R;US)

COAL LIQUEFACTION
Advanced direct liquefaction concepts for PETC generic units. Quarterly technical progress report, July–September 1994, 20:14728 (R;US)
Advanced liquefaction using coal swelling and catalyst dispersion techniques. Volume 2, appendices. Final technical report, October 1, 1991–September 30, 1994, 20:14729 (R;US)
Catalytic multi-stage liquefaction of coal. Final eighth quarterly report, 1 July 1994–30 September 1994, 20:14737 (R;US)
Catalytic multi-stage liquefaction of coal. Sixth quarterly report, 1 January 1994–31 March 1994, 20:14736 (R;US)
Japan's New Sunshine Project. 1993 Annual Summary of Coal Liquefaction and Gasification, 20:14741 (R;JP;In Japanese)
Low severity coal liquefaction promoted by cyclic olefins. Quarterly report, October 1994–December 1994, 20:14731 (R;US)

Mechanisms of iron-based catalysis investigated using model compounds, 20:14743 (R;US)
Microbial recovery of metals from spent coal liquefaction catalysts. Quarterly report, January–March, 1992, 20:14753 (R;US)
Microbial recovery of metals from spent coal liquefaction catalysts. Quarterly report, April–June, 1992, 20:14754 (R;US)
Novel bimetallic dispersed catalysts for temperature-programmed coal liquefaction. Technical progress report, July–September 1994, 20:14735 (R;US)
Role of the resid solvent in catalytic coprocessing. Quarterly report, October 1994–December 1994, 20:14730 (R;US)
Short contact time direct coal liquefaction using a novel batch reactor. Progress report, September 15, 1994–January 15, 1995, 20:14738 (R;US)

COAL LIQUEFACTION PLANTS
Advanced coal liquefaction. Final quarterly report, July 1, 1994–September 31, 1994, 20:14734 (R;US)

COAL LIQUIDS
Hindered diffusion of coal liquids. Quarterly report No. 9, September 18, 1994–December 17, 1994, 20:14746 (R;US)
Supercritical thermodynamics of sulfur and nitrogen species. Final technical report, October 1, 1991–September 30, 1994, 20:14732 (R;US)

COAL MINING
Coal mining in the power industry of the Federal Republic of Germany in 1992, 20:14792 (I;DE;In German)
Coal mining situation in the Federal Republic of Germany 1994, 20:14769 (I;DE;In German)

COAL PREPARATION
Bench-scale testing of the micronized magnetite process. Second quarterly technical progress report, October 1994–December 1994, 20:14709 (R;US)
Development of a coal quality expert. Technical progress report No. 17, April 1994–June 1994, 20:14707 (R;US)
Engineering development of advanced physical fine coal cleaning for premium fuel applications. Quarterly technical progress report 9, October 1, 1994–December 31, 1994, 20:14710 (R;US)

COAL TAR OILS
Vapor pressures and heats of vaporization of primary coal tars. Quarterly technical progress report, 1 October–31 December 1994, 20:14747 (R;US)

COAL-DERIVED GASES

Development of hydroponic system using agriculture waste. 1. Characteristics of rice husk charcoal as growth medium and vegetable growth, 20:15776 (R;JP;In Japanese)
CUPRATES
Absorption Spectra
Coexistence of localized (polarons) and delocalized (band) states at the Fermi energy of the Bi-2212 Y/Ca superconductors, 20:17107 (IA;RU)
Anisotropy
Anisotropy of crystal lattice expansion crystalline electric fields and charge redistribution in high-Tc superconductors, 20:17111 (IA;RU)
Chemical Preparation
Solution based temperature of Perovskite-type oxide films and powders, 20:16043 (R;US)
Critical Current
Peak-effect in monocrystals and texturized $ReBa_2Cu_3O_y$ samples, 20:17066 (IA;RU;In Russian)
Crystal Structure
Neutron investigation of single crystals of $LaCuO_4$ (Nd, Ce)$_2CuO_4$ and $BaBiO_3$-$KBiO_3$ system, 20:16041 (IA;RU)
X-ray diffraction study of Nd_2CuO_4, 20:17100 (IA;RU)
Electric Conductivity
Infrared spectra of optical phonons and conductivity of semiconducting La_2CuO_{4+x} single crystals, 20:17101 (IA;RU)
Temperature dependence of the electromagnetic penetration depth and fluctuation paraconductivity in the $(Y,Sm)_1Ba_2Cu_3O_{7-x}$ epitaxial films, 20:17097 (IA;RU)
The anisotropy of resistivity and thermoelectric power of the $Nd_{1.85}Ce_{0.15}CuO_{4-\delta}$ single crystal, 20:17105 (IA;RU)
Hall Effect
Anomalous Hall effect and current-voltage characteristics in $REBa_2Cu_3O_{7-\delta}$ epitaxial films, 20:17116 (IA;RU)
High-Tc Superconductors
Anisotropy of crystal lattice expansion crystalline electric fields and charge redistribution in high-Tc superconductors, 20:17111 (IA;RU)
Homogeneous spin doping of copper planes in $Tl_2Ba_2Ca_2Cu_3O_{1-\delta}$ according to ^{63}Cu, ^{17}O, ^{205}Tl NMR data, 20:17077 (IA;RU;In Russian)
New correlations between critical temperature, structural and optical characteristics of high-temperature superconducting materials, 20:17115 (IA;RU)
Studies of magnetization processes in high-T_c superconductors using magnetooptic techniques, 20:17112 (IA;RU)
Infrared Spectra
Infrared spectra of optical phonons and conductivity of semiconducting La_2CuO_{4+x} single crystals, 20:17101 (IA;RU)
Josephson Effect
Investigation of AC Josephson effect in YBaCuO, 20:17098 (IA;RU)
Josephson Junctions
Investigation of AC Josephson effect in YBaCuO, 20:17098 (IA;RU)
Lattice Vibrations
Neutron-diffraction studies of the temperature dependence of $La_2CuO_{4.1}$ superconductor's dynamics, 20:17087 (IA;RU;In Russian)
Magnetic Flux
Neutron depolarization in the rotating $YBa_2Cu_3O_{6.9}$, 20:17065 (IA;RU;In Russian)
Observation of a disordered vortex state in $Bi_2Sr_2CaCu_2O_{8+x}$ single crystals containing columnar defects, 20:17117 (IA;RU)
Peak-effect in monocrystals and texturized $ReBa_2Cu_3O_y$ samples, 20:17066 (IA;RU;In Russian)
Magnetization
Studies of magnetization processes in high-T_c superconductors using magnetooptic techniques, 20:17112 (IA;RU)
Penetration Depth
Studies of magnetization processes in high-T_c superconductors using magnetooptic techniques, 20:17112 (IA;RU)
Physical Radiation Effects
Damages in Y-Ba-Cu-O films produced by ^4He ions, 20:16040 (IA;RU)
Raman Effect
Anisotropy of electronic light scattering in $YBa_2Cu_3O_{6+x}$ crystals, 20:17114 (IA;RU)
Stacking Faults
Microstructure investigations of melt-textured $YBa_2Cu_3O_x$, 20:16042 (IA;RU)
Structural Chemical Analysis
Neutron investigation of single crystals of $LaCuO_4$ (Nd, Ce)$_2CuO_4$ and $BaBiO_3$-$KBiO_3$ system, 20:16041 (IA;RU)
Superconducting Films
Anomalous Hall effect and current-voltage characteristics in $REBa_2Cu_3O_{7-\delta}$ epitaxial films, 20:17116 (IA;RU)
Damages in Y-Ba-Cu-O films produced by ^4He ions, 20:16040 (IA;RU)
Phase states and transitions in flux lattice in superconducting films, 20:17099 (IA;RU)
Superconductivity
Neutron-diffraction studies of the temperature dependence of $La_2CuO_{4.1}$ superconductor's dynamics, 20:17087 (IA;RU;In Russian)
Structural phase transitions in $(La/Sn)_2CuO_4$ and their relation to superconductivity, 20:16039 (IA;RU)
CURRENT LIMITERS
Superconducting fault current limiter for power utility application, 20:15616 (RA;US)
CURVES

A Mid-Miocene progradational, sandy barrier island and back-barrier section, central Jylland, Denmark, 20:14807 (R;DK)
Quartz
Low-sinuosity river deposits from the Middle Miocene quarts sands of Jylland, 20:16724 (R;DK)
Radioactive Materials
Statement concerning the transport of radioactive materials during the year 1994, 20:15216 (R;DK;In Danish)
Solar Heating Systems
Plan of action for solar energy 1995-97, 20:15718 (R;DK;In Danish)
Stratigraphy
Contribution to the meeting 'Stratigraphy of the Paleocene', 20:16725 (R;DK)
Correlation of Miocene North Sea sequences with the Danish land area based on foraminifera, 20:16730 (R;DK)
Ecocene and Oligocene calcareous nannofossil biostratigraphy in the Linde-1 and Borg-1 boreholes, 20:16728 (R;DK)
Foraminiferal biostratigraphy of Cenozoic sections in five wells from the Danish area, 20:16729 (R;DK)
Neogene and Quaternary dinoflagellate cyst, foraminiferal, and molluscan biostratigraphy and paleoclimatology and paleoenvironment of the Lille Toende borehole, southern Jylland, Denmark, 20:16733 (R;DK)
Stratigraphic correlation of the Danish onshore and offshore Tertiary successions based on sequence stratigraphy, 20:16717 (R;DK)
Technology Transfer
Financial assistance to environmentally protective activities in Eastern and Central Europe. Annual report for 1993, 20:15676 (R;DK;In Danish)
Water Pollution
Atmospheric deposition of nitrogen. The Nation-Wide Danish Monitoring Programme 1993, 20:16586 (R;DK;In Danish)
Well Logging
Linde-1 borehole: Paleogene dinocysts, palynofacies and stratigraphy, 20:16727 (R;DK)
Wind Power
Wind power in the 90's. Pure energy, 20:15338 (R;DK)
Wind Power Plants
Implementing wind forecasting at a utility, 20:15351 (RA;DK)
Wind Turbines
Replacement of older wind turbines - perspectives and measures in Denmark, 20:15341 (RA;DK)
Spot check on operating wind turbines, 20:15360 (RA;DK)
Wood Fuels
Wood fuel resources from the Danish forests bigger than 0.5 ha. Status and forecast, 20:15259 (R;DK;In Danish)
DENSITY (PLASMA)
See PLASMA DENSITY
DEOXYCYTIDINURIA
See URINE
DEPLETED URANIUM
Assay of potentially contaminated propellant, 20:16456 (R;US)
DEPOSITION
A phenomenological finite element model of part building in the stereolithography process, 20:15796 (R;US)
DEPOSITS
Criticality safety aspects of K-25 Building uranium deposit removal, 20:16258 (R;US)
DEPTH DOSE DISTRIBUTIONS
Estimation of internal dose from radiocesium and phantom, 20:16692 (RA;JP;In Japanese)
DEPTH DOSES

GLUONS
Gluon Contribution to the Transverse Spin Structure Function g_2, 20:16818 (R;XJ)
Gluons from logarithmic slopes of F_2 in the NLL approximation, 20:16813 (R;PL)

GNEISSES
A discussion about the ortho gneisses source from Araguaia Belt basement based in Sr and Nd isotopes, 20:16134 (I;BR;In Portuguese)

GOBAR GAS
See INTERMEDIATE BTU GAS
METHANE

GOLD 197 BEAMS
Interactions of 10.6 GeV/n gold nuclei with light and heavy target nuclei in nuclear emulsion, 20:16911 (R;PL)

GOLD 197 REACTIONS
Probing the nuclear liquid-gas phase transition, 20:16882 (R;DE)

GOLD 197 TARGET
Particle production at AGS energies, 20:16874 (R;US)
Probing the nuclear liquid-gas phase transition, 20:16882 (R;DE)
The disappearance of flow, 20:16881 (R;DE)

GOLD ALLOYS
Transmutation in copper-base brazing materials, 20:17206 (RA;US)

GOVERNMENT BUILDINGS
Control of the energy. Status report 1993/94. Description. Analyses and evaluation (Denmark), 20:15760 (R;DK;In Danish)

Control of the energy. Status report 1993/94. Supplement, 20:15761 (R;DK;In Danish)

GRAD-SHAFRANOV EQUATION
Consistent determination of pressure/toroidal magnetic field profiles in Grad-Shafranov's equation, 20:17152 (R;IT)

GRAIN ALCOHOL
See ETHANOL

GRAIN BOUNDARIES
Analysis of grain boundaries in a V-5Cr-5Ti alloy using Auger Electron Spectroscopy, 20:15833 (RA;US)

GRANITES
Geochemistry, petrogenesis and Rb-Sr geochronology from Uaupes River Granite: implication for the evolution of Negro River Province, Amazon, 20:16136 (I;BR;In Portuguese)
Geochronology from Carajas Mineral Province; data synthesis and new challenges, 20:16132 (I;BR;In Portuguese)
The effect of thickness in the through-diffusion experiment, 20:16566 (R;FI)

GRAPHITE
Ceramic coatings for HTR graphitic structures, 20:15446 (RA;XA)
Evaluating on graphite oxidation during an air ingress accident in HTTR, 20:15438 (RA;XA)
Evaluation of graphite oxidation during water ingress accidents in HTTR, 20:15442 (RA;XA)
Experimental results of air ingress in heated graphite channels: A summary of American analyses of the Windscale and Chernobyl accidents, 20:15434 (RA;XA)
Graphite burnout, interim report on IP-25-A (PT-105-532-E), 20:15583 (R;US)
Oscillations of transverse magnetoresistance in strong magnetic fields of intercalation compounds into graphite of acceptor type of the second step graphite, 20:16106 (IA;RU;In Russian)
Preparation of carbonaceous electrodes and evaluation of their performance by electrochemical techniques, 20:16124 (R;IN)
Study of reaction: Coated SiC coatingon HTGR fuel elements, 20:15443 (RA;XA)
Sythesis of rare earth metal - GIC graphite intercalation compound in molten chloride system, 20:16189 (IA;JP;In Japanese)
Transient analysis of water ingress into the HTR-10 high temperature gas cooled test reactor, 20:15441 (RA;XA)

GRAPHITE FIBERS
See CARBON FIBERS

GRAPHITE MODERATED REACTORS
See also HTGR TYPE REACTORS
LWGR TYPE REACTORS
PROTEUS REACTOR
The physics design of accelerator-driven transmutation systems, 20:15003 (R;US)

GRAPHITE MODERATOR
See GRAPHITE

GREAT BRITAIN

GREAT PLAINS
See USA

GREELEY EVENT
See NUCLEAR EXPLOSIONS
UNDERGROUND EXPLOSIONS

GREENHOUSE EFFECT
Economical analysis relating to the global warming issue, 20:15653 (R;JP;In Japanese)

GREENHOUSE GASES
Technical innovation for reducing emissions of greenhouse effect gas and survey of effects of changes of industrial structures, 20:15657 (R;JP;In Japanese)

GROUND SUBSIDENCE
Disposal of fluidized bed combustion ash in an underground mine to control acid mine drainage and subsidence. Progress report, September 1, 1994–November 30, 1994, 20:14752 (R;US)

GROUND WATER
Actinides
The speciation of dissolved elements in aquatic solution. Radium and actinides, 20:16565 (R;FI;In Finnish)

Cleaning
Geology, hydrology, chemistry, and microbiology of the in situ bioremediation demonstration site, 20:15180 (R;US)

Contamination
Accounting for predictive uncertainty in a risk analysis focusing on radiological contamination of groundwater, 20:15184 (R;US)
Geochemical and stable isotope variations in baseflow from an urbanized watershed: White Rock Creek, Dallas, Texas, 20:16556 (R;US)
Human health risks from TNT, RDX, and HMX in environmental media and consideration of the US Regulatory Environment, 20:16711 (R;US)
Limited field investigation report for the 100-NR-2 Operable Unit, Hanford Site, Richland, Washington, 20:15143 (R;US)
Post-closure permit application for the Upper East Fork Poplar Creek hydrogeologic regime at the Y-12 Plant: New Hope Pond and Eastern S-3 ponds plume. Revision 2, 20:15205 (R;US)
Potassium ferrate treatment of RFETS' contaminated groundwater, 20:15183 (R;US)
Road Transportable Analytical Laboratory (RTAL) system, 20:16521 (R;US)
Scoping calculations for groundwater transport of tritium from the Gnome Site, New Mexico, 20:16525 (R;US)
Site-specific standard request for underground storage tanks 1219-U, 1222-U, 2082-U, and 2068-U at the rust garage facility buildings 9754-1 and 9720-15: Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, Facility ID No. 0-010117, 20:16574 (R;US)

Decontamination
Testing of a benchscale Reverse Osmosis/Coupled Transport system for treating contaminated groundwater, 20:16567 (R;US)

Environmental Transport
Modeling one-dimensional unsaturated flow at the Rocky Flats Environmental Technology Site near Golden, Colorado, 20:15147 (R;US)

Flow Models
A water infiltration model: Study of reusability in an environmental engineering problem, 20:14971 (R;US)
Groundwater flow analyses in preliminary site investigations. Modelling strategy and computer codes, 20:16594 (R;FI)
Modeling flow in fractured medium. Uncertainty analysis with stochastic continuum approach, 20:16593 (R;FI)
Modeling one-dimensional unsaturated flow at the Rocky Flats Environmental Technology Site near Golden, Colorado, 20:15147 (R;US)
Numerical study on the effects of the alternative structure geometries on the groundwater flow at the Romuvaara site, 20:16595 (R;FI)

Flow Rate
Water balance report for the Oak Ridge Y-12 Plant, 20:16573 (R;US)

Geochemistry
Insights into quick flow in a karst aquifer: Usefulness of infrequently collected geochemical data from wells, 20:16578 (R;US)

Monitoring
Evaluation of cavity occurrence in the Maynardville Limestone and the Copper Ridge Dolomite at the Y-12 Plant using logistic and general linear models, 20:15138 (R;US)
Groundwater monitoring plan: 200 Areas treated effluent disposal facility (Project W-049H), 20:16570 (R;US)
Insights into quick flow in a karst aquifer: Usefulness of infrequently collected geochemical data from wells, 20:16578 (R;US)
Site status monitoring report for underground storage tanks 1219-U, 1222-U, 2082-U, and 2068-U at the Rust Garage Facility, Buildings 9720-15 and 9754-1, Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, Facility ID No. 0-010117, 20:16575 (R;US)
Site-specific standard request for underground storage tanks 1219-U, 1222-U, 2082-U, and 2068-U at the rust garage facility buildings 9754-1 and 9720-15: Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, Facility ID No. 0-010117, 20:16574 (R;US)
Water balance report for the Oak Ridge Y-12 Plant, 20:16573 (R;US)

Organic Compounds
Humic substances in groundwater, 20:16535 (RA;FI)
Pollution
Field-usable portable analyzer for chlorinated organic compounds, 20:16522 (R;US)
Final report from VFL technologies for the pilot-scale thermal treatment of Lower East Fork Poplar Creek floodplain soils. LEFPC Appendices, Volume 2, Appendix V-A, 20:15154 (R;US)
Radionuclide Migration
A water infiltration model: Study of reusability in an environmental engineering problem, 20:14971 (R;US)
Accounting for predictive uncertainty in a risk analysis focusing on radiological contamination of groundwater, 20:15184 (R;US)
Radon measurements for earthquake prediction research, 20:16550 (RA;AT)
Radon measurements for earthquake-prediction research, 20:16549 (RA;AT)
Scenarios constructed for nominal flow in the presence of a repository at Yucca Mountain and vicinity, 20:15025 (R;US)
Scoping calculations for groundwater transport of tritium from the Gnome Site, New Mexico, 20:16525 (R;US)
Radium
The speciation of dissolved elements in aquatic solution. Radium and actinides, 20:16565 (R;FI;In Finnish)
Remedial Action
Abiotic reduction of aquifer materials by dithionite: A promising in-situ remediation technology, 20:16589 (R;US)
Sampling
Calendar year 1993 groundwater quality report for the Upper East Fork Poplar Creek hydrogeologic regime Y-12 Plant, Oak Ridge, Tennessee: 1993 groundwater quality data interpretations and proposed program modifications, 20:15136 (R;US)
Sampling and analysis plan for groundwater and surface water monitoring at the Y-12 Plant during calendar year 1995, 20:16576 (R;US)
Surface Contamination
Site Observational Work Plan for the UMTRA project site at Ambrosia Lake, New Mexico, 20:15141 (R;US)
Transport
Scoping calculations for groundwater transport of tritium from the Gnome Site, New Mexico, 20:16525 (R;US)
Uranium
Redox chemistry of uranium in groundwater of Palmottu uranium deposit, Finland, 20:16534 (RA;FI)
Velocity
Accounting for predictive uncertainty in a risk analysis focusing on radiological contamination of groundwater, 20:15184 (R;US)
Water Pollution
A numerical simulation of groundwater flow and contaminant transport on the Cray T3D and C90 supercomputers, 20:16564 (R;US)
Water Quality
Calendar year 1993 groundwater quality report for the Upper East Fork Poplar Creek hydrogeologic regime Y-12 Plant, Oak Ridge, Tennessee: 1993 groundwater quality data interpretations and proposed program modifications, 20:15136 (R;US)
Fiscal year 1994 well installation program summary report, Y-12 Plant, Oak Ridge, Tennessee, 20:15157 (R;US)
Sampling and analysis plan for groundwater and surface water monitoring at the Y-12 Plant during calendar year 1995, 20:16576 (R;US)
Water Supply
Water balance report for the Oak Ridge Y-12 Plant, 20:16573 (R;US)
Water Treatment
Potassium ferrate treatment of RFETS' contaminated groundwater, 20:15183 (R;US)
GROUND-WATER RESERVES
See AQUIFERS
GROUNDWATER RECHARGE
Estimation of natural ground water recharge for the performance assessment of a low-level waste disposal facility at the Hanford Site, 20:15017 (R;US)
GROUP THEORY
On the automatic construction of representations of non-commutative algebras, 20:16801 (RA;RU)
GROUTING
Disposal of fluidized bed combustion ash in an underground mine to control acid mine drainage and subsidence. Progress report, September 1, 1994–November 30, 1994, 20:14752 (R;US)
GULF COAST
See US GULF COAST
GULF OF MEXICO
Assist in the recovery of bypassed oil from reservoirs in the Gulf of Mexico. Quarterly status report (final), October 1–December 31, 1994, 20:14817 (R;US)
Dynamic enhanced recovery technologies. Quarterly technical report, October–December, 1994, 20:14828 (R;US)

H

H CODES
Verification of HYDRASTAR: Analysis of hydraulic conductivity fields and dispersion, 20:17398 (R;SE)
HABITAT
Hellsgate Winter Range: Wildlife mitigation project. Final environmental assessment, 20:15283 (R;US)
HADRON REACTIONS
Empirical regularities in the χ-dependence of nuclear J/Ψsuppression, 20:16827 (R;DE)
HADRON-HADRON INTERACTIONS
An introduction to the perturbative QCD pomeron and to jet physics at large rapidities, 20:16823 (R;DE)
HADRONS
B-hadrons at LEP, 20:16832 (R;PL)
Some highlights of the recent Fermilab Fixed Target Program of interest to the nuclear physics community, 20:16878 (R;US)
HAFNIUM
Development of single crystal filaments. Final report, 20:15748 (R;US)
HAFNIUM 178 TARGET
Isomeric Targets and Beams, 20:16870 (R;XJ)
HALFBEAK EVENT

HANDLING (WASTES)
See WASTE MANAGEMENT
HANDS
Automated volumetric grid generation for finite element modeling of human hand joints, 20:17403 (R;US)
HANFORD PRODUCTION REACTORS
Design review report for the 105 K-East Basin dose reduction concept. Volume 1, 20:15593 (R;US)
Graphite burnout, interim report on IP-25-A (PT-105-532-E), 20:15583 (R;US)
Technical activities report research and development & 234-5 metallurgy groups metallurgy - pile technology unit, October 1951, 20:15582 (R;US)
HANFORD RESERVATION
Audits
Report on audit of the Richland Operations Office Site Characterization Program, 20:14947 (R;US)
Chemical Analysis
Analytical services contract reform alternatives project, 20:15196 (R;US)
Fire Prevention
Preliminary Fire Hazards Analysis for W-059, B Plant canyon ventilation upgrade, 20:16285 (R;US)
Fuel Storage Pools
Design support document for the K Basins Vertical Fuel Handling Tools, 20:14942 (R;US)
Gaseous Wastes
Final report: Fiscal Year 1993 activities for the Line Loss Study, 20:15150 (R;US)
Ground Water
Groundwater monitoring plan: 200 Areas treated effluent disposal facility (Project W-049H), 20:16570 (R;US)
Health Hazards
1994 tier two emergency and hazard chemical inventory, 20:14981 (R;US)
Historical Aspects
Graphite burnout, interim report on IP-25-A (PT-105-532-E), 20:15583 (R;US)
Quarterly progress report - metallurgy unit - April 1954–June 1954, 20:15838 (R;US)
Information Systems
Westinghouse Hanford Company Data Management Plan Template. Revision 1, 20:17321 (R;US)
Leaks
Hanford site comprehensive site compliance evaluation report, 20:15058 (R;US)
Low-Level Radioactive Wastes
200 Area Treated Effluent Disposal Facility Quality Assurance Project Plan, 20:15065 (R;US)
Maintenance Facilities
Quality assurance program plan for the Site Physical and Electrical Calibration Services Lab. Revision 1, 20:15189 (R;US)
Management
Westinghouse Hanford Company Data Management Plan Template. Revision 1, 20:17321 (R;US)
Nuclear Materials Management
Assembly procedure for Shot Loading Platform, 20:14946 (R;US)
Hazard categorization of 100K East and 100K West in-basin fuel characterization program activities. Revision 1, 20:15191 (R;US)
Test plan for non-radioactive testing of vertical calciner for development of direct denitration conversion of Pu-bearing liquors to stable, storage solids, 20:15056 (R;US)
Personnel Monitoring
Development and implementation of a new radiation exposure record system, 20:16651 (RA;US)
Pollution Abatement
Closed out tank 241-SY-101 DACS system change requests No. 101-200, 20:15091 (R;US)
Program Management
Analytical services contract reform alternatives project, 20:15196 (R;US)
QUEST2: Project plan for preliminary analysis/system architecture phase (PA/SA), 20:17440 (R;US)
Quality Assurance
Hanford analytical services quality assurance plan. Revision 1, 20:14979 (R;US)
Radiation Monitoring
Development and implementation of a new radiation exposure record system, 20:16651 (RA;US)
Radioactive Effluents
200 Area Treated Effluent Disposal Facility Quality Assurance Project Plan, 20:15065 (R;US)
Site characterization for the W-049H Project, 20:16568 (R;US)
Radioactive Waste Disposal
200 Area Treated Effluent Disposal Facility Quality Assurance Project Plan, 20:15065 (R;US)
Clean salt disposition options, 20:15102 (R;US)
Estimation of natural ground water recharge for the performance assessment of a low-level waste disposal facility at the Hanford Site, 20:15017 (R;US)

340 Waste Handling Facility interim safety basis, 20:15107 (R;US)
Acceptance test procedure for the 241-SY-101 flexible receiver gamma detector system, 20:15086 (R;US)
Assembly procedure for column cutting platform, 20:15112 (R;US)
Choices of canisters and elements for the first fuel shipment from K West Basin, 20:14943 (R;US)
Closed out tank 241-SY-101 DACS system change requests No. 101-200, 20:15091 (R;US)
Closed out tank 241-SY-101 DACS system change requests No. 201-300, 20:15092 (R;US)
Compressed air piping, 241-SY-101 hydraulic pump retrieval trailer, 20:15093 (R;US)
Control system troubleshooting guide for the 300 area treated effluent disposal facility, 20:15061 (R;US)
Data quality objectives for PUREX deactivation flushing, 20:15188 (R;US)
Design Review Report for the 105 K-East Basin dose reduction concept, Volume 2, Review Package, 20:15190 (R;US)
Electrical classification for the single shell flammable gas watch list tanks, 20:15195 (R;US)
Final report: Fiscal Year 1993 activities for the Line Loss Study, 20:15150 (R;US)
Hanford site comprehensive site compliance evaluation report, 20:15058 (R;US)

Load test of the 306E Building roof deck and support structure, 20:15062 (R;US)
Long term decontamination at the Hanford Site: A case study, 20:15055 (R;US)
Operability Test Report for 241-T compressed air system and heat pump, 20:15108 (R;US)
Plan and schedule for disposition and regulatory compliance for miscellaneous streams. Revision 1, 20:14976 (R;US)
Plutonium finishing plant final safety analysis report. Volume 1, 20:14939 (R;US)
Plutonium finishing plant final safety analysis report. Volume 2, 20:14940 (R;US)
QUEST2: Release 1: Project plan deliverable set, 20:15669 (R;US)
Recommended test program to determine crack growth rate in double-shell tank materials, 20:15104 (R;US)
Safety evaluation for packaging transfer of 101-AZ thermocouples, 20:15072 (R;US)
Safety evaluation for the interim stabilization of Tank 241-C-103, 20:15116 (R;US)
Single-shell tank leak emergency pumping guide. Revision 5, 20:15192 (R;US)
TWRS tank waste pretreatment process development hot test siting report, 20:15118 (R;US)
Tank 241-TY-103 Tank Characterization Plan, 20:15122 (R;US)
Tank 241-U-105 tank characterization plan, 20:15120 (R;US)
Tank 241-U-201 tank characterization plan, 20:15123 (R;US)
Tank 241-U-202 tank characterization plan, 20:15124 (R;US)
Tank 241-U-203: Tank Characterization Plan, 20:15125 (R;US)
Tank waste remediation system high-level waste feed processability assessment report, 20:15128 (R;US)
WRAP Module 1 sampling and analysis plan, 20:15073 (R;US)
Waste handling Quality Assurance Program Plan for Engineered Process Applications. Revision 2, 20:15059 (R;US)

Radioactive Waste Storage
45-Day safety screening report for grab samples from Tank 241-AP-107, 20:15095 (R;US)
A Value of Information approach to data quality objectives for the Hanford high-level waste tanks, 20:15022 (R;US)
Acceptance Test Report for 241-SY Pump Cradle Hydraulic System, 20:15089 (R;US)
Acceptance test report for the Westinghouse 100 ton hydraulic trailer, 20:15193 (R;US)
Choices of canisters and elements for the first fuel shipment from K West Basin, 20:14943 (R;US)
Closed out Tank 241-SY-101 DACS system change request #1–100, 20:15194 (R;US)
Nitrogen chiller acceptance test procedure, 20:15087 (R;US)
Performance testing of a system for remote ultrasonic examination of the Hanford double-shell waste storage tanks, 20:16282 (R;US)
Sampler bias – Phase 1, 20:15100 (R;US)
Waste gas combustion in a Hanford radioactive waste tank, 20:15000 (R;US)

Records Management
QUEST2: Project plan for preliminary analysis/system architecture phase (PA/SA), 20:17440 (R;US)

Remedial Action
100-BC-5 operable unit focused feasibility study report. Draft A, 20:15144 (R;US)
A systematic approach for future solid waste cleanup activities at the Hanford Site, 20:15181 (R;US)
Data quality objectives for PUREX deactivation flushing, 20:15188 (R;US)
Geology, hydrology, chemistry, and microbiology of the in situ bioremediation demonstration site, 20:15180 (R;US)
Hanford site comprehensive site compliance evaluation report, 20:15058 (R;US)
Integration of pneumatic fracturing and in situ vitrification in the soil subsurface, 20:15020 (R;US)
Long term decontamination at the Hanford Site: A case study, 20:15055 (R;US)
Plutonium finishing plant final safety analysis report. Volume 1, 20:14939 (R;US)
Plutonium finishing plant final safety analysis report. Volume 2, 20:14940 (R;US)
QUEST2: Project plan for preliminary analysis/system architecture phase (PA/SA), 20:17440 (R;US)
QUEST2: Release 1: Project plan deliverable set, 20:15669 (R;US)
Report on audit of the Richland Operations Office Site Characterization Program, 20:14947 (R;US)
Risk evaluation of remedial alternatives for the Hanford Site, 20:15172 (R;US)

Site Characterization
Report on audit of the Richland Operations Office Site Characterization Program, 20:14947 (R;US)
Site characterization for the W-049H Project, 20:16568 (R;US)

Soils
Limited field investigation report for the 100-HR-2 Operable Unit, 20:15174 (R;US)

Spent Fuel Storage
Basis for criticality category B firefighting designation for K Basins. Revision 1, 20:14941 (R;US)
Test plan for K Basin Sludge Canister and Floor Sampling Device, 20:15071 (R;US)

Stack Disposal
Final report on fiscal year 1994 activities for the line loss study, 20:15151 (R;US)

Storage Facilities
Engineering task plan for BX/BY compressor upgrade, 20:15103 (R;US)
Sludge pretreatment chemistry evaluation: Enhanced sludge washing separation factors, 20:15018 (R;US)

Terrestrial Ecosystems
Vegetation management 1994 fiscal year end report, 20:15197 (R;US)

Underground Storage
Engineering Task Plan: PUREX cathodic protection system survey and maintenance, 20:15105 (R;US)
Test specification for decant pump and winch assembly. Revision 2, 20:15060 (R;US)

Waste Management
Hanford Site waste management units report. Revision 4, Volume 1, 20:14974 (R;US)
Hanford Site waste management units report: Sample and data management. Revision 4, Volume 2, 20:14975 (R;US)

Waste Processing Plants
Tank waste remediation system high-level waste feed processability assessment report, 20:15128 (R;US)

Water Pollution
Limited field investigation report for the 100-NR-2 Operable Unit, Hanford Site, Richland, Washington, 20:15143 (R;US)

Water Treatment Plants
200 Area Treated Effluent Disposal Facility operational test specification. Revision 2, 20:15066 (R;US)
Computer software configuration management plan for 200 East/West Liquid Effluent Facilities, 20:15063 (R;US)

Mixing
Tank waste remediation system high-level waste feed processability assessment report, 20:15128 (R;US)
Monitored Retrievable Storage
Status of volcanism studies for the Yucca Mountain Site Characterization Project, 20:14998 (R;US)
Monitoring
45-Day safety screen results for Tank 241-C-103, Cores 63 and 66, 20:15096 (R;US)
Partition
Partitioning of actinide from simulated high level wastes arising from reprocessing of PHWR fuels: counter current extraction studies using CMPO, 20:14956 (R;IN)
Radioactive Waste Disposal
TWRS tank waste pretreatment process development hot test siting report, 20:15118 (R;US)

Yucca Mountain Site Characterization Project Bibliography, January–June 1993. An update: Supplement 4, Addendum 1, 20:14973 (R;US)

Radioactive Waste Processing

Long term decontamination at the Hanford Site: A case study, 20:15055 (R;US)

Reaction progress pathways for glass and spent fuel under unsaturated conditions, 20:15148 (R;US)

Tank waste remediation system high-level waste feed processability assessment report, 20:15128 (R;US)

Radioactive Waste Storage

Closed out tank 241-SY-101 DACS system change requests No. 101-200, 20:15091 (R;US)

Electrical classification for the single shell flammable gas watch list tanks, 20:15195 (R;US)

Recommended test program to determine crack growth rate in double-shell tank materials, 20:15104 (R;US)

Resistance Weld Qualifcation Analysis for Radioactive Waste Canisters, 20:15129 (R;US)

Single-shell tank leak emergency pumping guide. Revision 5, 20:15192 (R;US)

Tank 241-U-105 tank characterization plan, 20:15120 (R;US)

Sampling

Tank 241-U-201 tank characterization plan, 20:15123 (R;US)

Tank 241-U-202 tank characterization plan, 20:15124 (R;US)

Underground Disposal

A review of the available technologies for sealing a potential underground nuclear waste repository at Yucca Mountain, Nevada, 20:15026 (R;US)

Assessing alternative conceptual models of fracture flow, 20:15032 (R;US)

Constitutive representation of damage development and healing in WIPP salt, 20:15029 (R;US)

Status of volcanism studies for the Yucca Mountain Site Characterization Project, 20:14998 (R;US)

Underground Storage

Summary of lithologic logging of new and existing boreholes at Yucca Mountain, Nevada, March 1994 to June 1994, 20:15149 (R;US)

Tank 241-TY-103 Tank Characterization Plan, 20:15122 (R;US)

Tank 241-U-201 tank characterization plan, 20:15123 (R;US)

Tank 241-U-202 tank characterization plan, 20:15124 (R;US)

Vitrification

Product consistency testing of three reference glasses in stainless steel and perfluoroalkoxy resin vessels, 20:15015 (R;US)

Reaction progress pathways for glass and spent fuel under unsaturated conditions, 20:15148 (R;US)

TWRS tank waste pretreatment process development hot test siting report, 20:15118 (R;US)

Tank waste remediation system high-level waste feed processability assessment report, 20:15128 (R;US)

Utilization of Cs^{137} to generate a radiation barrier for weapons grade plutonium immobilized in borosilicate glass canisters. Revision 1, 20:15049 (R;US)

Waste Forms

The HAW project. Test storage of high-level radiation sources in the Asse salt mine. Documentation and assessment of the storage system, 20:14989 (R;DE;In German)

Waste-Rock Interactions

The HAW project. Test storage of high-level radiation sources in the Asse salt mine. Documentation and assessment of the storage system, 20:14989 (R;DE;In German)

HIGH-TC SUPERCONDUCTORS

Anisotropy

Anisotropy of critical current in YBCO textured specimens, 20:15946 (IA;RU;In Russian)

Magnetoresistance anisotropy in single crystals of $YBa_2Cu_3O_x$ system in a normal state, 20:15926 (IA;RU;In Russian)

Calcium Additions

Study into the effect of calcium alloying on energy spectrum of $YBa_2Cu_3O_y$ by the complex method of electron transport phenomenon investigation, 20:15943 (IA;RU;In Russian)

Charge Carriers

Order and disorder in oxygen-deficient planes of $YBa_2Cu_3O_{6+x}$ and their relations to normal and superconductive properties, 20:16010 (IA;RU;In Russian)

Charge Transport

Study of quasi-two-dimensional properties of Bi-2212 HTSC phase with the help of mutually perpendicular currents, 20:15944 (IA;RU;In Russian)

Chemical Composition

Effect of γ-irradiation on element composition of $(Bi_{0.8}Pb_{0.2})_2Sr_2Ca_2Cu_3O_{10}$ HTSC surface, 20:15956 (IA;RU;In Russian)

Chemisorption

Influence of physical and chemical adsorption of H_2O molecules on phase state of $YBa_2Cu_3O_{7-\delta}$ HTSC, 20:15957 (IA;RU;In Russian)

Compressibility

Compressiblity and phase transitions in $YBa_2Cu_3O_x$, 20:15933 (IA;RU;In Russian)

Critical Current

Anisotropy of critical current in YBCO textured specimens, 20:15946 (IA;RU;In Russian)

Anisotropy of critical current of HTSC ceramics in magnetic field, 20:15975 (IA;RU;In Russian)

Behaviourof critical current in Bi-base superconducting wires under electron irradiation, 20:15935 (IA;RU;In Russian)

Investigation by the NMR method of the critical state in superconductor $Tl_2Ba_2CuO_{6+\delta}$, 20:17080 (IA;RU;In Russian)

Production of long-sized $Y_1Ba_2Cu_3O_{7-\delta}$ HTSC crystals and their properties, 20:15947 (IA;RU;In Russian)

Pulsed electron and ion irradiation effect on electrical properties of films of Y-Ba-Cu-O and Bi-Ca-Sr-Cu-O superconductors produced in a pulse ion diode, 20:15972 (IA;RU;In Russian)

Study of quasi-two-dimensional properties of Bi-2212 HTSC phase with the help of mutually perpendicular currents, 20:15944 (IA;RU;In Russian)

Superconducting film in a perpendicular (constant and alternative) magnetic fields: state calculation and determination of field dependence of critical current, 20:16012 (IA;RU;In Russian)

The fishtail in superconductors with coarse inclusions of normal phase, 20:15852 (IA;RU;In Russian)

Critical Field

Fluctuation effects and upper critical field in HTSC, 20:15980 (IA;RU;In Russian)

Study of $REBa_2(Cu_{1-x}Me_x)_3O_{7-y}$ (RE=Y, Gd; M=Ni, Fe) systems in superconducting and normal states, 20:15984 (IA;RU;In Russian)

The first and the second critical fields in fast neutron $YBa_2Cu_3O_x$ and $NbSe_2$, 20:15968 (IA;RU;In Russian)

Crystal Growth

Some aspects of improving superconducting properties of Y-123 bulk single crystals, 20:15971 (IA;RU;In Russian)

Crystal Structure

Order and disorder in oxygen-deficient planes of $YBa_2Cu_3O_{6+x}$ and their relations to normal and superconductive properties, 20:16010 (IA;RU;In Russian)

Production of long-sized $Y_1Ba_2Cu_3O_{7-\delta}$ HTSC crystals and their properties, 20:15947 (IA;RU;In Russian)

Crystal-Phase Transformations

Difficult tetra-ortho transition and temperature dependence of the London penentration depth in submicron $YBa_2Cu_3O_{6+x}$ particles produced according to Zol-Gel technology, 20:16004 (IA;RU;In Russian)

Crystallization

Phase transformations in melt-spun Y-Ba-Cu-O bulk superconductor, 20:15920 (R;US)

Cuprates

Neutron scattering experiments on cuprates of the type $R_{1-x}Ce_xLaCuO_4$ (R=Pr, Nd; $0 \leq x \leq 0.2$), 20:16996 (R;CH;In German)

Dielectric Materials

Polaron conductivity YBaCuO in dielectric phase, 20:17054 (IA;RU;In Russian)

Dielectric Properties
Dielectric resonance in $YBa_2Cu_3O_{7-x}$ specimens in UHF electromagnetic field, 20:15953 (IA;RU;In Russian)

Diffusion
Study of yttrium and mercury solubility and diffusion in $YBa_2Cu_3O_{7-\delta}$, 20:15940 (IA;RU;In Russian)

Dilatometry
Dilatometry of $YBa_2Cu_3O_{6+x}$ in magnetic field, 20:15965 (IA;RU;In Russian)

Electric Conductivity
Autooscillations of normal zone in thin HTSC films with transport current, 20:16001 (IA;RU;In Russian)
Current passing pattern and low-frequency noise in YBaCuO films with B-oriented inclusions, 20:15937 (IA;RU;In Russian)
Electric conductivity $t^{1/2}$ and $t^{1/4}$ relaxation in $YBa_2Cu_3O_{6+x}$ and $PrBa_2Cu_3O_{6+x}$ at various states of their oxygen subsystem, 20:15997 (IA;RU;In Russian)
Electron-phonon mechanism in electric conductivity in high-T_c superconductors $Ba_{1-x}K_xBiO_3$, 20:17058 (IA;RU;In Russian)
Fluctuation conductivity of $Bi_2Sr_2CaCu_2O_x$ and $Bi_{1.8}Pb_{0.2}Sr_2CaCu_2O_x$ HTSC, 20:15986 (IA;RU;In Russian)
High-fequency conductivity of high temperarature superconductors, 20:15847 (IA;RU;In Russian)
Interference of transport and shielding currents in $Bi_2Sr_2CaCu_2O_x$ single crystals, 20:15955 (IA;RU;In Russian)
Kinetic equations and temperature dependence of electric conductivity in HTSC normal phase, 20:15964 (IA;RU;In Russian)
Logarithmic relaxation of electric conductivity related to a glass state of oxygen subsystem in bismuth HTSC, 20:15995 (IA;RU;In Russian)
Oxygen nonstoichiometry and dielectric properties of $YBa_2Cu_3O_{6+x}$, 20:15998 (IA;RU;In Russian)
Specific features of tunneling in HTSC base structures, 20:16017 (IA;RU;In Russian)
Stability of structure and properties of $YBa_2Cu_3O_{70x}$ thin epitaxial films under conditions of open space and earth atmosphere, 20:15988 (IA;RU;In Russian)
Study of $REBa_2(Cu_{1-x}Me_x)_3O_{7-y}$ (RE=Y, Gd; M=Ni, Fe) systems in superconducting and normal states, 20:15984 (IA;RU;In Russian)
Superconductor-insulator transition induced by magnetic field in $Nd_{1.85}Ce_{0.15}CuO_4$ single crystal, 20:15994 (IA;RU;In Russian)
T^2 dependence of electric conductivity in the range of $500 < T < 1000$ K for bismuth HTSC being related to the mobility of oxygen subsystem, 20:15996 (IA;RU;In Russian)

Electric Currents
Surafce current relaxation in granulated HTSC, 20:16002 (IA;RU;In Russian)

Electric Fields
The electric field induced by a longitudinal sound wave in inhomogeneous superconductors, 20:17063 (IA;RU;In Russian)

Electric Impedance
Impedance of high temperature superconductors in the vicinity of transition temperature in frequency range of 200 to 1000 MHz, 20:16008 (IA;RU;In Russian)

Electrical Properties
Performance evaluation of high-temperature superconducting current leads for micro-SMES systems, 20:17024 (R;US)

Electromagnetic Interactions
Specific features of nonlinear interaction of electromagnetic waves in rigid superconductors, 20:15934 (IA;RU;In Russian)

Electron Correlation
Superconduction of electrons with spin correlation, 20:17090 (IA;RU;In Russian)

Electron-Phonon Coupling
Electron and phonon characteristics based on precision data on specific heat for $YBa_2Cu_3O_{7-\delta}$, 20:15936 (IA;RU;In Russian)
Electron-phonon mechanism in electric conductivity in high-T_c superconductors $Ba_{1-x}K_xBiO_3$, 20:17058 (IA;RU;In Russian)

Electronic Structure
Electronic structure of ideal and disordered HTSC-polymer Langmuir Bladgett films on epitaxial YBaCuO surfaces, 20:17096 (IA;RU)

Energy Gap
Dependence of charge-transfer gap on pressure in insulators - the analogues of high temperature superconductors, 20:15961 (IA;RU;In Russian)

Grain Orientation
Current passing pattern and low-frequency noise in YBaCuO films with B-oriented inclusions, 20:15937 (IA;RU;In Russian)

Grain Size
Formation of initial vortex structure in fine-grained HTSC, 20:15973 (IA;RU;In Russian)

Harmonics
Study on the penetration of the rotating radio-frequency field into HTSC ceramics, 20:17089 (IA;RU;In Russian)

Heterojunctions
Volt-ampere characteristics of the tunnel HTSC-insulator-HTSC structure in the layer model, 20:17093 (IA;RU;In Russian)

Instability
Instability of magnetic flux in YBaCuO melt texture grown speeimens, 20:16015 (IA;RU;In Russian)

Josephson Effect
Frequency modulation method for observation of nonstationary Josephson effect in multiple weak-coupling system with random parameters, 20:17059 (IA;RU;In Russian)

Laser Radiation
Nonequilibrium and bolometric response of YBaCuO films in a resistive state to infrared low intensity radiation, 20:15952 (IA;RU;In Russian)

Lattice Parameters
Flicker noise of normal phase in $YBa_2Cu_3O_{7-\delta}$ films on various substrates, 20:15938 (IA;RU;In Russian)
Study of Cu-O structural fragments in HTSC and related phases, 20:16005 (IA;RU;In Russian)

Lattice Vibrations
Contribution of copper atoms to the phonon density in Y-Ba-Cu-O high-tc superconductor. Localization of Cu_2 atomic vibrations, 20:17079 (IA;RU;In Russian)
Specific heat of specimens of YBCO-system with rare earth substitutions in a normal state range, 20:15985 (IA;RU;In Russian)

Luminescence
Influence of real structure and temperature on specific features of luminescence in $YBa_2Cu_3O_{7-\delta}$ HTSC, 20:15924 (IA;RU;In Russian)

Magnetic Fields
Angular dependences of higher harmonics on mutual orientation of constant and alternating magnetic fields, 20:15978 (IA;RU;In Russian)
Dilatometry of $YBa_2Cu_3O_{6+x}$ in magnetic field, 20:15965 (IA;RU;In Russian)
Magnetic field penetration into powders from anisotropic superconductor, 20:15853 (IA;RU;In Russian)
Study of penetration depth of magnetic field in bismuth base HTSC by μSR method, 20:15960 (IA;RU;In Russian)

Magnetic Flux
Formation of initial vortex structure in fine-grained HTSC, 20:15973 (IA;RU;In Russian)
Instability of magnetic flux in YBaCuO melt texture grown speeimens, 20:16015 (IA;RU;In Russian)
Krypton irradiation effect on pinning and creep in $Bi_2Sr_2CaCu_2O_x$ single crystals, 20:15963 (IA;RU;In Russian)
Study on the vortice lattice in $YBa_2Cu_3O_{7-\delta}$ monocrystals by the EPR-decoring, 20:17091 (IA;RU;In Russian)
The entrainment effect of vortices by ultrasound waves in high-temperature superconductors, 20:17108 (IA;RU)
The fishtail in superconductors with coarse inclusions of normal phase, 20:15852 (IA;RU;In Russian)
The interaction of ultrasound waves with vortex structure in the TAFF region of HTSC, 20:17109 (IA;RU)

Magnetic Properties
Magnetic phase diagram of $YBa_2(Cu_{1-x}Fe_x)_3O_{6+y}$ superconductor in wide ranges of temperature and iron and oxygen contents, 20:15931 (IA;RU;In Russian)
Magnetic properties of laminated superconductors with nodes in the excitation spectrum, 20:17049 (IA;RU;In Russian)

Magnetic Susceptibility
Narrow lines of complex magnetic susceptibility in the vicinity of a frozen field in submicron particles of $YBa_2Cu_3O_{6+x}$ produced according to zol-gel technology, 20:16003 (IA;RU;In Russian)
Nonstationary photoresponse of magnetic susceptibility of HTS Y-ceramics and Bi single crystals, 20:16011 (IA;RU;In Russian)

Magnetization
Dependence of shielding currents and critical temperature on thickness of $YBa_2Cu_3O_{7-\delta}$ single crystals, 20:15970 (IA;RU;In Russian)
Evolution of transport and magnetic properties of granular $YBa_2Cu_3O_{7-\delta}$ superconductors at a decrease of Josephson binding, 20:15982 (IA;RU;In Russian)

Magnetoresistance
Lateral magnetoresistance of YBCO single crystals with various oxygen contents, 20:15927 (IA;RU;In Russian)
Magnetoresistance anisotropy in single crystals of $YBa_2Cu_3O_x$ system in a normal state, 20:15926 (IA;RU;In Russian)
Magnetoresistance of YBCO in a normal state. Relation to superconducting properties, 20:15925 (IA;RU;In Russian)

Magnetostriction
Giant magnetostriction in MTG specimens of YBaCuO superconducting state, 20:15990 (IA;RU;In Russian)
Magnetostriction oscillations in manganese doped bismuth ceramics of 2223 type, 20:15951 (IA;RU;In Russian)

Measuring Methods
Superconducting film in a perpendicular (constant and alternative) magnetic fields: state calculation and determination of field dependence of critical current, 20:16012 (IA;RU;In Russian)

Neutron Diffraction
Neutron Diffraction Study of the High-T_c Superconductor $HgBa_2CaCu_2O_{6.3}$ under High Pressure, 20:16992 (R;XJ)
Precision Fourier Neutron Diffraction Study of the High-Temperature Superconductor $Y(^{44}Ca)Ba_2Cu_4O_8$, 20:16991 (R;XJ)

Nuclear Magnetic Resonance
Investigation by the NMR method of the critical state in superconductor $Tl_2Ba_2CuO_{6+\delta}$, 20:17080 (IA;RU;In Russian)

Optical Properties
Optical conductivity in HTSC-analysis of polaron contribution, 20:15967 (IA;RU;In Russian)

Optical Pumping
Nonstationary photoresponse of magnetic susceptibility of HTS Y-ceramics and Bi single crystals, 20:16011 (IA;RU;In Russian)

Order-Disorder Transformations
Kinetics of oxygen sublattice ordering in $TmBa_2Cu_3O_{6.6}$ at room temperature, 20:15974 (IA;RU;In Russian)
Phase diagram of oxygen ordering in $YBa_2Cu_3O_x$, 20:16006 (IA;RU;In Russian)

Pairing Interactions
A valence-fluctuation mechanism with highly anisotropic S-wave pairing, 20:16044 (R;US)

Paramagnetism
Paramagnetic Meisner effect in superconductors, 20:15987 (IA;RU;In Russian)

Penetration Depth
Angular dependences of higher harmonics on mutual orientation of constant and alternating magnetic fields, 20:15978 (IA;RU;In Russian)
Difficult tetra-ortho transition and temperature dependence of the London penentration depth in submicron $YBa_2Cu_3O_{6+x}$ particles produced according to Zol-Gel technology, 20:16004 (IA;RU;In Russian)
Magnetic field penetration into powders from anisotropic superconductor, 20:15853 (IA;RU;In Russian)
Study on the vortice lattice in $YBa_2Cu_3O_{7-\delta}$ monocrystals by the EPR-decoring, 20:17091 (IA;RU;In Russian)

Performance Testing
Performance evaluation of high-temperature superconducting current leads for micro-SMES systems, 20:17024 (R;US)

Phase Diagrams
Phase diagram of oxygen ordering in $YBa_2Cu_3O_x$, 20:16006 (IA;RU;In Russian)

Phase Studies
Influence of physical and chemical adsorption of H_2O molecules on phase state of $YBa_2Cu_3O_{7-\delta}$ HTSC, 20:15957 (IA;RU;In Russian)
Sensitive technique of studying fine superconducting structure of HTSC materials, 20:15969 (IA;RU;In Russian)
Study of Cu-O structural fragments in HTSC and related phases, 20:16005 (IA;RU;In Russian)
Synthesis, crystal structure and inelastic scattering of neutrons in $Sr_{1-x}Nd_xCuO_2$ infinite superconductors, 20:15991 (IA;RU;In Russian)

Phase Transformations
Compressiblity and phase transitions in $YBa_2Cu_3O_x$, 20:15933 (IA;RU;In Russian)
Ferroelectric microdomain of oxygen vacancy in $YBa_2Cu_3O_{7-\delta}$, 20:15979 (IA;RU;In Russian)
Phase transformations in melt-spun Y-Ba-Cu-O bulk superconductor, 20:15920 (R;US)
Superconductor-insulator transition induced by magnetic field in $Nd_{1.85}Ce_{0.15}CuO_4$ single crystal, 20:15994 (IA;RU;In Russian)

Physical Radiation Effects
Behaviourof critical current in Bi-base superconducting wires under electron irradiation, 20:15935 (IA;RU;In Russian)
Interrelation between T_c and anisotropy of $La_{2-x}Sr_xCuO_4$ crystal lattice on radiation induced disordering, 20:15948 (IA;RU;In Russian)
Low temperature magnetic ordering in $YBa_2Cu_3O_{6.9}$ irradiated by fast neutrons, 20:15962 (IA;RU;In Russian)
Mathematical modeling of radiation damage in HTSC materials, 20:15849 (IA;RU;In Russian)
Nonequilibrium and bolometric response of YBaCuO films in a resistive state to infrared low intensity radiation, 20:15952 (IA;RU;In Russian)
Nonmonotoneous changes of critical temperature in $(Bi_{0.8}Pb_{0.2})_2Ca_2Sr_2Cu_3O_{10}$ superconductor under low dose irradiation, 20:15930 (IA;RU;In Russian)
Pulsed electron and ion irradiation effect on electrical properties of films of Y-Ba-Cu-O and Bi-Ca-Sr-Cu-O superconductors produced in a pulse ion diode, 20:15972 (IA;RU;In Russian)
The first and the second critical fields in fast neutron $YBa_2Cu_3O_x$ and $NbSe_2$, 20:15968 (IA;RU;In Russian)
Threshold variation of chemical composition and surface morphology in $(Pb_xBi_{1-x})_2Sr_2Ca_2Cu_3O_y$ ceramics under electron irradiation, 20:15941 (IA;RU;In Russian)

Polarons
Polaron conductivity YBaCuO in dielectric phase, 20:17054 (IA;RU;In Russian)

Radiation Effects
Effect of γ-irradiation on element composition of $(Bi_{0.8}Pb_{0.2})_2Sr_2Ca_2Cu_3O_{10}$ HTSC surface, 20:15956 (IA;RU;In Russian)
Krypton irradiation effect on pinning and creep in $Bi_2Sr_2CaCu_2O_x$ single crystals, 20:15963 (IA;RU;In Russian)

Radiowave Radiation
Study on the penetration of the rotating radio-frequency field into HTSC ceramics, 20:17089 (IA;RU;In Russian)

Raman Effect
Investigations of spin correlations in oxide superconducting materials by two-magnon Raman scattering, 20:17113 (IA;RU)

Raman Spectra
Investigation of the gap symmetry by electronic Raman scattering, 20:17104 (IA;RU)

Rare Earth Compounds
Neutron scattering experiments on cuprates of the type $R_{1-x}Ce_xLaCuO_4$ (R=Pr, Nd; $0 \leq x \leq 0.2$), 20:16996 (R;CH;In German)

Relaxation Time
Magnetic properties of laminated superconductors with nodes in the excitation spectrum, 20:17049 (IA;RU;In Russian)

Residual Stresses
Flicker noise of normal phase in $YBa_2Cu_3O_{7-\delta}$ films on various substrates, 20:15938 (IA;RU;In Russian)

Shielding Materials
Magnetic shielding at liquid nitrogen temperatures, 20:15992 (IA;RU;In Russian)

Solubility
Study of yttrium and mercury solubility and diffusion in $YBa_2Cu_3O_{7-\delta}$, 20:15940 (IA;RU;In Russian)

Specific Heat
Electron and phonon characteristics based on precision data on specific heat for $YBa_2Cu_3O_{7-\delta}$, 20:15936 (IA;RU;In Russian)
Specific heat of specimens of YBCO-system with rare earth substitutions in a normal state range, 20:15985 (IA;RU;In Russian)

Stresses
Giant magnetostriction in MTG specimens of YBaCuO superconducting state, 20:15990 (IA;RU;In Russian)

Structural Models
Formation of 'low radius' bipolarous and thermodynamic properties of cuprate HTSC, 20:15932 (IA;RU;In Russian)

Superconductivity
Contribution of copper atoms to the phonon density in Y-Ba-Cu-O high-tc superconductor. Localization of Cu_2 atomic vibrations, 20:17079 (IA;RU;In Russian)
Dependence of shielding currents and critical temperature on thickness of $YBa_2Cu_3O_{7-\delta}$ single crystals, 20:15970 (IA;RU;In Russian)
Sensitive technique of studying fine superconducting structure of HTSC materials, 20:15969 (IA;RU;In Russian)
Study into the effect of calcium alloying on energy spectrum of $YBa_2Cu_3O_y$ by the complex method of electron transport phenomenon investigation, 20:15943 (IA;RU;In Russian)
Superconduction of electrons with spin correlation, 20:17090 (IA;RU;In Russian)
Superconductivity in structurally disordered system near quantum percolation transitions, 20:17069 (IA;RU;In Russian)

Thermal Conductivity
Thermal conductivity of high-Tc superconductors, 20:17102 (IA;RU)

Thermodynamic Properties
Formation of 'low radius' bipolarous and thermodynamic properties of cuprate HTSC, 20:15932 (IA;RU;In Russian)

Thermoelectric Properties
Contribution of superconducting parameter fluctuations to thermoemf of HTSC, 20:16013 (IA;RU;In Russian)
Study of coefficient of thermo-emf in bismuth HTSC materials in the temperature range of T_c-1000 K, 20:15950 (IA;RU;In Russian)

Transition Temperature
Calorimetric and volt-ampere studies of $YBa_2Cu_3O_{6+\delta}$ behaviour in the temperature range of 300 to 420 K, 20:16000 (IA;RU;In Russian)
High-T_c superconductors from the viewpoint of surface effects, 20:17073 (IA;RU;In Russian)
Interrelation between T_c and anisotropy of $La_{2-x}Sr_xCuO_4$ crystal lattice on radiation induced disordering, 20:15948 (IA;RU;In Russian)
Kinetics of oxygen sublattice ordering in $TmBa_2Cu_3O_{6.6}$ at room temperature, 20:15974 (IA;RU;In Russian)
Nonmonotoneous changes of critical temperature in $(Bi_{0.8}Pb_{0.2})_2Ca_2Sr_2Cu_3O_{10}$ superconductor under low dose irradiation, 20:15930 (IA;RU;In Russian)
Partial factors of isotopic shifts for oxygen atoms in the 1-2-3 system, 20:17064 (IA;RU;In Russian)
Some aspects of improving superconducting properties of Y-123 bulk single crystals, 20:15971 (IA;RU;In Russian)
Stability of structure and properties of $YBa_2Cu_3O_{70x}$ thin epitaxial films under conditions of open space and earth atmosphere, 20:15988 (IA;RU;In Russian)
Study of penetration depth of magnetic field in bismuth base HTSC by μSR method, 20:15960 (IA;RU;In Russian)

Tunnel Effect
Specific features of tunneling in HTSC base structures, 20:16017 (IA;RU;In Russian)
Volt-ampere characteristics of the tunnel HTSC-insulator-HTSC structure in the layer model, 20:17093 (IA;RU;In Russian)

Vacancies
Ferroelectric microdomain of oxygen vacancy in $YBa_2Cu_3O_{7-\delta}$, 20:15979 (IA;RU;In Russian)

Wave Functions
Variation wave function in Hubbard model, 20:17053 (IA;RU;In Russian)

Yttrium Compounds
Microstructure, levitation properties of textured YBCO samples, 20:17106 (IA;RU)

Yttrium Oxides
Production of long-sized $Y_1Ba_2Cu_3O_{7-\delta}$ HTSC crystals and their properties, 20:15947 (IA;RU;In Russian)

HOFFMAN PROCESS
See COAL GASIFICATION

HOLIFIELD HEAVY ION RESEARCH FACILITY
See HHIRF ACCELERATOR

HOLLY EVENT
See NUCLEAR EXPLOSIONS

HOLMIUM
Magnetoelastic anomalies and Moessbauer spectrum-peculiarities of holmium monocrystals in the range of magnetic phase transformations, 20:15864 (IA;RU;In Russian)
Magnetogeterogeneous state of structural phase transformations over magnetic field in holmium monocrystal, 20:15867 (IA;RU;In Russian)

HOLMIUM COMPOUNDS
See also HOLMIUM OXIDES
Anisotropic magnetization of $HoNi_2B_2C$, 20:15921 (R;US)
Weak Antiferromagnetism in $YFeO_3$ and $HoFeO_3$, 20:16994 (R;XJ;In Russian)

HOLMIUM OXIDES
Measuring of antiferromegnetic susceptibility of Ho^{+3} ions in $HoFeO_3$ on SNIM-2 spectrometer, 20:16021 (IA;RU;In Russian)

HOLZHEIMER PROCESS
See OIL SHALES

HORIZONTAL AXIS TURBINES
A comparative study between a dynamic stall model and experiments on a HAWT, 20:15356 (RA;DK)
Dynamic stall measurements on a 19 m diameter HAWT, 20:15349 (R;DK)
Improvements on the power characteristics of the small scale wind turbine FC-4000 wind motor, 20:15345 (R;DK)
Influence of transversal turbulence on lifetime predictions for a HAWT, 20:15357 (RA;DK)

HOT ATOM CHEMISTRY
From trace chemistry to single atom chemistry, 20:16238 (RA;JP)
Hot atom chemistry of astatine and some remarks on cage reactions, 20:16240 (RA;JP)
Hot atom chemistry of mixed crystals. 35 years of research, 20:16243 (RA;JP)
Molecular beam studies and hot atom chemistry, 20:16244 (RA;JP)
Primary processes and ionic reactions in the chemistry of recoiling silicon atoms, 20:16239 (RA;JP)
Remarks on theoretical hot-atom chemistry, 20:16245 (RA;JP)
Role of charged states in hot atom and radiation chemistry processes, 20:16247 (RA;JP)
Stereo organic halogen hot atom chemistry. Present solutions, future projects, 20:16241 (RA;JP)

HOT GAS CLEANUP
Assessment and evaluation of ceramic filter cleaning techniques: Task Order 19, 20:14719 (R;US)
Catalytic cleaning of gas from straw gasification. Parameter experiment, 20:15242 (R;DK;In Danish)
Hot Gas Cleanup Test Facility for gasification and pressurized combustion. Quarterly report, October–December 1994, 20:14718 (R;US)
Hot coal gas desulfurization with manganese based sorbents. Quarterly report, June–September 1994, 20:14722 (R;US)

HOT PLASMA
"Heavy light bullets" in electron-positron plasma, 20:17168 (R;XA)

HOUSES
Indoor radon measurements and radon prognosis for eastern Uusimaa. Askola, Lapinjaervi, Liljendal, Loviisa, Myrskylae, Maentsaelae, Maentsaelae, Pernaja, Pornainen, Porvoo, Porvoon mlk, Pukkila, Ruotsinpyhtaeae and Sipoo, 20:16511 (R;FI;In Finnish)
Thermo logica. Analysis of measurements, 20:15756 (R;DK;In Danish)
Total energy solution at Skotteparken, Egebjerggaard in Ballerup, 20:15758 (R;DK;In Danish)

KINETICSV3.2. A Computer Program to Analyze Chemical Reaction Rate Data, 20:17338 (CM;US)

K-25 PLANT
See ORGDP

KALUZA-KLEIN THEORY
Stensor, a system for tensor- and noncommutative algebra, 20:16802 (RA;RU)

KAOLINITE
Interactions between trace metals, sodium and sorbents in combustion. Quarterly report No. 1, October 1, 1994–December 31, 1994, 20:14789 (R;US)

KAON REACTIONS
Probing the in-Medium Effect in Kaon-Nucleus Interaction, 20:16912 (R;XJ)

KAON-KAON INTERACTIONS
Low energy parameters of the K K-bar and $\pi\pi$ scalar-isoscalar interactions, 20:16834 (R;PL)

KAONS
Recent results from NA44 and a review of HBT, 20:16921 (R;US)

KERNELS (FUEL)
See FUEL PARTICLES

KILNS
Study and modelling of UF_6-UO_2 conversion kiln, 20:14911 (R;FR)

KINASES
See PHOSPHOTRANSFERASES

KINASES (PHOSPHOTRANSFERASES)
See PHOSPHOTRANSFERASES

KINK INSTABILITY
Stabilization of the resistive shell mode in tokamaks, 20:17148 (R;US)

KNOWLEDGE BASE
Deep knowledge and knowledge compilation for dynamic systems, 20:15470 (IA;JP)
Distributed and organized decision making under resource boundedness, 20:15471 (IA;JP)

KOREA (SOUTH)
See REPUBLIC OF KOREA

KORTEWEG-DE VRIES EQUATION
Application of computer algebra to analysis of necessary integrability conditions for polynomial-nonlinear evolution equations, 20:16750 (RA;RU)

KRYPTON
Laser spectroscopy of metastable RG($^3P_{0,2}$) atoms in liquid and solid helium, 20:17134 (IA;RU;In Russian)

KRYPTON IONS
Wavelengths measurements of the He-like krypton K-shell spectrum, 20:16950 (R;US)

KUR REACTOR
RI beam project at KUR, 20:15584 (RA;JP;In Japanese)

KYOTO UNIVERSITY REACTOR
See KUR REACTOR

L

L SHELL
Systematic study of L-shell ionization of some heavy elements by light ion bombardment, 20:16948 (R;PL)

LABORATORIES
Hanford analytical services quality assurance plan. Revision 1, 20:14979 (R;US)

LABORATORY BUILDINGS
222-S radioactive liquid waste line replacement and 219-S secondary containment upgrade, Hanford Site, Richland, Washington, 20:14967 (R;US)
International lighting in controlled environments workshop: Proceedings, 20:15742 (R;US)

LABORATORY EQUIPMENT
See also DNA SEQUENCERS
GLOVEBOXES
MANIPULATORS
New approaches to instrumentation and calibration, 20:16639 (RA;US)
Road Transportable Analytical Laboratory (RTAL) system, 20:16521 (R;US)
The Cooperative On-site Sampling and Analysis Experiment (COSAX), 20:16479 (R;US)

LAGRANGIAN
See LAGRANGIAN FUNCTION

LAGRANGIAN FUNCTION
Symbolic computation of alternative Lagrangians, 20:17360 (RA;RU)
The second variation and Jacobi equations for second-order Lagrangians, 20:16740 (R;XA)

LAKES
See also AMBROSIA LAKE
Methyl mercury in lakes. Factors affecting its production and partitioning between water and sediment, 20:16585 (R;SE)

LAMINAR FLOW
First assessment of computations of turbulent bubbly flow and particulate flow with the COMMIX-M program, 20:16287 (R;US)
LAMPS
See LIGHT BULBS
LAND FILLS
See SANITARY LANDFILLS
LANDFILLS
See SANITARY LANDFILLS
LANGEVIN EQUATION
Numerical simulation of the Langevin equation for skewed turbulence, 20:16515 (R;US)
LANGMUIR OSCILLATIONS
See PLASMA WAVES
LANGUAGES (PROGRAMMING)
See PROGRAMMING LANGUAGES
LANL
Characterization of low level mixed waste at Los Alamos National Laboratory, 20:15001 (R;US)
National strategic challenges and the role of Lawrence Livermore National Laboratory, 20:15681 (R;US)
Report on inspection of Los Alamos National Laboratory's system for controlling cost overruns on work-for-others projects, 20:17287 (R;US)
LANS
See LOCAL AREA NETWORKS
LANTHANIDES
See RARE EARTHS
LANTHANUM ALLOYS
Determination of conditions of Kondo-insulator CeNiSn base state formation, 20:15880 (IA;RU;In Russian)
Effect of nearest surrounding on the formation of intervalent state in Ce-Ni compounds, 20:15872 (IA;RU;In Russian)
Transformation of excitation spectra of 4f electrons in $Ce_{1-x}La_xNi$ compounds, 20:15882 (IA;RU;In Russian)
LANTHANUM BORIDES
An experimental search for high ZT semiconductors: A survey of the preparation and properties of several alloy systems, 20:15726 (R;US)
LANTHANUM CARBIDES
An experimental search for high ZT semiconductors: A survey of the preparation and properties of several alloy systems, 20:15726 (R;US)
LANTHANUM CHLORIDES
Electron paramagnetic resonance study of structural phase transformation in $Cs_2NaLaCl_6:Cd^{3+}$ crystal, 20:16098 (IA;RU;In Russian)
LANTHANUM CHROMITES
See CHROMIUM OXIDES
LANTHANUM OXIDES
LANTHANUM COMPOUNDS
See also LANTHANUM BORIDES
LANTHANUM CARBIDES
LANTHANUM CHLORIDES
LANTHANUM OXIDES
Elastic constants and magnetic susceptibility of monodomainized single crystals La_2CuO_{4+y}, 20:16020 (IA;RU;In Russian)
Electron-photon interactions in HTSC-like ceramics $LaSrAl_{1-x}Me_xO_4$ (Me = Ni^{3+}, Cu^{2+}), 20:16024 (IA;RU;In Russian)
Features of electrical properties of Ln-Ba-Cu-O and Ln-Sr-Nb-O (Ln = La, Nd, Gd, Dy, Tm, Lu) systems near by transition metal-dielectric, 20:16036 (IA;RU;In Russian)
Infrared spectra of optical phonons and conductivity of semiconducting La_2CuO_{4+x} single crystals, 20:17101 (IA;RU)
Neutron-diffraction studies of the temperature dependence of $La_2CuO_{4.1}$ superconductor's dynamics, 20:17087 (IA;RU;In Russian)
Structural phase transitions in $(La/Sn)_2CuO_4$ and their relation to superconductivity, 20:16039 (IA;RU)
LANTHANUM OXIDES
Photoconductivity in $La_2CuO_{4+\delta}$ at metamagnetic transition, 20:16014 (IA;RU;In Russian)
LAOS
Energy Investment Advisory Series No. 2. Investment opportunities in Indochina's energy sector, 20:15637 (R;US)
LARYNX
Study of air cavities influence in head and neck radiotherapy with 10 MV photon beam, 20:16610 (I;BR;In Portuguese)
LASER ISOTOPE SEPARATION
Dynamics of vibrationally exited molecules in rare gas matrix, 20:16190 (IA;JP;In Japanese)
LASER RADIATION
Spotsize measurements of a focused CW Nd:YAG laser, 20:16332 (R;US)
Two laser excitation technique to monitor plant fluorescence, 20:16529 (R;IT)
LASER SPECTROSCOPY
Smart active multiwave sensing with zero background amplitude modulated probes, 20:16176 (R;US)
LASER-PRODUCED PLASMA
Reflectivity of plasmas created by high-intensity, ultra-short laser pulses, 20:17270 (R;US)
LASERS
See also SOLID STATE LASERS
Future scientific applications for high-energy lasers, 20:16777 (R;US)
LATIR EVENT
See NUCLEAR EXPLOSIONS
UNDERGROUND EXPLOSIONS
LATTICE FIELD THEORY
New series of 3 D lattice integrable models, 20:16789 (R;RU)
LATTICES (REACTOR)
See REACTOR LATTICES
LATVIA
Energy strategies for the Baltic countries, 20:15634 (RA;DK)
Environmental policy - a Baltic perspective, 20:15659 (RA;DK)
LAWRENCE BERKELEY LABORATORY
From the lab to the marketplace: Making America's buildings more energy efficient, 20:15755 (R;US)
Radioactive and mixed waste management plan for the Lawrence Berkeley Laboratory Hazardous Waste Handling Facility, 20:15006 (R;US)
LAWRENCE LIVERMORE LABORATORY
A probabilistic risk assessment of the LLNL Plutonium Facility's evaluation basis fire operational accident. Revision 1, 20:16281 (R;US)
National strategic challenges and the role of Lawrence Livermore National Laboratory, 20:15681 (R;US)
LAWRENCE LIVERMORE NATIONAL LABORATORY
See also LAWRENCE LIVERMORE LABORATORY
A cross-cultural mentoring program, 20:15643 (R;US)
Computer-controlled radiation monitoring system, 20:16436 (R;US)
Engineering research, development and technology, 20:15680 (R;US)
LCFFC PROCESS
See COAL LIQUEFACTION
LCRE REACTOR
See EXPERIMENTAL REACTORS
LEAD
Conversion of holes into reducing species on surface modified small-particle TiO_2, 20:15775 (R;US)
Development of proposed free release criteria for Idaho National Engineering Laboratory lead, 20:16248 (R;US)
Interactions between trace metals, sodium and sorbents in combustion. Quarterly report No. 1, October 1, 1994–December 31, 1994, 20:14789 (R;US)
Pion interferometry in E814 – Toward equilibrium at the AGS, 20:16873 (R;US)
Trace element emissions. Semi-annual report, October 1994–February 1995, 20:14723 (R;US)
LEAD 206 TARGET
Measurement of neutron-induced fission cross sections for ^{206}Pb and ^{208}Pb, 20:16905 (RA;AT)

LEAD 208 TARGET
Benchmarking of multiple preequilibrium routines in GNASH, 20:16922 (R;US)
Measurement of neutron-induced fission cross sections for ^{206}Pb and ^{208}Pb, 20:16905 (RA;AT)
On the problem of bound states of pions and neutrons, 20:16914 (R;RU)
Photonuclear reactions in the GNASH code: Benchmarking model calculations for reactions on lead up to 140 MeV, 20:16923 (R;US)
Probing the ground state and transition densities of halo nuclei, 20:16880 (R;DE)
The photodissociation of ^{8}B and the solar neutrino problem, 20:16879 (R;DE)

LEAD COMPOUNDS
See also LEAD OXIDES
LEAD SELENIDES
LEAD TELLURIDES
PZT
Synthesis of novel precursors for PMN powders and the thin films obtained from them, 20:16047 (R;US)

LEAD MINERALS
See MINERALS

LEAD OXIDES
Phase stability of Tl, Pb-1223, 20:15907 (RA;US)

LEAD SELENIDES
In-situ study of layer-by-layer growth of PbSe(111) surface by specularly reflected ion spectroscopy, 20:16966 (IA;JP;In Japanese)

LEAD TELLURIDES
Internal photoeffect and elastic properties of $Pb_{0.997}Ga_{0.003}Te$, 20:16102 (IA;RU;In Russian)

LEAD ZIRCONITE TITANATE
See PZT

LED
See LIGHT EMITTING DIODES

LEED
See ELECTRON DIFFRACTION

LOW-LEVEL RADIOACTIVE WASTES
Chemical Analysis
183-H Basin Mixed Waste Analysis and Testing Report, 20:15075 (R;US)
Chemical Composition
Development of chemical profiles for U.S. Department of Energy low-level mixed wastes, 20:14952 (R;US)
Classification
Characterization of low level mixed waste at Los Alamos National Laboratory, 20:15001 (R;US)
Evaporation
183-H Basin Mixed Waste Analysis and Testing Report, 20:15075 (R;US)
Ground Disposal
Proposed plan for the Environmental Restoration Disposal Facility (ERDF) at the Hanford Site, Richland, Washington. Revision 1, 20:14978 (R;US)
Grouting
Performance assessment of grouted double-shell tank waste disposal at Hanford. Revision 1, 20:15098 (R;US)
Physical Properties
183-H Basin Mixed Waste Analysis and Testing Report, 20:15075 (R;US)
Radiation Doses
Performance assessment of grouted double-shell tank waste disposal at Hanford. Revision 1, 20:15098 (R;US)
Radioactive Waste Disposal
Estimation of natural ground water recharge for the performance assessment of a low-level waste disposal facility at the Hanford Site, 20:15017 (R;US)
Performance of cement-based seal-system components in a waste-disposal environment, 20:14962 (R;US)
TWRS tank waste pretreatment process development hot test siting report, 20:15118 (R;US)

What will we do with 104,000,000 cubic feet of Fernald waste?, 20:14985 (R;US)

Radioactive Waste Management
Interim report: Waste management facilities cost information for mixed low-level waste, 20:14984 (R;US)
Waste management facilities cost information estimating data, 20:15130 (R;US)

Radioactive Waste Processing
222-S radioactive liquid waste line replacement and 219-S secondary containment upgrade, Hanford Site, Richland, Washington, 20:14967 (R;US)
LLW solidification in cement: Effect of dilution, 20:15053 (R;US)
Long term decontamination at the Hanford Site: A case study, 20:15055 (R;US)
The modeling of contaminant flow during proposed treatment of U.S. Department of Energy low-level radioactive mixed wastes, 20:14954 (R;US)
What will we do with 104,000,000 cubic feet of Fernald waste?, 20:14985 (R;US)

Radioactive Waste Storage
222-S radioactive liquid waste line replacement and 219-S secondary containment upgrade, Hanford Site, Richland, Washington, 20:14967 (R;US)

Radioactivity
Development of radiological profiles for U.S. Department of Energy low-level mixed wastes, 20:14953 (R;US)

Solidification
Microstructural aspects of zeolite formation in alkali activated cements containing high levels of fly ash, 20:15054 (R;US)
Stabilization of inorganic mixed waste to pass the TCLP and STLC tests using clay and pH-insensitive additives, 20:15050 (R;US)

Underground Storage
Buckling analysis of an underground storage tank on the Oak Ridge Reservation, 20:16261 (R;US)
Design demonstrations for Category B tank systems piping at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 20:14972 (R;US)
Integration of remediation strategy with waste management capabilities and regulatory drivers for radioactive waste storage tanks at the Oak Ridge National Laboratory, 20:14963 (R;US)

Vitrification
TWRS tank waste pretreatment process development hot test siting report, 20:15118 (R;US)
What will we do with 104,000,000 cubic feet of Fernald waste?, 20:14985 (R;US)

LUBRICANTS
See also LUBRICATING OILS
Compatibility of refrigerants and lubricants with motor materials under retrofit conditions, 20:15778 (R;US)

LUBRICATING OILS
Development of a test method for determining elastomer tolerance of motor oils for fluorine-carbon elastomers (FKM), 20:16177 (R;DE;In German)

LUMBER INDUSTRY

MAMMARY GLANDS
A device for checking the automatic exposure control in mammography, 20:16674 (RA;AT)

MAN-MACHINE SYSTEMS
National report by Netherlands Energy Research Foundation (ECN), 20:15569 (RA;XA)

Artificial Intelligence
Enabling technologies and methods for the retro-fitting of AI software into NPPS, 20:15502 (RA;XA)

Computer Codes
Determine what requirements should be established for verification and validation of OSS software, and which techniques are available to improve V and V. Task 4.5.3, 20:15555 (RA;XA)

Design
IAEA CRP on operator support systems in nuclear power plants. 1994 national activities and task report (Task 4.2.2), 20:15568 (RA;XA)
National report from Czech Republic, 20:15557 (RA;XA)

Human Factors
Evaluation of human fitness for duty in a real working situation, 20:15506 (RA;XA)
Human factor in development and implementation of a computerized operator support system (COSS) at an operating power unit of the Novovoronezh NPP, 20:15492 (RA;XA)
The proposed human factors engineering program plan for man-machine interface system design of the next generation NPP in Korea, 20:15490 (RA;XA)

International Cooperation
Co-ordinated research programme on operator support systems in nuclear power plants. Working material. Report of a research co-ordinated meeting held in Rome, 10-14 October 1994, 20:15548 (R;XA)
Operating procedures for nuclear power plants and their presentation. Working material. Proceedings of a specialists meeting held in Vienna, 31 March - 2 April 1992, 20:15527 (R;XA)
Recent advancement in the area of Man-Machine Interface, 20:15547 (RA;XA)
Situation for plant procedures among the members of the WANO-Paris Centre, 20:15528 (RA;XA)

Modifications
Improving CANDU annunciation - Current R and D and future directions, 20:15495 (RA;XA)
National report from Romania (Operator support systems.), 20:15552 (RA;XA)

Optimization
Optimization of advanced plants operation: The Escrime project, 20:15486 (RA;XA)

Reactor Operators
Develop guidance on how the end user should be involved in the development of OSS. Reflection on Task 4.3.3, 20:15565 (RA;XA)

Reviews
National report from Norway (Operator support systems.), 20:15551 (RA;XA)
Task leaders reports, 20:15550 (RA;XA)

Safety
National report from Romania (Operator support systems.), 20:15552 (RA;XA)

Technology Transfer
IAEA activity on operator support systems in nuclear power plants, 20:17442 (RA;XA)

MANGANESE ALLOYS
Void swelling of pure copper, Cu-5Ni and Cu-5Mn alloys irradiated with fast neutrons, 20:17224 (RA;US)

MANGANESE CARBONATES
Hot coal gas desulfurization with manganese based sorbents. Quarterly report, June–September 1994, 20:14722 (R;US)

MANGANESE COMPOUNDS
See also MANGANESE CARBONATES
MANGANESE OXIDES
Magnetic excitations in a random exchange system $Fe_xMn_{1-x}TiO_3$, 20:16963 (R;US)

MANGANESE OXIDES
Hot coal gas desulfurization with manganese based sorbents. Quarterly report, June–September 1994, 20:14722 (R;US)

MANIPULATORS
Decontamination of surfaces by blasting with crystals of H_2O and CO_2, 20:15179 (R;US)
Development of a super-redundant multijoint manipulator for maintenance of nuclear reactors, 20:15475 (IA;JP)

MANNOSE
Solvent vapor sensor & bolus detector for radiosynthesis, 20:16224 (RA;US)

MANUFACTURING
See also COMPUTER-AIDED MANUFACTURING
Evaluation and analysis survey on new energy introduction. 3, 20:15285 (R;JP;In Japanese)

MANUFACTURING FACILITIES

Solar cell array design method for preventing power reduction due to module output fluctuation, 20:15287 (R;JP;In Japanese)
MOESSBAUER EFFECT
In-beam Moessbauer spectroscopy on solid state physics, 20:16978 (RA;JP)
Moessbauer spectroscopy by short lived nuclide, 20:16984 (RA;JP;In Japanese)
MOESSBAUER SPECTROMETERS
Moessbauer spectrometer on PC-AT, 20:16410 (IA;CZ;In Czech)
MOLDS (CASTING)
See CASTING MOLDS
MOLECULAR BIOLOGY
Summaries of fiscal year 1994 projects in medical applications and biophysical research, 20:16664 (R;US)
MOLECULAR IONS
Dissociation of MeV HeH^+ ions at glancing angle incidence on a clean surface of single crystal, 20:17004 (IA;JP;In Japanese)
MOLECULAR ORBITAL MODEL
See ATOMIC MODELS
MOLECULES
MOLECULE COLLISIONS
International bulletin on atomic and molecular data for fusion. No. 48, 20:16942 (I;XA)
MOLECULES
Ultrasensitive fluorescence detection and photophysics in microdroplets, 20:16128 (R;US)
MOLLUSCS
Concentration parameters for radionuclides by marine molluscs, 20:16683 (RA;JP;In Japanese)
MOLTEN SALT COOLANTS
See MOLTEN SALTS
MOLTEN SALT WASTE GASIFICATION PROCESS
Expedited demonstration of molten salt mixed waste treatment technology. Final report, 20:15047 (R;US)

MOLTEN SALTS
Expedited demonstration of molten salt mixed waste treatment technology. Final report, 20:15047 (R;US)
Results of molten salt panel and component experiments for solar central receivers: Cold fill, freeze/thaw, thermal cycling and shock, and instrumentation tests, 20:15304 (R;US)
MOLYBDATES
Magnetic phase transformations in chain Ising's antiferromagnetic $CrEr(MoO_4)_2$, 20:16029 (IA;RU;In Russian)
Magnetic properties of dipole magnetic $CsGd(MoO_4)_2$ at low temperatures, 20:16019 (IA;RU;In Russian)
Structural phase transition in $KEr(MoO_4)_2$, induced by external magnetic field, 20:16026 (IA;RU;In Russian)
MOLYBDENUM
Catalytic multi-stage liquefaction of coal. Final eighth quarterly report, 1 July 1994–30 September 1994, 20:14737 (R;US)
Catalytic multi-stage liquefaction of coal. Sixth quarterly report, 1 January 1994–31 March 1994, 20:14736 (R;US)
Microbial recovery of metals from spent coal liquefaction catalysts. Quarterly report, January–March, 1992, 20:14753 (R;US)
Microbial recovery of metals from spent coal liquefaction catalysts. Quarterly report, April–June, 1992, 20:14754 (R;US)
MOLYBDENUM ALLOYS
Electron-topological transition in Mo-Re, Mo-Re-Nb systems and its effect on $T_k(c)$ dependence, 20:15851 (IA;RU;In Russian)
Logarithmic relaxation of electric conductivity and phase transitions in now cluster chalcohenides $Re_{4-x}Mo_xS_4Te_4$, 20:15873 (IA;RU;In Russian)
Phase states and transitions in flux lattice in superconducting films, 20:17099 (IA;RU)
MOLYBDENUM FLUORIDES
Synthesis of graphite intercalation compound of group VI metals and uranium hexafluorides, 20:16187 (IA;JP;In Japanese)
MOLYBDENUM SILICIDES
Processing and characterization of nanocrystalline molybdenum disilicide ($MoSi_2$) consolidated by hot isostatic pressing (HIP), 20:15923 (R;US)
MOLYBDENUM SULFIDES
The economical production of alcohol fuels from coal-derived synthesis gas. Quarterly technical progress report number 13, October 1–December 31, 1994, 20:15272 (R;US)
MONIQUE EVENT

Accelerators
Determination of the $^{60}Ni(n,2n)^{59}Ni$ cross section using accelerator mass spectroscopy, 20:16890 (RA;AT)

Cobalt 60
Measurement of the $^{60}Ni(n,p)^{60}Co$ cross section in the neutron energy range 6-13 MeV, 20:16894 (RA;AT)

Compiled Data
A survey of selected neutron-activation reactions with short-lived products of importance to fusion reactor technology, 20:16887 (R;XA)

Cross Sections
A survey of selected neutron-activation reactions with short-lived products of importance to fusion reactor technology, 20:16887 (R;XA)
Determination of the $^{60}Ni(n,2n)^{59}Ni$ cross section using accelerator mass spectroscopy, 20:16890 (RA;AT)
Measurement of neutron-induced fission cross sections for ^{206}Pb and ^{208}Pb, 20:16892 (RA;AT)
Measurement of the $^{23}Na(n,2n)^{22}Na$ cross section at E_n=19.45 MeV and re-evaluation of the $^{23}Na(n,2n)^{22}Na$ excitation function, 20:16896 (RA;AT)
Measurement of the $^{60}Ni(n,p)^{60}Co$ cross section in the neutron energy range 6-13 MeV, 20:16894 (RA;AT)
Measurement of the activation cross section for the reaction $^{93}Nb(n,n')^{93m}Nb$ in the energy range 6-9 MeV, 20:16903 (RA;AT)
Prerequisites for accurate activation cross-section measurements, 20:16907 (RA;AT)
The $^{238}U(n,f)$ cross section and its ratio to the $^{27}Al(n,\alpha)^{24}Na$ and $^{56}Fe(n,p)^{56}Mn$ cross section in the 14 MeV region, 20:16906 (RA;AT)
The $^{238}U(n,f)$ cross section and its ratio to the $^{27}Al(n,\alpha)^{24}Na$ and $^{56}Fe(n,p)^{56}Mn$ cross section in the 14 MeV region, 20:16893 (RA;AT)

Excitation Functions
Measurement of the $^{23}Na(n,2n)^{22}Na$ cross section at E_n=19.45 MeV and re-evaluation of the $^{23}Na(n,2n)^{22}Na$ excitation function, 20:16896 (RA;AT)

Fission
Measurement of neutron-induced fission cross sections for ^{206}Pb and ^{208}Pb, 20:16892 (RA;AT)

Inelastic Scattering
Inelastic neutron spectra and cross sections for ^{238} U, 20:16877 (R;RU;In Russian, English)

Interstitial Helium Generation
Improvement of measurements, theoretical computations and evaluations of neutron induced helium production cross sections. Summary report of the second research co-ordination meeting held in Beijing, China, from 1 to 4 November 1994, 20:16886 (R;XA)

Lead Isotopes
Investigation of $(n,xn\gamma)$ reactions on lead isotopes for neutron energies up to 100 MeV, 20:16904 (RA;AT)

Mass Spectroscopy
Determination of the $^{60}Ni(n,2n)^{59}Ni$ cross section using accelerator mass spectroscopy, 20:16890 (RA;AT)

Mev Range 10-100
Investigation of $(n,xn\gamma)$ reactions on lead isotopes for neutron energies up to 100 MeV, 20:16904 (RA;AT)

Monte Carlo Method
Homogeneous critical Monte Carlo eigenvalue calculations with revised ENDF/B-VI data sets, 20:16924 (R;US)

Neutrons
Measurement of neutron-induced fission cross sections for ^{206}Pb and ^{208}Pb, 20:16892 (RA;AT)

Nickel 60
Measurement of the $^{60}Ni(n,p)^{60}Co$ cross section in the neutron energy range 6-13 MeV, 20:16894 (RA;AT)

Niobium 93
Measurement of the activation cross section for the reaction $^{93}Nb(n,n')^{93m}Nb$ in the energy range 6-9 MeV, 20:16903 (RA;AT)

Nuclear Data Collections
Index to BROND-2, CENDL-2, ENDF/B-6, JEF-2, JENDL-3, IRDF, 20:17411 (R;XA)
The processed neutron activation cross-section data files of the FENDL project. Summary documentation, 20:16884 (R;XA)

Uranium 238
The $^{238}U(n,f)$ cross section and its ratio to the $^{27}Al(n,\alpha)^{24}Na$ and $^{56}Fe(n,p)^{56}Mn$ cross section in the 14 MeV region, 20:16906 (RA;AT)
The $^{238}U(n,f)$ cross section and its ratio to the $^{27}Al(n,\alpha)^{24}Na$ and $^{56}Fe(n,p)^{56}Mn$ cross section in the 14 MeV region, 20:16893 (RA;AT)

Niagara Falls Wastewater Treatment Plant outfall hydropower feasibility study. Final report, 20:15278 (R;US)

NEW ZEALAND
Isotopic and chemical composition of waters and gases from the east coast accretionary prism, New Zealand, 20:15326 (RA;XA)

NEWTON METHOD
Improved numerical algorithm for Newton's minimization of χ^2 functionals, 20:17347 (R;RU)

NICKEL
Advanced technologies for decontamination and conversion of scrap metals, 20:14970 (R;US)
Contaminated nickel scrap processing, 20:15011 (R;US)
Experimental studies on the plasma-driven permeation of deuterium through nickel under plasmas, 20:17169 (IA;JP;In Japanese)
Microbial recovery of metals from spent coal liquefaction catalysts. Quarterly report, January–March, 1992, 20:14753 (R;US)
Microbial recovery of metals from spent coal liquefaction catalysts. Quarterly report, April–June, 1992, 20:14754 (R;US)
NaK pool-boiler solar receiver durability bench test. Volume 2, Metallurgical analysis, 20:15305 (R;US)
Obserbations of hydrogen traps produced in nickel bombarded with helium-3, helium-4 and hydrogen ions, 20:16964 (IA;JP;In Japanese)

NICKEL 58
Detailed study of uncertainties and correlations in the neutron nuclear data of ^{52}Cr, ^{56}Fe, ^{58}Ni and ^{60}Ni for the European fusion file, 20:16899 (RA;AT)
Detailed study of uncertainties and correlations in the neutron nuclear data of ^{52}Cr, ^{56}Fe, ^{58}Ni and ^{60}Ni for the European Fusion File, 20:16910 (RA;AT)
Evaluation of 14 MeV cross sections for the main isotopes of the structural materials Cr, Fe and Ni, 20:16900 (RA;AT)
Recovery of enriched stable isotopes in radionuclide production, 20:16127 (RA;US)

NICKEL 58 TARGET
Activation cross-section measurements for the reactions $^{58}Ni(n,p)^{58}Co$ and $^{93}Nb(n,2n)^{92m}Nb$ in the 5-13 MeV energy region, 20:16895 (RA;AT)
Study of heavy ion collisions $^{58}Ni + ^{24}Mg$ and $^{79}Br + ^{27}Al$ at 11 MeV/nucleon, 20:16875 (R;US)

NICKEL 60
Detailed study of uncertainties and correlations in the neutron nuclear data of ^{52}Cr, ^{56}Fe, ^{58}Ni and ^{60}Ni for the European fusion file, 20:16899 (RA;AT)
Detailed study of uncertainties and correlations in the neutron nuclear data of ^{52}Cr, ^{56}Fe, ^{58}Ni and ^{60}Ni for the European Fusion File, 20:16910 (RA;AT)
Evaluation of 14 MeV cross sections for the main isotopes of the structural materials Cr, Fe and Ni, 20:16900 (RA;AT)

NICKEL ALLOYS
See also NICKEL BASE ALLOYS
Effect of nearest surrounding on the formation of intervalent state in Ce-Ni compounds, 20:15872 (IA;RU;In Russian)
Fluctuation damping of magnons in ferromagnetic metals, 20:15874 (IA;RU;In Russian)
Influence of nickel and beryllium content on swelling of copper irradiated in COBRA-1A, 20:17225 (RA;US)
Transformation of excitation spectra of 4f electrons in $Ce_{1-x}La_xNi$ compounds, 20:15882 (IA;RU;In Russian)
Void swelling of pure copper, Cu-5Ni and Cu-5Mn alloys irradiated with fast neutrons, 20:17224 (RA;US)

NICKEL BASE ALLOYS
Allison engine testing CMSX-4® single crystal turbine blades and vanes, 20:15803 (R;US)
Residual stresses and stress corrosion cracking in pipe fittings, 20:15391 (R;US)

NICKEL COMPOUNDS
See also NICKEL SILICIDES
Anisotropic magnetization of $HoNi_2B_2C$, 20:15921 (R;US)
Determination of site-occupancies in aluminide intermetallics by ALCHEMI, 20:15820 (R;US)

NICKEL SILICIDES
Angular dependence of the neutral fraction of medium-energy hydrogen emerging from $NiSi_2(111)$,, 20:16999 (IA;JP;In Japanese)

NIOBATES
Features of electrical properties of Ln-Ba-Cu-O and Ln-Sr-Nb-O (Ln = La, Nd, Gd, Dy, Tm, Lu) systems near by transition metal-dielectric, 20:16036 (IA;RU;In Russian)
Synthesis of novel precursors for PMN powders and the thin films obtained from them, 20:16047 (R;US)

NIOBIUM
Effect of electron-phonon interaction on the conductivity of Nb thin films, 20:15877 (IA;RU;In Russian)
Influence of twins and dislocations on critical current and pinning force in single crystal niobium, 20:15861 (IA;RU;In Russian)
Investigation of the behaviour of superconducting Nb in a magnetic field by the polarized neutron transmission technique, 20:17048 (IA;RU;In Russian)
Nonequilibrium phenomena is superconducting two-barrier Nb/Nb'/Nb, 20:15855 (IA;RU;In Russian)

NIOBIUM 93 TARGET
Activation cross-section measurements for the reactions $^{58}Ni(n,p)^{58}Co$ and $^{93}Nb(n,2n)^{92m}Nb$ in the 5-13 MeV energy region, 20:16895 (RA;AT)
Update of the evaluation of the cross sections for the neutron-dosimetry reactions $^{19}F(n,2n)^{18}F$ and $^{93}Nb(n,2n)^{92m}Nb$, 20:16908 (RA;AT)

NIOBIUM ALLOYS
See also NIOBIUM BASE ALLOYS
Creep of a fine-grained, fully-lamellar, two-phase TiAl alloy at 760°C, 20:15898 (R;US)
Electron-topological transition in Mo-Re, Mo-Re-Nb systems and its effect on $T_k(c)$ dependence, 20:15851 (IA;RU;In Russian)
Phase states and transitions in flux lattice in superconducting films, 20:17099 (IA;RU)
Unfluence of head treatment conditions on pinning force in Nb-22Ta-37Ti superconductor, 20:15862 (IA;RU;In Russian)

NIOBIUM BASE ALLOYS
Effects of temperature ramp rate during heat treatment on hysteresis loss and critical current density of internal tin processed wires, 20:17025 (R;US)

NIOBIUM CARBIDES
Study of electron-phonon interaction duration in NbC films, 20:16033 (IA;RU;In Russian)

NIOBIUM OXIDES
The absence of Abrikosov vortex state transition in two-dimensional type-ii superconductors with weak pinning effect, 20:17081 (IA;RU;In Russian)

NITRATES
See also PLUTONIUM NITRATES
URANIUM NITRATES
Testing of a benchscale Reverse Osmosis/Coupled Transport system for treating contaminated groundwater, 20:16567 (R;US)

NITRIC OXIDE
Alternative catalyst and exhaust gas sensor work at Argonne National Laboratory, 20:15810 (R;US)
Direct catalytic decomposition of nitric oxide. Quarterly technical progress report No. 13, October–December 1994, 20:14758 (R;US)
Enhanced NO_x removal in wet scrubbers using metal chelates. Final report, Volume 1, 20:14755 (R;US)

NITRO COMPOUNDS
Synthesis of 3,3-dinitroazetidine, 20:16463 (PA;US)

NITROGEN
Determination of light elements in materials using the coincidence method, 20:16144 (IA;CZ;In Czech)
Impurity-stabilized solid helium, 20:17135 (IA;RU;In Russian)
Modelling of nitric acid production in the Advanced Cold Process Canister due to irradiation of moist air, 20:16206 (R;SE)

NITROGEN 12
New β-emitting probe ^{12}N ($I^{\pi}=1^+$, $T_{1/2}=11$ ms), for studying electric field gradient in solids and a measurement of its quadrupole moment, 20:16982 (RA;JP)

NITROGEN 13
^3He RFQ for PET isotope production: A UW/SAIC progress report, 20:16338 (RA;US)
A novel solid graphite target for the production of ^{13}N-ammonia, 20:16213 (RA;US)
An experimental carbon/steam stack target for in-situ production of [^{13}N]ammonia with low energy deuterons, 20:16218 (RA;US)
An ultra-compact ^{13}N-ammonia generator, 20:16339 (RA;US)
Experiences with a new high pressure water target for the production of [^{13}N] ammonia, 20:16215 (RA;US)
Overview on ammonia production, 20:16212 (RA;US)
Production of N-13 ammonia using a solid graphite target and the ^{12}C (d,n) ^{13}N nuclear reaction, 20:16214 (RA;US)
RF linacs for radioisotope production, 20:16337 (RA;US)
Superconducting cyclotron for clinical PET, 20:16341 (RA;US)
Utilization of the CS-30 cyclotron at the Duke University Medical Center, 20:16234 (RA;US)
[^{13}N]ammonia production via deuteron irradiation of buckminsterfullerene, 20:16217 (RA;US)

NITROGEN COMPOUNDS

NORTH SEA

Ashes
Transitional Palaeocene-Eocene ash bearing diatomite in the eastern North Sea, 20:16722 (R;DK)

Diatoms
Paleogene radiolaria and diatoms from three exploration wells from the Central Graben, North Sea (Danish Sector): stratigraphic and palaeoenvironmental significance, 20:16726 (R;DK)

Dinoflagellate
Neogene and Quaternary dinoflagellate cyst biostratigraphy and paleoclimatology of the Karl-1 borehole, Central Trough in the Danish North Sea area, 20:16732 (R;DK)

Foraminifera
Correlation of Miocene North Sea sequences with the Danish land area based on foraminifera, 20:16730 (R;DK)
Foraminiferal biostratigraphy of the post mid-Miocene in the Danish Central Trough, North Sea, 20:16735 (R;DK)
Foraminiferal biostratigraphy of the post mid-Miocene in two boreholes in the Danish North Sea, 20:16734 (R;DK)
Numerical biostratigraphy and depositional environments: benthic microfaunas in the Tertiary (Neogene) clastic sequence, Danish North Sea, 20:16736 (R;DK)
Seismic stratigraphy and foraminiferal biofacies in a profile into the Central Trough, North Sea, 20:14804 (R;DK)

Geologic Deposits
Palaeocene/Eocene diatomite in wells in the eastern North Sea, 20:14806 (R;DK)

Geologic Strata
Late Cenozoic sequences in the Southern North Sea Basin, 20:14805 (R;DK)

Lithology
Transitional Palaeocene-Eocene ash bearing diatomite in the eastern North Sea, 20:16722 (R;DK)

Mapping
Seismic sequence stratigraphy of the Tertiary in the Danish North Sea. Incl. 7 structural maps of the main sequences, and 35 isochore maps of main sequences and smaller units, 20:16718 (R;DK)

Petrogenesis
Introduction to the project and a summary of the results, 20:14803 (R;DK;In Danish)

Stratigraphy
Cenozoic sequence stratigraphy in the eastern North Sea, 20:16715 (R;DK)
Correlation of Miocene North Sea sequences with the Danish land area based on foraminifera, 20:16730 (R;DK)
Foraminiferal biostratigraphy of the post mid-Miocene in the Danish Central Trough, North Sea, 20:16735 (R;DK)
Foraminiferal biostratigraphy of the post mid-Miocene in two boreholes in the Danish North Sea, 20:16734 (R;DK)
Neogene and Quaternary dinoflagellate cyst biostratigraphy and paleoclimatology of the Karl-1 borehole, Central Trough in the Danish North Sea area, 20:16732 (R;DK)
Numerical biostratigraphy and depositional environments: benthic microfaunas in the Tertiary (Neogene) clastic sequence, Danish North Sea, 20:16736 (R;DK)
Occurrence of major sequence stratigraphic boundaries in relation to basin development in Cenozoic deposits of the southeastern North Sea, 20:16716 (R;DK)
Oligocene sequence stratigraphy and basin development in the Danish North Sea sector based on log interpretation, 20:16720 (R;DK)
Paleogene radiolaria and diatoms from three exploration wells from the Central Graben, North Sea (Danish Sector): stratigraphic and palaeoenvironmental significance, 20:16726 (R;DK)
Seismic sequence stratigraphy of the Tertiary in the Danish North Sea. Incl. 7 structural maps of the main sequences, and 35 isochore maps of main sequences and smaller units, 20:16718 (R;DK)
Seismic stratigraphy and foraminiferal biofacies in a profile into the Central Trough, North Sea, 20:14804 (R;DK)
Sequence and systems tract interpretation of the epicontinental Oligocene deposists in the Danish North Sea sector, 20:16719 (R;DK)
Stratigraphic correlation of the Danish onshore and offshore Tertiary successions based on sequence stratigraphy, 20:16717 (R;DK)
Stratigraphical correlation of late Paleocene sand deposits in the Soegne Basin and adjacent areas, Central North Sea, 20:16721 (R;DK)

Guidelines for the verification and validation of expert system software and conventional software: Evaluation of knowledge base certification methods. Volume 4, 20:15575 (R;US)
Guidelines for the verification and validation of expert system software and conventional software: Survey and documentation of expert system verification and validation methodologies. Volume 3, 20:15574 (R;US)
Guidelines for the verification and validation of expert system software and conventional software: Bibliography. Volume 8, 20:15579 (R;US)
Guidelines for the verification and validation of expert system software and conventional software: User's manual. Volume 7, 20:15578 (R;US)
Guidelines for the verification and validation of expert system software and conventional software: Rationale and description of V&V guideline packages and procedures. Volume 5, 20:15576 (R;US)
Guidelines for the verification and validation of expert system software and conventional software: Survey and assessment of conventional software verification and validation methods. Volume 2, 20:15573 (R;US)
Guidelines for the verification and validation of expert system software and conventional software: Project summary. Volume 1, 20:15572 (R;US)
Guidelines for the verification and validation of expert system software and conventional software: Validation scenarios. Volume 6, 20:15577 (R;US)

Failure Mode Analysis
Fault tree and failure mode and effects analysis of a digital safety function, 20:15562 (RA;XA)

Failures
Brief summary of incident reporting system events with procedural deficiencies, 20:15530 (RA;XA)

Embalse NGS: Abnormal event procedures development lifecycle, 20:15532 (RA;XA)

Fault Tree Analysis
Fault tree and failure mode and effects analysis of a digital safety function, 20:15562 (RA;XA)

Information Systems
Contribution of qualitative analysis and fuzzy sets to industrial process fault diagnosis: Application to the DIAPASON project, 20:15500 (RA;XA)
The current status of the operator support systems. The Russian Federation, 20:15553 (RA;XA)

Knowledge Base
A qualitative model construction method of nuclear power plants for effective diagnostic knowledge generation, 20:15473 (IA;JP)

Licensing Regulations
Assessment of the NRC Enforcement Program, 20:15457 (R;US)

Man-Machine Systems
1994 report on Tasks 4.3.1 and 4.3.2: Survey of anticipated requirements and qualification requirements for OSS, 20:15566 (RA;XA)
Co-ordinated research programme on operator support systems in nuclear power plants. Working material. Report of a research co-ordinated meeting held in Rome, 10-14 October 1994, 20:15548 (R;XA)
Formal methods in design and verification of functional specifications, 20:15560 (RA;XA)
Nuclear power plant control and instrumentation activities in Argentina during 1989-1991, 20:15509 (RA;XA)
Operating procedures for nuclear power plants and their presentation. Working material. Proceedings of a specialists meeting held in Vienna, 31 March - 2 April 1992, 20:15527 (R;XA)
Recent advancement in the area of Man-Machine Interface, 20:15547 (RA;XA)

Occupational Exposure
Use of radiation and radiation practices in 1993. Events and statistics, 20:16701 (R;FI)

Pipes
Analytical considerations in the code qualification of piping systems, 20:15477 (R;US)
Assessment of short through-wall circumferential cracks in pipes. Experiments and analysis: March 1990–December 1994, 20:15606 (R;US)
Flexible piping design: A case study, 20:15463 (R;US)
Piping benchmark problems for advanced reactor standardized designs, 20:15454 (R;US)
Refinement and evaluation of crack-opening-area analyses for circumferential through-wall cracks in pipes, 20:15607 (R;US)

Pressure Vessels
Heavy-section steel irradiation program. Volume 4, No. 2. Semiannual progress report, April 1993–September 1993, 20:15404 (R;US)
Validation of favor code linear elastic fracture solutions for finite-length flaw geometries, 20:15464 (R;US)

Quality Assurance
Operating procedures within the quality assurance programme, 20:15537 (RA;XA)

Reactor Accidents
Safety aspects and human factors in emergency procedure analysis: A survey of GRS activities, 20:15531 (RA;XA)

Reactor Control Systems
Instrumentation and control activities at the Electric Power Research Institute to support operator support systems, 20:15554 (RA;XA)

Reactor Instrumentation
Instrumentation and control activities at the Electric Power Research Institute to support operator support systems, 20:15554 (RA;XA)
Nuclear power plant control and instrumentation activities in Argentina during 1989-1991, 20:15509 (RA;XA)

Reactor Operators
Alertness, performance and off-duty sleep on 8-hour and 12-hour night shifts in a simulated continuous operations control room setting, 20:15571 (R;US)

Reactor Safety
Operating procedures within the quality assurance programme, 20:15537 (RA;XA)
Safety aspects and human factors in emergency procedure analysis: A survey of GRS activities, 20:15531 (RA;XA)

Relays
An assessment of fire vulnerability for aged electrical relays, 20:15605 (R;US)

Safety
Procedures development: Common deficiencies and possible solutions, 20:15538 (RA;XA)

OIL SHALE WASTE WATER
See OIL SHALES
WASTE WATER

OIL SHALES
Combustion of municipal solid wastes with oil shale in a circulating fluidized bed. Second quarterly report ending March 31, 1995, 20:15250 (R;US)

OIL WELLS
Application of reservoir characterization and advanced technology to improve recovery and economics in a lower quality shallow shelf carbonate reservoir. Fourth quarterly technical progress report, [October 1, 1994–December 31, 1994], 20:14833 (R;US)
Assist in the recovery of bypassed oil from reservoirs in the Gulf of Mexico. Quarterly status report (final), October 1–December 31, 1994, 20:14817 (R;US)
Evaluation of the freeze-thaw/evaporation process for the treatment of produced waters. Quarterly technical progress report, October 1–December 31, 1994, 20:14865 (R;US)
Green River Formation Water Flood Demonstration Project, Uinta Basin, Utah. Quarterly technical progress report, October 1, 1994–December 31, 1994, 20:14826 (R;US)
Gypsy Field Project in reservoir characterization. Revision, Second quarterly report, [October 1, 1994–December 31, 1994], 20:14800 (R;US)
HT/HP operations. Challenges in planning, drilling and testing HPHT wells, 20:14839 (R;NO)
Improved recovery demonstration for Williston Basin carbonates. Quarterly report, October 1, 1994–December 31, 1994, 20:14832 (R;US)
Method for cutting steam heat losses during cyclic steam injection of wells. Fifth quarterly report, 20:14834 (R;US)
Post waterflood CO_2 miscible flood in light oil, fluvial-dominated deltaic reservoir. FY 1993 annual report, 20:14827 (R;US)
Recovery of bypassed oil in the Dundee Formation using horizontal drains. Quarterly report, October 1994–December 1994. 1st Quarter, FY 1995, 20:14831 (R;US)
Responsive copolymers for enhanced petroleum recovery. Quarterly technical progress report, September 11, 1994–December 22, 1994, 20:14821 (R;US)
Scale-up miscible flood processes for heterogeneous reservoirs. Quarterly report, 1 October–31 December 1994, 20:14820 (R;US)
Visual display of reservoir parameters affecting enhanced oil recovery, 20:14824 (R;US)

OKLAHOMA
A study of the source material, and mechanisms of generation, and migration of oils in the Anadarko Basin, Oklahoma.

Progress report, September 1, 1986–August 31, 1987, 20:14802 (R;US)
Gypsy Field Project in reservoir characterization. Revision, Second quarterly report, [October 1, 1994–December 31, 1994], 20:14800 (R;US)
Identification and evaluation of fluvial-dominated deltaic (Class 1 oil) reservoirs in Oklahoma. Yearly technical progress report, January 1–December 31, 1993, 20:14825 (R;US)

RADIOACTIVE WASTES
An expert system for enhancing compliance with hazardous materials packaging and transportation regulations, 20:15646 (R;US)
Control of radioactive material pneumatic transport system using an inexpensive programmable logic controller, 20:16369 (RA;US)

Criticality safety considerations for low-level-waste facilities, 20:16259 (R;US)
Effects of mixed waste simulants on transportation packaging plastic components, 20:16272 (R;US)
Operating and maintenance instructions for the Hedgehog sample package (A DOT 7A Type A Package), 20:16284 (R;US)
Packaging and transportation of radioactive liquid at the U.S. Department of Energy Hanford Site, 20:14938 (R;US)
Potential impacts of pending residual radioactivity rules, 20:14987 (R;US)
Radiological accidents potentially important to human health risk in the U.S. Department of Energy waste management program, 20:15160 (R;US)
Safety regulations of radiation sources in industry in the Philippines, 20:15217 (R;PH)
Sensitivity analysis for RADTRAN 4 input parameters, 20:16700 (R;US)
Statement concerning the transport of radioactive materials during the year 1994, 20:15216 (R;DK;In Danish)
Summary of needs assessment for long-term planning of DOE's transportation and packaging activities, 20:14919 (R;US)

RADIOACTIVE PARTICULATES
See PARTICLES
RADIOACTIVE AEROSOLS

RADIOACTIVE WASTE DISPOSAL
Clean salt disposition options, 20:15102 (R;US)

Bentonite
Literature study on the microstructure of bentonite and its effect on diffusion, 20:15134 (R;FI)

Closures
Performance of cement-based seal-system components in a waste-disposal environment, 20:14962 (R;US)

Colloids
The characterization methods for colloids in aqueous solutions, 20:16196 (R;FI;In Finnish)

Control Systems
Control system troubleshooting guide for the 300 area treated effluent disposal facility, 20:15061 (R;US)

Diffusion
The effect of thickness in the through-diffusion experiment, 20:16566 (R;FI)

Environmental Exposure Pathway
WELL-94: a stylized well scenario for indicative dose assessment of deep repositories, 20:16596 (R;FI)

Environmental Impacts
Limited field investigation report for the 100-HR-2 Operable Unit, 20:15174 (R;US)
Performance assessment of grouted double-shell tank waste disposal at Hanford. Revision 1, 20:15098 (R;US)

Fracture Mechanics
3-dimensional model of fracture zones of Palmottu study site, 20:16533 (RA;FI)

Geologic Surveys
The Palmottu analogue project: overview for 1993, 20:16532 (RA;FI)

Ground Water
Groundwater flow analyses in preliminary site investigations. Modelling strategy and computer codes, 20:16594 (R;FI)
Humic substances in groundwater, 20:16535 (RA;FI)
Modeling flow in fractured medium. Uncertainty analysis with stochastic continuum approach, 20:16593 (R;FI)
Numerical study on the effects of the alternative structure geometries on the groundwater flow at the Romuvaara site, 20:16595 (R;FI)
Redox chemistry of uranium in groundwater of Palmottu uranium deposit, Finland, 20:16534 (RA;FI)
The Palmottu analogue project: overview for 1993, 20:16532 (RA;FI)
The speciation of dissolved elements in aquatic solution. Radium and actinides, 20:16565 (R;FI;In Finnish)

Hot Atom Chemistry
Hot atom chemistry and radwaste disposal, 20:16246 (RA;JP)

Hydraulic Conductivity
Hydraulic measurements at Palmottu in 1994, 20:16583 (R;FI;In Finnish)

Materials Testing
Validation of a numerical release model (REPCOM) for the finnish operating waste disposal systems. Part VI: Intermediate results from the laboratory measurements 1986-1993, 20:15132 (R;FI)

Natural Analogue
The Palmottu Analogue Project, Progress Report 1993. The behaviour of natural radionuclides in and around uranium deposits, Nr. 7, 20:16531 (R;FI)

Planning
Application of best available science to the regulatory process: The case of environmental regulations. Final technical report, February 1990–January 1993, 20:14968 (R;US)

Pollution Regulations
Plan and schedule for disposition and regulatory compliance for miscellaneous streams. Revision 1, 20:14976 (R;US)

Quality Assurance
200 Area Treated Effluent Disposal Facility Quality Assurance Project Plan, 20:15065 (R;US)

Radionuclide Migration
Modelling prospects for in situ matrix diffusion at Palmottu natural analogue site, SW Finland, 20:16538 (RA;FI)
Selective extractions in uranium migration studies - Findings from a natural analogue study at Palmottu, 20:16537 (RA;FI)
The Palmottu Analogue Project, Progress Report 1993. The behaviour of natural radionuclides in and around uranium deposits, Nr. 7, 20:16531 (R;FI)
The international INTRAVAL project. Summary and conclusions by the TVO/VTT Team, 20:16572 (R;FI)
Validation of a numerical release model (REPCOM) for the finnish operating waste disposal systems. Part VI: Intermediate results from the laboratory measurements 1986-1993, 20:15132 (R;FI)

Remedial Action
Limited field investigation report for the 100-BC-2 Operable Unit, 20:15173 (R;US)

Risk Assessment
Performance assessment of grouted double-shell tank waste disposal at Hanford. Revision 1, 20:15098 (R;US)

Safeguards
Proliferation resistance criteria for fissile material disposition, 20:15209 (R;US)

Safety
Application of the RES methodology for identifying features, events and processes (FEPs) for near-field analysis of copper-steel canister, 20:15133 (R;FI)
Preparation of safety analysis reports (SARs) for near surface radioactive waste disposal facilities. Format and content of SARs, 20:14992 (R;XA)

Safety Reports
Preparation of safety analysis reports (SARs) for near surface radioactive waste disposal facilities. Format and content of SARs, 20:14992 (R;XA)

Site Characterization
Yucca Mountain Site Characterization Project Bibliography, January–June 1993. An update: Supplement 4, Addendum 1, 20:14973 (R;US)

Surface Waters
Uranium in surficial deposits and waters at Palmottu, 20:16582 (RA;FI)

Uraninites
Uraninite and its alternation at Palmottu - A possible natural analogue for spent fuel under reducing conditions, 20:16536 (RA;FI)

RADIOACTIVE WASTE FACILITIES

WIPP

Cathodic Protection
Cathodic protection acceptance test procedure, 20:15077 (R;US)

Chemical Analysis
Compatibility Grab Sampling and Analysis Plan, 20:15126 (R;US)

Construction
Field site investigation: Effect of mine seismicity on groundwater hydrology, 20:15008 (R;US)
Containment Systems
222-S radioactive liquid waste line replacement and 219-S secondary containment upgrade, Hanford Site, Richland, Washington, 20:14967 (R;US)
Demonstration Programs
Argonne-West facility requirements for a radioactive waste treatment demonstration, 20:14955 (R;US)
Design
Design Reconstitution Program Plan and procedures for K Basins, 20:15067 (R;US)
The Mixed Waste Management Facility monthly report for November 1994, 20:15046 (R;US)
Environmental Impact Statements
Development of chemical profiles for U.S. Department of Energy low-level mixed wastes, 20:14952 (R;US)
Development of radiological profiles for U.S. Department of Energy low-level mixed wastes, 20:14953 (R;US)
The modeling of contaminant flow during proposed treatment of U.S. Department of Energy low-level radioactive mixed wastes, 20:14954 (R;US)
Environmental Impacts
Waste Characterization Facility at the Idaho National Engineering Laboratory. Environmental Assessment, 20:14966 (R;US)
Excavation
Field site investigation: Effect of mine seismicity on groundwater hydrology, 20:15008 (R;US)
Geophysical Surveys
Integrated test plan for demonstration of a prompt fission neutron logging tool, 20:16569 (R;US)
Licensing
Criticality safety considerations for low-level-waste facilities, 20:16259 (R;US)
Life-Cycle Cost
Interim report: Waste management facilities cost information for mixed low-level waste, 20:14984 (R;US)
Waste management facilities cost information estimating data, 20:15130 (R;US)
Liners
Buckling of the Tank 241SY101 primary liner, 20:15099 (R;US)
Control of water infiltration into near surface LLW disposal units. Progress report on field experiments at a humid region site, Beltsville, Maryland: Volume 8, 20:15007 (R;US)
Maintenance
222-S radioactive liquid waste line replacement and 219-S secondary containment upgrade, Hanford Site, Richland, Washington, 20:14967 (R;US)
Modifications
222-S radioactive liquid waste line replacement and 219-S secondary containment upgrade, Hanford Site, Richland, Washington, 20:14967 (R;US)
Operation
Multi-function Waste Tank Facility Qualification and Training Plan, Project W-236A, 20:15080 (R;US)
Performance
Behavior of spent fuel under unsaturated conditions, 20:14949 (R;US)
Performance Testing
Performance assessment of grouted double-shell tank waste disposal at Hanford. Revision 1, 20:15098 (R;US)
Planning
Interim report: Waste management facilities cost information for mixed low-level waste, 20:14984 (R;US)
Waste management facilities cost information estimating data, 20:15130 (R;US)
Quality Assurance
Quality Assurance Project Plan, W-026. Revision 1, 20:15074 (R;US)
Radiation Doses
Letter report for skyshine abatement assessment, 20:14980 (R;US)
Remedial Action
Letter report for skyshine abatement assessment, 20:14980 (R;US)
Safety
Criticality safety considerations for low-level-waste facilities, 20:16259 (R;US)
Safety Analysis
Hazard classification for the supercritical water oxidation test bed. Revision 1, 20:15177 (R;US)
Samplers
Core sampling system spare parts assessment, 20:15101 (R;US)
Stress analysis of portable safety platform (Core Sampler Truck), 20:15083 (R;US)
Video Graphic Recorder (VGR) calibration, 20:15090 (R;US)
Sampling
Compatibility Grab Sampling and Analysis Plan, 20:15126 (R;US)
Test plan for K Basin Sludge Canister and Floor Sampling Device, 20:15071 (R;US)
Site Characterization
100-BC-2 limited field investigation report, 20:14977 (R;US)
Applications of natural analogue studies to Yucca Mountain as a potential high level radioactive waste repository, 20:14983 (R;US)
Scenarios constructed for nominal flow in the presence of a repository at Yucca Mountain and vicinity, 20:15025 (R;US)
Source Terms
Analysis of source term modeling for low-level radioactive waste performance assessments, 20:15012 (R;US)
Technology Assessment
Performance assessment of grouted double-shell tank waste disposal at Hanford. Revision 1, 20:15098 (R;US)

RADIOACTIVE WASTE MANAGEMENT

Interactive development of RADTRAN, 20:15033 (R;US)
Nuclear Safety Research Department annual progress report 1994, 20:17319 (R;DK)
Progress on integrating environmental restoration data into mixed waste updates, 20:15164 (R;US)
Publicly administrated nuclear waste management research programme 1994-1996. General plan for the research programme and research plan for 1994, 20:14997 (R;FI)
Radioactive and mixed waste management plan for the Lawrence Berkeley Laboratory Hazardous Waste Handling Facility, 20:15006 (R;US)
Radiological accidents potentially important to human health risk in the U.S. Department of Energy waste management program, 20:15160 (R;US)
Waste handling Quality Assurance Program Plan for Engineered Process Applications. Revision 2, 20:15059 (R;US)

RADIOACTIVE WASTE PROCESSING
Analyses of vitrified waste, 20:15024 (R;US)
Analysis of waste-vitrification process samples: Improvements in sample preparation and analysis methods, 20:14994 (R;US)
Carlsbad Area Office strategic plan, March 1995. Revision 1, 20:14982 (R;US)
Expedited demonstration of molten salt mixed waste treatment technology. Final report, 20:15047 (R;US)
LLW solidification in cement: Effect of dilution, 20:15053 (R;US)

Microwave waste processing technology overview, 20:15023 (R;US)
TEAM. Technology Evaluation and Analysis Methodology Systems Analysis, 20:17339 (CM;US)
The modeling of contaminant flow during proposed treatment of U.S. Department of Energy low-level radioactive mixed wastes, 20:14954 (R;US)
Vitrification of radioactive waste. Application to other kinds of waste, 20:14957 (R;FR;In French)
Waste management facilities cost information estimating data, 20:15130 (R;US)

RADIOACTIVE WASTE STORAGE

Appropriate Technology
Assembly procedure for column cutting platform, 20:15112 (R;US)

Chemical Analysis
216-Day report for Tank 241-C-111, cores 58 and 59, 20:15094 (R;US)

Decision Tree Analysis
A Value of Information approach to data quality objectives for the Hanford high-level waste tanks, 20:15022 (R;US)

Mixing
Computer simulation of mobilization and mixing of kaolin with submerged liquid jets in 25,000-gallon horizontal cylindrical tanks, 20:15016 (R;US)

Monitoring
Acceptance test procedure for the ultra high pressure bore head for use in the self-installing liquid observation well, 20:15088 (R;US)
Safety evaluation for packaging transfer of 101-AZ thermocouples, 20:15072 (R;US)

Program Management
Multi-function Waste Tank Facility Qualification and Training Plan, Project W-236A, 20:15080 (R;US)

Public Opinion
Application of best available science to the regulatory process: The case of environmental regulations. Final technical report, February 1990–January 1993, 20:14968 (R;US)

Remedial Action
Supplemental design requirements document, Multifunction Waste Tank Facility, Project W-236A. Revision 1, 20:15079 (R;US)

Risk Assessment
Compilation of formal comments on the tank farms interim hazard and accident analyses, 20:15117 (R;US)
Strategy utilized for assessing baseline risks to human health from K-65 and metal oxide residues stored at the Fernald Site, 20:15175 (R;US)

Safety
Preparation of safety analysis reports (SARs) for near surface radioactive waste disposal facilities. Format and content of SARs, 20:14992 (R;XA)

Safety Analysis
A Value of Information approach to data quality objectives for the Hanford high-level waste tanks, 20:15022 (R;US)
Compilation of formal comments on the tank farms interim hazard and accident analyses, 20:15117 (R;US)
Safety evaluation for packaging transfer of 101-AZ thermocouples, 20:15072 (R;US)

Safety Engineering
Acceptance test report for the Westinghouse 100 ton hydraulic trailer, 20:15193 (R;US)
Closed out Tank 241-SY-101 DACS system change request #1–100, 20:15194 (R;US)

Safety Reports
Preparation of safety analysis reports (SARs) for near surface radioactive waste disposal facilities. Format and content of SARs, 20:14992 (R;XA)

Storage Facilities
Supplemental design requirements document, Multifunction Waste Tank Facility, Project W-236A. Revision 1, 20:15079 (R;US)

Waste Forms
Storage of nuclear materials by encapsulation in fullerenes, 20:15014 (PA;US)

Waste Retrieval
Test bed control center design concept for Tank Waste Retrieval Manipulator Systems, 20:14964 (R;US)

RADIOACTIVE WASTES

See also ALPHA-BEARING WASTES
HIGH-LEVEL RADIOACTIVE WASTES
INTERMEDIATE-LEVEL RADIOACTIVE WASTES
LOW-LEVEL RADIOACTIVE WASTES
RADIOACTIVE EFFLUENTS

Chemical Analysis
45-Day Safety Screen results for Tank 241-TY-104, Auger Samples, 95-AUG-008 and 95-AUG-009, 20:15097 (R;US)
45-Day safety screening report for grab samples from Tank 241-AP-107, 20:15095 (R;US)
High resolution fiber optic interferometer: FY94 final report, 20:16156 (R;US)
Tank 241-C-105 tank characterization plan. Revision 1, 20:15119 (R;US)
WRAP Module 1 sampling and analysis plan, 20:15073 (R;US)

Classification
Case study and presentation of the DOE treatability group concept for low-level and mixed waste streams, 20:14993 (R;US)
Criticality classification of enhanced radioactive and mixed waste storage, 20:15076 (R;US)

Computerized Tomography
Characterization of waste drums using nonintrusive active and passive computed tomography, 20:15048 (R;US)

Containers
Assembly procedure for column cutting platform, 20:15112 (R;US)

Containment
In situ construction of horizontal soil containment barrier at Fernald, 20:14988 (R;US)

Criticality
Criticality classification of enhanced radioactive and mixed waste storage, 20:15076 (R;US)

Ecological Concentration
A methodology for assessing the impact of mutagens on aquatic ecosystems. Final report, 20:16592 (R;US)

Encapsulation
Storage of nuclear materials by encapsulation in fullerenes, 20:15014 (PA;US)

Environmental Transport
Program overview: Subsurface science program, 20:15170 (R;US)

Fluid-Structure Interactions
In-tank fluid sloshing effects during earthquakes: A preliminary computational simulation, 20:14965 (R;US)

Ground Disposal
In situ construction of horizontal soil containment barrier at Fernald, 20:14988 (R;US)

Health Hazards
Strategy utilized for assessing baseline risks to human health from K-65 and metal oxide residues stored at the Fernald Site, 20:15175 (R;US)

Materials Handling Equipment
K-Basins debris removal equipment - test plan, 20:15070 (R;US)

Minimization
Waste Minimization Measurement and Progress Reporting, 20:15045 (R;US)
Waste minimization applications at a remediation site, 20:15176 (R;US)

Monitoring
Tank Farm Instrumentation and Data Acquisition/Management Upgrade Plan. Revision 5, 20:15127 (R;US)
Tank Waste Remediation System Tank Waste Analysis Plan. FY 1995, 20:15110 (R;US)
Wet season reconnaissance report on Seeps and Springs in Waste Area Grouping 6 at Oak Ridge National Laboratory. Environmental Restoration Program, 20:15010 (R;US)

Packaging
Safety evaluation for packaging transfer of 101-AZ thermocouples, 20:15072 (R;US)
Plasma Heating
Argonne-West facility requirements for a radioactive waste treatment demonstration, 20:14955 (R;US)
Radiation Monitoring
Limited field investigation report for the 100-NR-2 Operable Unit, Hanford Site, Richland, Washington, 20:15143 (R;US)
Radioactive Waste Disposal
Analysis of well hydrographs in a karst aquifer: Estimates of specific yields and continuum transmissivities, 20:15139 (R;US)
Radioactive Waste Processing
The physics design of accelerator-driven transmutation systems, 20:15003 (R;US)
Radioactive Waste Storage
Load test of the 306E Building roof deck and support structure, 20:15062 (R;US)
Rail Transport
INTERLINE5.0. Railroad Routing Model, 20:17334 (CM;US)
Remote Handling
Lead-free glovebox glove, 20:16269 (PA;US)
Risk Assessment
Level 3 baseline risk evaluation for Building 3506 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 20:15178 (R;US)
Sampling
Nitrogen chiller acceptance test procedure, 20:15087 (R;US)
Sampler bias – Phase 1, 20:15100 (R;US)
WRAP Module 1 sampling and analysis plan, 20:15073 (R;US)
Spallation
Introduction to spallation physics and spallation-target design, 20:15004 (R;US)
Testing
Vault 102 cemented waste solidification testing system. Final report, 20:15115 (R;US)
Transport
Safety evaluation for packaging transfer of 101-AZ thermocouples, 20:15072 (R;US)
Transportation Systems
Summary of needs assessment for long-term planning of DOE's transportation and packaging activities, 20:14919 (R;US)
Underground Disposal
A damage mechanics approach to life prediction for a salt structure, 20:15028 (R;US)
Hanford Permanent Isolation Barrier Program: Asphalt technology development, 20:16296 (R;US)
Underground Storage
Acceptance test procedure for the 241-SY-101 flexible receiver gamma detector system, 20:15086 (R;US)
Closed out tank 241-SY-101 DACS system change requests No. 201-300, 20:15092 (R;US)
In-tank fluid sloshing effects during earthquakes: A preliminary computational simulation, 20:14965 (R;US)
Operability Test Report for 241-T compressed air system and heat pump, 20:15108 (R;US)
Plant Acquisition Plan: Multi-function Waste Tank Facility. Revision 2, 20:15078 (R;US)
Safety evaluation for the interim stabilization of Tank 241-C-103, 20:15116 (R;US)
Tank 241-C-105 tank characterization plan. Revision 1, 20:15119 (R;US)
Tank 241-TY-101 Tank Characterization Plan, 20:15121 (R;US)
Waste Retrieval
Project W-340 tank 241-C-106 manipulator system closeout summary, 20:15082 (R;US)
Technical task plan for Acquire Commercial Technology for Retrieval, 20:15084 (R;US)
Waste Transportation
Assessment of transportation risk for the U.S. Department of Energy Environmental Management programmatic environmental impact statement, 20:14951 (R;US)
Automated Transportation Management System (ATMS) V2.0 logistics module PBI acceptance criteria, 20:14945 (R;US)
Transport safety research abstracts. No. 2. Information on research recently concluded and in progress, 20:14933 (R;XA)

A positron lifetime study of radiation defects in proton-irradiated Si, 20:16972 (IA;JP;In Japanese)
Crystal Growth
Photovoltaic Czochralski silicon manufacturing technology improvements. Annual subcontract report, 1 April 1993–31 March 1994, 20:15293 (R;US)
Cutting
Cast polycrystalline silicon photovoltaic module manufacturing technology improvements. Semiannual subcontract report, 8 December 1993–30 June 1994, 20:15292 (R;US)
Photovoltaic Czochralski silicon manufacturing technology improvements. Annual subcontract report, 1 April 1993–31 March 1994, 20:15293 (R;US)
Deposition
Large-area, triple-junction a-Si alloy production scale-up. Semiannual subcontract report, 17 March 1994–18 September 1994, 20:15294 (R;US)
Electric Conductivity
Characteristics of neutron-irradiated silicon, 20:16084 (IA;CZ;In Slovak)
Ion Implantation
Formation of cavities in Si and their chemisorption of metals, 20:16114 (R;US)
Suppression of self-interstitials in silicon during ion implantation via in-situ photoexcitation, 20:16060 (R;US)
Lithium Ions
Neutralization of intermediate-velocity Li emerging from Cs- and O-covered Si(100) surface, 20:17008 (IA;JP;In Japanese)
Oxygen Ions
Ion induced damage production and recovery in silicon, 20:17013 (IA;JP;In Japanese)
Photoconductivity
Quasi-equilibrium relaxation in poorly-compensated impurity silicon conditioned by low-temperature recharging of impurities and defects, 20:17020 (IA;RU;In Russian)
Physical Radiation Effects
Characteristics of neutron-irradiated silicon, 20:16084 (IA;CZ;In Slovak)
Ion induced damage production and recovery in silicon, 20:17013 (IA;JP;In Japanese)
MeV ion induced damage production and accumulation in silicon, 20:16078 (IA;JP;In Japanese)
Suppression of self-interstitials in silicon during ion implantation via in-situ photoexcitation, 20:16060 (R;US)
Positrons
A positron lifetime study of radiation defects in proton-irradiated Si, 20:16972 (IA;JP;In Japanese)
Precipitation
Atom probe field ion microscopy characterization of vanadium-titanium-chromium alloys, 20:15832 (RA;US)
Vacancies
Lattice defects in electron irradiated Si studied by positron lifetime spectroscopy, 20:16081 (IA;JP;In Japanese)
SILICON 28 REACTIONS
Pion interferometry in E814 – Toward equilibrium at the AGS, 20:16873 (R;US)
SILICON 28 TARGET
Measurement of the Induced Pseudoscalar Form Factor in the Capture of Polarized Muons by Si Nuclei, 20:16837 (R;XJ)
SILICON ALLOYS
Amorphization threshold in Si-implanted strained SiGe alloy layers, 20:16058 (R;US)
Comprehensive research on the stability and electronic properties of a-Si:H and a-SiGe:H alloys and devices. Final subcontract report, 10 March 1991–30 August 1994, 20:15295 (R;US)
Development of improved p-type Si-20 at. % Ge by addition of fullerite, 20:15727 (R;US)
Fabrication of improved SiGe alloys for an 18-couple module test, 20:15728 (R;US)
SILICON CARBIDES
Characterization of single crystalline semiconductors by RBS measurements, 20:16969 (IA;JP;In Japanese)
Defect energetics calculations of SiC using three representative empirical potentials, 20:17233 (RA;US)
Fatigue Crack Growth Rate (FCGR) behavior of Nicalon/SiC composites, 20:16074 (RA;US)
Influence of fiber content on mechanical performance of SiC-fiber-reinforced reaction-bonded silicon nitride composites, 20:16052 (R;US)
Phenomenological inelastic constitutive equations for SiC and SiC fibers under irradiation, 20:17234 (RA;US)
Temperature dependence of the subcritical crack growth rate of a SiC/SiC composite, 20:17232 (RA;US)
Tensile behavior of irradiated SiC fibers, 20:17231 (RA;US)

Transmutations of elements under irradiation and its impact on alloys composition, 20:17204 (RA;US)

SILICON NITRIDES
Differences in creep performance of a HIPed silicon nitride in ambient air and inert environments, 20:16061 (R;US)
Gelcasting of sintered reaction-bonded silicon nitride for improved mechanical properties, 20:15911 (R;US)
Influence of fiber content on mechanical performance of SiC-fiber-reinforced reaction-bonded silicon nitride composites, 20:16052 (R;US)
Predictions of tensile behavior and strengths of a Si_3N_4 ceramic at high temperatures based on a viscoplastic model, 20:15912 (R;US)
Stress relaxation of silicon nitride at elevated temperatures, 20:15910 (R;US)

SILICON ON CERAMIC SOLAR CELLS
See SOC SOLAR CELLS

SILICON OXIDES
Current dependence of secondary-ion yield for SiO_2 bombarded with MeV heavy ions, 20:17009 (IA;JP;In Japanese)
Fabrication and modification of metal nanocluster composites using ion and laser beams, 20:16057 (R;US)
GCMS and FTIR studies of by-product inhibited growth and the rate-limiting step in TEOS-based SiO_2 CVD, 20:16118 (R;US)
Secondary ion emission bombarded with MeV heavy ion, 20:17000 (IA;JP;In Japanese)

SILICON SEMICONDUCTOR DETECTORS
See SI SEMICONDUCTOR DETECTORS

SILICON SOLAR CELLS
See also SOC SOLAR CELLS
Cast polycrystalline silicon photovoltaic module manufacturing technology improvements. Semiannual subcontract report, 8 December 1993–30 June 1994, 20:15292 (R;US)
Comprehensive research on the stability and electronic properties of a-Si:H and a-SiGe:H alloys and devices. Final subcontract report, 10 March 1991–30 August 1994, 20:15295 (R;US)
Large-area, triple-junction a-Si alloy production scale-up. Semiannual subcontract report, 17 March 1994–18 September 1994, 20:15294 (R;US)
Photovoltaic Czochralski silicon manufacturing technology improvements. Annual subcontract report, 1 April 1993–31 March 1994, 20:15293 (R;US)

SILVER
Anodically enhanced diffusion in Cu/Ag thin film couples, 20:15817 (R;US)
Factors affecting the silver corrosion performance of jet fuel from the Merox process, 20:14882 (RA;US)
Hydrostatic extrusion of BSCCO/Ag composite wire, 20:16112 (R;US)
Large-scale atomic calculations using variational methods, 20:16939 (R;SE)

SILVER 109
Recovery of enriched stable isotopes in radionuclide production, 20:16127 (RA;US)

SILVER ALLOYS
Transmutation in copper-base brazing materials, 20:17206 (RA;US)

SIMPLEX PROCESS
See COAL GASIFICATION

SIMULATORS
Use of the NII to study impacts of new technologies and policies on supply and demand of electric power, 20:17325 (R;US)

SINGLE CRYSTALS
See MONOCRYSTALS

SITE CHARACTERIZATION
AECL strategy for surface-based investigations of potential disposal sites and the development of a geosphere model for a site, 20:16560 (R;SE)
Aespoe Hard Rock Laboratory - feasibility and usefulness of site investigation methods. Experiences from the pre-investigation phase, 20:16561 (R;SE)
Report on audit of the Richland Operations Office Site Characterization Program, 20:14947 (R;US)

SITE REHABILITATION
See REMEDIAL ACTION

SITE SELECTION
Factors affecting minority population proximity to hazardous facilities, 20:15636 (R;US)

SITE SURVEYS
See SITE CHARACTERIZATION

SKYRME POTENTIAL
Symmetries and first integrals of chiral Skyrme model, 20:16806 (RA;RU)

SKYRMIONS
See SKYRME POTENTIAL

SLOVAK REPUBLIC
See SLOVAKIA

SLOVAKIA
Recent activities in the field of nuclear power plant control and instrumentation in Czechoslovakia, 20:15513 (RA;XA)

SLUDGES
Biochemical processing of geothermal brines and sludges, 20:15332 (R;US)
Combustion testing and heat recovery study: Frank E. Van Lare Wastewater Treatment Plant, Monroe County. Final report, 20:15257 (R;US)
KW basin backwash pit sludge measurement/video, 20:15111 (R;US)
Sludge pretreatment chemistry evaluation: Enhanced sludge washing separation factors, 20:15018 (R;US)
Thermal sludge dryer demonstration: Bird Island Wastewater Treatment Plant, Buffalo, NY. Final report, 20:15246 (R;US)
W-320 pit liner vs. coating cost risk benefit analysis, 20:15081 (R;US)
What will we do with 104,000,000 cubic feet of Fernald waste?, 20:14985 (R;US)

SOC SOLAR CELLS
Development of large-area monolithically integrated silicon-film™ photovoltaic modules. Final subcontract report, May 1, 1991–December 31, 1994, 20:15298 (R;US)

SODIUM
Large-scale atomic calculations using variational methods, 20:16939 (R;SE)
Radioactive air emissions notice of construction Sodium Storage Facility, 20:15453 (R;US)

SODIUM 22
Production of long-lived radioisotopes and its application to calibration sources for PET cameras, 20:16211 (RA;US)

SODIUM 23 TARGET
Measurement of the $^{23}Na(n,2n)^{22}Na$ cross section at E_n=19.45 MeV and re-evaluation of the $^{23}Na(n,2n)^{22}Na$ excitation function, 20:16896 (RA;AT)

SODIUM ALLOYS
Development of aluminum nitride insulator coatings for fusion reactor applications, 20:17195 (R;US)
NaK pool-boiler solar receiver durability bench test. Volume 2, Metallurgical analysis, 20:15305 (R;US)

SODIUM CHLORIDES
First-principles calculations of surface energy and electronic structure of LiF, NaCl and MgO (100) surfaces, 20:16053 (R;US)

SODIUM MINERALS
See MINERALS

SODIUM-SULFUR BATTERIES
Lessons learned in acquiring new regulations for shipping advanced electric vehicle batteries, 20:15631 (R;US)

SOFC
See SOLID ELECTROLYTE FUEL CELLS

SOILING
See SURFACE CONTAMINATION
SOILS
Chemical Analysis
A man-portable supercritical fluid extractor, 20:16555 (R;US)
Determination of total and isotopic uranium by inductively coupled plasma-mass spectrometry at the Fernald Environmental Management Project, 20:16530 (R;US)
Ciliata
Soil ciliates (Protozoa: Ciliphora) as sensitive indicators of fundamental changes in forest ecosystems, 20:16710 (R;DE;In German)
Cleaning
Thermal decomposition of mercuric sulfide, 20:16571 (R;US)
Contamination
Final report from VFL Technologies for the pilot-scale thermal treatment of lower East Fork Poplar Creek floodplain soils. LEFPC appendices, Volume 4, Appendix V-C, 20:15131 (R;US)
Geophysical investigation, Salmon Site, Lamar County, Mississippi, 20:16524 (R;US)
Human health risks from TNT, RDX, and HMX in environmental media and consideration of the US Regulatory Environment, 20:16711 (R;US)
In situ construction of horizontal soil containment barrier at Fernald, 20:14988 (R;US)
Integration of pneumatic fracturing and in situ vitrification in the soil subsurface, 20:15020 (R;US)
Site-specific standard request for underground storage tanks 1219-U, 1222-U, 2082-U, and 2068-U at the rust garage facility buildings 9754-1 and 9720-15: Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, Facility ID No. 0-010117, 20:16574 (R;US)
What will we do with 104,000,000 cubic feet of Fernald waste?, 20:14985 (R;US)
Decontamination
Prediction of single-component NAPL behavior for the TEVES Project using T2VOC, 20:16558 (R;US)
Desorption
Final report for the pilot-scale thermal treatment of Lower East Fork Poplar Creek floodplain soils, 20:15153 (R;US)
Diffusion Barriers
In situ construction of horizontal soil containment barrier at Fernald, 20:14988 (R;US)
Environmental Transport
Final report from VFL Technologies for the pilot-scale thermal treatment of Lower East Fork Poplar Creek floodplain soils. LEFPC appendices. Volume 6. Appendix VI-X, 20:15156 (R;US)
Field Tests
Final report from VFL Technologies for the pilot-scale thermal treatment of Lower East Fork Poplar Creek floodplain soils. LEFPC appendices. Volume 5. Appendix V-D, 20:15155 (R;US)
Forests
Soil ciliates (Protozoa: Ciliphora) as sensitive indicators of fundamental changes in forest ecosystems, 20:16710 (R;DE;In German)
Fracturing
Integration of pneumatic fracturing and in situ vitrification in the soil subsurface, 20:15020 (R;US)
Grouting
In situ construction of horizontal soil containment barrier at Fernald, 20:14988 (R;US)
Humidity
Unsaturated hydraulic conductivity of a red-yellow podzolic soil in the Northern Zona da Mata of Pernambuco State - Brazil, 20:16545 (I;BR;In Portuguese)
Hydraulic Conductivity
Unsaturated hydraulic conductivity of a red-yellow podzolic soil in the Northern Zona da Mata of Pernambuco State - Brazil, 20:16545 (I;BR;In Portuguese)
In-Situ Processing
Application of in situ vitrification in the soil subsurface: Engineering-scale testing, 20:16554 (R;US)
Injection
Plan and schedule for disposition and regulatory compliance for miscellaneous streams. Revision 1, 20:14976 (R;US)
Liming
Use of clean coal technology by-products as agricultural liming techniques, 20:14751 (R;US)
Pollution
Field-usable portable analyzer for chlorinated organic compounds, 20:16522 (R;US)
Final report from VFL technologies for the pilot-scale thermal treatment of Lower East Fork Poplar Creek floodplain soils. LEFPC Appendices, Volume 2, Appendix V-A, 20:15154 (R;US)
Radionuclide Migration
Geophysical investigation, Salmon Site, Lamar County, Mississippi, 20:16524 (R;US)
In situ mapping of radionuclides in subsurface and surface soils: 1994 Summary report, 20:15146 (R;US)
Radionuclide containment in soil by phosphate treatment, 20:16520 (R;US)
Remedial Action
Final report from VFL Technologies for the pilot-scale thermal treatment of lower East Fork Poplar Creek floodplain soils. LEFPC appendices, Volume 4, Appendix V-C, 20:15131 (R;US)
Final report from VFL technologies for the pilot-scale thermal treatment of Lower East Fork Poplar Creek floodplain soils: LEFPC appendices, volume 1, appendix I-IV, 20:15198 (R;US)
Limited field investigation report for the 100-HR-2 Operable Unit, 20:15174 (R;US)
Proposed plan for the Environmental Restoration Disposal Facility (ERDF) at the Hanford Site, Richland, Washington. Revision 1, 20:14978 (R;US)
Sampling
Sonication standard laboratory module, 20:16451 (PA;US)
Surface Contamination
Direct measurement of strontium-90 and uranium-238 in soils on a real-time basis: 1994 summary report, 20:16553 (R;US)
Thermal Analysis
Final report for the pilot-scale thermal treatment of Lower East Fork Poplar Creek floodplain soils, 20:15153 (R;US)
Final report from VFL Technologies for the pilot-scale thermal treatment of Lower East Fork Poplar Creek floodplain soils. LEFPC appendices. Volume 5. Appendix V-D, 20:15155 (R;US)
Final report from VFL Technologies for the pilot-scale thermal treatment of Lower East Fork Poplar Creek floodplain soils. LEFPC appendices. Volume 6. Appendix VI-X, 20:15156 (R;US)
Vitrification
Application of in situ vitrification in the soil subsurface: Engineering-scale testing, 20:16554 (R;US)
Integration of pneumatic fracturing and in situ vitrification in the soil subsurface, 20:15020 (R;US)
SOL-GEL PROCESS
Enea contribution to development of sol-gel technologies, 20:15917 (R;IT)
SOLAR BATTERIES

SULFUR
Advanced sulfur control concepts for hot gas desulfurization technology. Quarterly report, October–December 1994, 20:14724 (R;US)
Analysis of grain boundaries in a V-5Cr-5Ti alloy using Auger Electron Spectroscopy, 20:15833 (RA;US)
Bench-scale testing of the micronized magnetite process. Second quarterly technical progress report, October 1994–December 1994, 20:14709 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, April 1994–June 1994, 20:14783 (R;US)
Direct sulfur recovery during sorbent regeneration. Final report, 20:14763 (R;US)
Engineering development of advanced physical fine coal cleaning technologies - froth flotation. Quarterly technical progress report No. 23, April 1, 1994–June 30, 1994, 20:14706 (R;US)
Engineering development of advanced physical fine coal cleaning technologies - froth flotation. Quarterly technical progress report No. 24, July 1, 1994–September 30, 1994, 20:14726 (R;US)
Production of elemental sulfur from H_2S and CO_2 derived from a coal desulfurization process. Quarterly technical progress report, October 1, 1994–December 31, 1994, 20:14739 (R;US)
Selective catalytic reduction of sulfur dioxide to elemental sulfur. Quarterly technical progress report No. 7, January–March 1994, 20:14760 (R;US)
SULFUR DIOXIDE
Control of coal combustion SO_2 and NO_x emissions by in-boiler injection of CMA. Final project report, July 1, 1992–December 31, 1994, 20:14761 (R;US)
Development and testing of commercial-scale, coal-fired combustion systems: Phase 3, Technical progress report, July 1994–September 1994, 20:14784 (R;US)
Direct sulfur recovery during sorbent regeneration. Final report, 20:14763 (R;US)
Enhanced NO_x removal in wet scrubbers using metal chelates. Final report, Volume 1, 20:14755 (R;US)
Low temperature SO_2 removal with solid sorbents in a circulating fluidized bed absorber. Final report, 20:14759 (R;US)
Production and use of activated char for combined SO_2/NO_x removal. [Quarterly] technical report, September 1–November 30, 1994, 20:15375 (R;US)
Selective catalytic reduction of sulfur dioxide to elemental sulfur. Quarterly technical progress report No. 7, January–March 1994, 20:14760 (R;US)
Validation of an ISO Standard Procedure for determination of SO_2 in flue gases, 20:16498 (R;SE;In Swedish)
SULFUR FLUORIDES
Dynamics of vibrationally exited molecules in rare gas matrix, 20:16190 (IA;JP;In Japanese)
SULFUR OXIDES

SUPERCONDUCTING GENERATORS
SUPERCONDUCTING MAGNETS
SUPERCONDUCTING MOTORS
Dynamics of current driven disordered Josephson junction arrays, 20:17118 (R;US)
Investigation of the detecting response of superconducting structures on the frequency up to 2 THz, 20:17083 (IA;RU;In Russian)

SUPERCONDUCTING FILMS
Bismuth Oxides
BSCCO-2212 thin films and multilayer on $SrTiO_3$ substrates, 20:16037 (IA;RU)
Chemical Coating
Superconducting phase formation on chemical deposition of HTSC coating, 20:15954 (IA;RU;In Russian)
Crossed Fields
Variations of magnetic flux relation rate in Y-Ba-Cu-O film under crossed electric field effect, 20:15981 (IA;RU;In Russian)
Electric Conductivity
Thermal boundary resistance of YBaCuO film on MgO and sapphire substrates, 20:15977 (IA;RU;In Russian)
Volt-ampere characteristics of YBaCuO epitaxial films in the range of superconducting transition, 20:15945 (IA;RU;In Russian)
Electronic Structure
Electronic structure of ideal and disordered HTSC-polymer Langmuir Bladgett films on epitaxial YBaCuO surfaces, 20:17096 (IA;RU)
Energy Losses
The line of irreversibility and dissipative losses in YBCO epitaxial film, 20:15959 (IA;RU;In Russian)
Epitaxy
Growth and structure of $Bi_2Sr_2CaCu_2O_{8-x}$ epitaxial films on $SrTiO_3$ substrates with CeO_2 and MgO buffer layers, 20:15993 (IA;RU;In Russian)
Fabrication
Study of physicotechnological bases of production of HTSC film structures, 20:15939 (IA;RU;In Russian)
Interfaces
Thermal boundary resistance of YBaCuO film on MgO and sapphire substrates, 20:15977 (IA;RU;In Russian)
Lattice Parameters
Structural and bolometric properties of YBaCuO films on mica substrates, 20:16007 (IA;RU;In Russian)
Magnetic Flux
Variations of magnetic flux relation rate in Y-Ba-Cu-O film under crossed electric field effect, 20:15981 (IA;RU;In Russian)
Magnetic Properties
Critical state of $Nd_{1.85}Ce_{0.15}CuO_{4-\delta}$ thin films in a cross field, 20:15976 (IA;RU;In Russian)
Microstructure
Growth and structure of $Bi_2Sr_2CaCu_2O_{8-x}$ epitaxial films on $SrTiO_3$ substrates with CeO_2 and MgO buffer layers, 20:15993 (IA;RU;In Russian)
Microwave Radiation
Thin superconducting YBaCuO in strong microwave field, 20:17051 (IA;RU;In Russian)
Niobium
Anomalous behaviour of the diamagnetic protile of superconducting niobium near the vacuum boundary north, 20:17072 (IA;RU;In Russian)
Optical Properties
Optical properties of superconducting films of $YBa_2Cu_3O_{7-\delta}$, Bi(Pb)$Sr_2CaCu_2O_x$ and Te(Ba)CaCuO in visible and near infrared spectra, 20:16009 (IA;RU;In Russian)
Oxygen
Determination of bridge oxygen concentration in YBaCuO films, 20:15999 (IA;RU;In Russian)
Penetration Depth
Anomalous behaviour of the diamagnetic protile of superconducting niobium near the vacuum boundary north, 20:17072 (IA;RU;In Russian)
Response Functions
Thin superconducting YBaCuO in strong microwave field, 20:17051 (IA;RU;In Russian)
Sintering
Thick films of $YBa_2Cu_3O_{7-\delta}$ produced on Y_2BaCuO_5 substrate by painting: technology, properties, applications, 20:15949 (IA;RU;In Russian)
Synchrotron Radiation
Investigation in the infrared spectroscopy range on the synchrotron radiation beam of HTSC film emission, 20:17088 (IA;RU;In Russian)
Synthesis
BSCCO-2212 thin films and multilayer on $SrTiO_3$ substrates, 20:16037 (IA;RU)
Transition Temperature
Determination of bridge oxygen concentration in YBaCuO films, 20:15999 (IA;RU;In Russian)
Size effect in thin metal oxide films as a test of coupling of superconducting pairing, 20:17070 (IA;RU;In Russian)
Superconducting phase formation on chemical deposition of HTSC coating, 20:15954 (IA;RU;In Russian)
Thick films of $YBa_2Cu_3O_{7-\delta}$ produced on Y_2BaCuO_5 substrate by painting: technology, properties, applications, 20:15949 (IA;RU;In Russian)
Transmission
Investigation in the infrared spectroscopy range on the synchrotron radiation beam of HTSC film emission, 20:17088 (IA;RU;In Russian)
Vapor Deposited Coatings
Structural and bolometric properties of YBaCuO films on mica substrates, 20:16007 (IA;RU;In Russian)

SUPERCONDUCTING GENERATORS

Damage
Summary report for ITER Task - T226B: Evaluation of ITER disruption erosion, 20:17196 (R;US)
Eddy Currents
Electromagnetic analysis of first wall and blanket in NET and ITER-CDA, 20:17275 (RA;JP)
Experimental and numerical analysis for magnetically induced vibrations of conducting structure, 20:17192 (RA;JP)

Erosion
Summary report for ITER Task - T226B: Evaluation of ITER disruption erosion, 20:17196 (R;US)

Evaluation
Research on structural design guideline for the experimental fusion reactor, 20:17281 (RA;JP)

Fracture Properties
Fracture mechanics assessment of the Karlsruhe DEMO Blanket during plasma disruptions, 20:17279 (RA;JP)

Helium Embrittlement
Influence of transmutation on microstructure, density, change, and embrittlement of vanadium and vanadium alloys irradiated in HFIR, 20:17219 (RA;US)

Information Needs
Comparison of activation cross section measurements and experimental techniques for fusion reactor technology. Summary report of the IAEA specialists' meeting held in St. Petersburg, Russia, 7 to 9 September 1994, 20:17246 (R;XA)

Irradiation
Calculations to determine the feasibility of using a boron carbide shield for spectral tailoring in the HFIR for vanadium alloy irradiation-R, 20:17205 (RA;US)

Magnetic Testing
Experimental and numerical analyses for effects of ferromagnetic material, 20:17277 (RA;JP)

Manuals
ITER material properties handbook, 20:17207 (RA;US)

Melting
Summary report for ITER Task - T226B: Evaluation of ITER disruption erosion, 20:17196 (R;US)

Neutron Reactions
A survey of selected neutron-activation reactions with short-lived products of importance to fusion reactor technology, 20:16887 (R;XA)

Physical Radiation Effects
A comparison of the effect of radiation on the thermal conductivity of sapphire at low and high temperature, 20:17236 (RA;US)
Damage analysis and fundamental studies for fusion reactor materials development for the period March 1, 1991–February 28, 1994. Final report, 20:17237 (R;US)
Dependence of vanadium alloy density on starting composition, transmutation and segregation, 20:17221 (RA;US)
Development of low-chromium, chromium-tungsten steels for fusion, 20:17210 (RA;US)
Effect of dynamically charged helium on mechanical properties of V-4Cr-4Ti, 20:17216 (RA;US)
Fracture toughness of irradiated candidate materials for ITER first wall/blanket structures, 20:17213 (RA;US)
ITER material properties handbook, 20:17207 (RA;US)
In situ observations of trapped deuterium in iron pre-bombarded with ^{3}He ions, 20:17249 (IA;JP;In Japanese)
Influence of flux-spectra differences on transmutation and swelling of vanadium alloys, 20:17220 (RA;US)
Influence of nickel and beryllium content on swelling of copper irradiated in COBRA-1A, 20:17225 (RA;US)
Influence of transmutation on microstructure, density, change, and embrittlement of vanadium and vanadium alloys irradiated in HFIR, 20:17219 (RA;US)
Low temperature radiation-induced segregation relative to IASCC and ITER, 20:17214 (RA;US)
Microstructural examination of commercial ferritic alloys at 200 dpa, 20:17212 (RA;US)
Microstructure-mechanical properties correlation of irradiated conventional and reduced-activation martensitic steels, 20:17211 (RA;US)
Phenomenological inelastic constitutive equations for SiC and SiC fibers under irradiation, 20:17234 (RA;US)
Preparation of Russian copper alloy creep specimens, 20:17223 (RA;US)
Reanalysis of neutron dosimetry for the MOTA-1A/1B experiments in FFTF, 20:17201 (RA;US)
Revised neutron dosimetry results for the MOTA-2A experiment in FFTF, 20:17200 (RA;US)
Status of U.S./Japan Collaborative Program Phase II HFIR target and RB* capsules, 20:17198 (RA;US)
Status of the dynamic helium charging experiment, 20:17217 (RA;US)
Swelling and structure of vanadium alloys irradiated in the dynamic helium charging experiment, 20:17215 (RA;US)
The COBRA-1B irradiation experiment in EBR-II, 20:17199 (RA;US)
Transmutation in copper-base brazing materials, 20:17206 (RA;US)
Void swelling in binary Fe-Cr alloys at 200 dpa, 20:17208 (RA;US)
Void swelling of pure copper, Cu-5Ni and Cu-5Mn alloys irradiated with fast neutrons, 20:17224 (RA;US)

Radioactivation
A survey of selected neutron-activation reactions with short-lived products of importance to fusion reactor technology, 20:16887 (R;XA)
Comparison of activation cross section measurements and experimental techniques for fusion reactor technology. Summary report of the IAEA specialists' meeting held in St. Petersburg, Russia, 7 to 9 September 1994, 20:17246 (R;XA)
Development of low-chromium, chromium-tungsten steels for fusion, 20:17210 (RA;US)

Research Programs
Clean steels for fusion, 20:17259 (R;US)

Shape Memory Effect
Application of shape memory alloy to a fusion structure component. A proposal of intelligent material system, 20:17282 (RA;JP)

Stress Analysis
A large deformation theory of solids subject to electromagnetic loads and its application, 20:17194 (RA;JP)
Electromagnetic analysis of first wall and blanket in NET and ITER-CDA, 20:17275 (RA;JP)
Electromagnetic forces computation for a ferromagnetic blanket structure during a plasma disruption, 20:17278 (RA;JP)
Experimental and numerical analyses for effects of ferromagnetic material, 20:17277 (RA;JP)
Experimental and numerical analysis for magnetically induced vibrations of conducting structure, 20:17192 (RA;JP)
Fracture mechanics assessment of the Karlsruhe DEMO Blanket during plasma disruptions, 20:17279 (RA;JP)

Temperature Dependence
Fracture toughness of irradiated candidate materials for ITER first wall/blanket structures, 20:17213 (RA;US)

Testing
Copper alloys for high heat flux structure applications, 20:17222 (RA;US)

Transmutation
Influence of flux-spectra differences on transmutation and swelling of vanadium alloys, 20:17220 (RA;US)

THERMONUCLEAR REACTORS
See also ION BEAM FUSION REACTORS
Aiming at nuclear fusion reactors. Present status of nuclear fusion research and development in JAERI, 20:17170 (I;JP;In Japanese)

THERMONUCLEAR WEAPONS

THIN FILMS
Behaviour of thin films and bulk oxides under microbeam irradiation, 20:16998 (R;FR)
Characterization of copper thin films prepared by metal self-ion beam sputter deposition, 20:15222 (IA;JP;In Japanese)

THIOPHOSGENE
See ORGANIC CHLORINE COMPOUNDS

THOMAS-FERMI MODEL
Low-density ionization behavior, 20:16774 (R;US)

THOMAS-FERMI-DIRAC MODEL
See THOMAS-FERMI MODEL

THORIUM 230
Comment and response document for the UMTRA Project vitro processing site completion report Salt Lake City, Utah. Revision 1, 20:15140 (R;US)

THORIUM 232
Transfer of long-lived radionuclides from diet to man and their body content and physiological characteristics of Reference Japanese Man, 20:16687 (RA;JP;In Japanese)

THORIUM 232 TARGET
Electronuclear breeding in thorium targets, 20:16362 (R;RU;In Russian)

THORIUM OXIDES
Ion-bombardment etching of nuclear materials, 20:15904 (R;IN)

THORON
See RADON 220

THROUGHFALL
Field performance of the Walker Branch throughfall displacement experiment, 20:16483 (R;US)

THRUSTERS
A collision avoidance system for workpiece protection, 20:16276 (R;US)

THULIUM
Erbium and thulium antiferromagnetism - features of long-range and short-range order, 20:15866 (IA;RU;In Russian)

TIGHT SANDS
See SANDSTONES

TIME-OF-FLIGHT SPECTROMETERS
Large Area High-Efficiency Time-of Flight System for Detection of Low Energy Heavy Evaporation Residues at the Electrostatic Separator VASSILISSA, 20:16422 (R;XJ)

TIME-SERIES ANALYSIS
Sensor fusion and nonlinear prediction for anomalous event detection, 20:17378 (R;US)

TIN
Transport properties of superconducting single crystal filaments in a glass shell, 20:15928 (IA;RU;In Russian)

TIN ALLOYS
Effects of temperature ramp rate during heat treatment on hysteresis loss and critical current density of internal tin processed wires, 20:17025 (R;US)

TIN TELLURIDES
Contribution of inner shell electrons to position-dependent stopping powers of a crystal surface, 20:17015 (IA;JP;In Japanese)
Influence of matrix composition on superconducting properties of SnTe base solid solutions alloyed with indium, 20:15958 (IA;RU;In Russian)
Superconductivity of helium doped epitaxial films of tin telluride, 20:15848 (IA;RU;In Russian)

TIOGA NITROGEN REMOVAL PROCESS
See NITROGEN

TISSUE-EQUIVALENT MATERIALS
The DOE in-vivo phantom library program, 20:16627 (RA;US)

TITANATES
See also PZT
STRONTIUM TITANATES
Mechanism(s) for the suppression of the switchable polarization in PZT and $BaTiO_3$, 20:16048 (R;US)
Solution based temperature of Perovskite-type oxide films and powders, 20:16043 (R;US)
Trace element emissions. Semi-annual report, October 1994–February 1995, 20:14723 (R;US)

TITANIUM
Atom probe field ion microscopy characterization of vanadium-titanium-chromium alloys, 20:15832 (RA;US)
Surface functionalization by molten salt electrolytic processes, 20:15842 (IA;JP;In Japanese)
Synthesis and characterization of nanophase face-centered-cubic titanium, 20:15899 (R;US)

TITANIUM ALLOYS
See also TITANIUM BASE ALLOYS

Creep
Creep of a fine-grained, fully-lamellar, two-phase TiAl alloy at 760°C, 20:15898 (R;US)

Critical Current
Unfluence of head treatment conditions on pinning force in Nb-22Ta-37Ti superconductor, 20:15862 (IA;RU;In Russian)

Crystal Defects
Positron lifetime study of vacancies and their clusters in Ti_3Al, 20:16971 (IA;JP;In Japanese)

Damage
Models for predicting damage evolution in metal matrix composites subjected to cyclic loading, 20:16115 (R;US)

Fatigue
Models for predicting damage evolution in metal matrix composites subjected to cyclic loading, 20:16115 (R;US)

Fracture Properties
Fracture toughness of V-5Cr-5Ti alloy at room temperature and 100°C, 20:15834 (RA;US)

Fractures
Analysis of grain boundaries in a V-5Cr-5Ti alloy using Auger Electron Spectroscopy, 20:15833 (RA;US)

Hardness
The relationship between recrystallization temperature, grain size, and the Charpy impact properties of V-Cr-Ti alloys, 20:15829 (RA;US)

Heat Treatments
The relationship between recrystallization temperature, grain size, and the Charpy impact properties of V-Cr-Ti alloys, 20:15829 (RA;US)

Ion Microscopy
Atom probe field ion microscopy characterization of vanadium-titanium-chromium alloys, 20:15832 (RA;US)

Irradiation
Influence of transmutation on microstructure, density, change, and embrittlement of vanadium and vanadium alloys irradiated in HFIR, 20:17219 (RA;US)

Microstructure
Creep of a fine-grained, fully-lamellar, two-phase TiAl alloy at 760°C, 20:15898 (R;US)

Poisson Ratio
Room temperature elastic properties of V-5Cr-5Ti, 20:15830 (RA;US)

Positron Beams
Positron lifetime study of vacancies and their clusters in Ti_3Al, 20:16971 (IA;JP;In Japanese)

Specific Heat
Thermophysical properties of V-5Cr-5Ti, 20:15831 (RA;US)

Superconductors
Unfluence of head treatment conditions on pinning force in Nb-22Ta-37Ti superconductor, 20:15862 (IA;RU;In Russian)

Thermal Conductivity
Thermophysical properties of V-5Cr-5Ti, 20:15831 (RA;US)

Thermal Expansion
Thermophysical properties of V-5Cr-5Ti, 20:15831 (RA;US)

Transmutation
Influence of transmutation on microstructure, density, change, and embrittlement of vanadium and vanadium alloys irradiated in HFIR, 20:17219 (RA;US)

Young Modulus
Room temperature elastic properties of V-5Cr-5Ti, 20:15830 (RA;US)

TITANIUM BASE ALLOYS
Current noise and specific fetaures of current states in rigid superconductors, 20:15858 (IA;RU;In Russian)
Kinetics of plastic deformation of Ti-O solid solutions at temperatures 1 K ad below, 20:15868 (IA;RU;In Russian)

TITANIUM CARBIDES
A metallurgical approach toward alloying in rare earth permanen magnet systems, 20:15922 (R;US)

TITANIUM OXIDES
Conversion of holes into reducing species on surface modified small-particle TiO_2, 20:15775 (R;US)
Development of electrical insulator coatings: In-situ electrical resistance measurements on CaO-coated V-5%Cr-5%Ti in liquid lithium, 20:17227 (RA;US)
Magnetic excitations in a random exchange system $Fe_xMn_{1-x}TiO_3$, 20:16963 (R;US)

TITANIUM SULFIDES
An experimental search for high ZT semiconductors: A survey of the preparation and properties of several alloy systems, 20:15726 (R;US)

TOKAMAK DEVICES

Concept testing of wind turbines, 20:15359 (RA;DK)
Engineering design tools for wind diesel - summary of first release version, 20:15365 (RA;DK)
European wind turbine catalogue, 20:15339 (R;DK)
On power quality measures for wind-diesel systems. A conceptual framework and a case study, 20:15364 (RA;DK)
The IEC safety code for wine turbines, 20:15352 (RA;DK)
Vibration analysis of 1 MW gearbox for the Avedoere wind turbine. Test bed measurements, 20:15344 (R;DK)
Vibration and noise analysis of gearbox for NTK 500/37 wind turbine, 20:15342 (R;DK)
Wind turbine trailing edge aerodynamic brakes, 20:15348 (R;US)
WIPP
Carlsbad Area Office strategic plan, March 1995. Revision 1, 20:14982 (R;US)
Modification and application of TOUGH2 as a variable-density, saturated-flow code and comparison to SWIFT II results, 20:15037 (R;US)
Summary of applications of TOUGH2 to the evaluation of multiphase flow processes at the WIPP, 20:15038 (R;US)
The effect of stratigraphic dip on multiphase flow at the Waste Isolation Pilot Plant, 20:15036 (R;US)
The influence of crushed rock salt particle gradation on compaction, 20:15031 (R;US)
Using TOUGH2 to model the coupled effects of gas generation, repository consolidation, and multiphase brine and gas flow at the Waste Isolation Pilot Plant, 20:15035 (R;US)
WIRES
See also SUPERCONDUCTING WIRES
Development of a precision wire feeder for small-diameter wire, 20:15893 (R;US)
WOLFRAM
See TUNGSTEN
WOOD
A collection of wood properties. Version 1.1, 20:15249 (R;US)
Determination of trace elements in wood, 20:16141 (IA;JP;In Japanese)
Development of woodchip-fired gasification system for cogeneration plant, 20:15255 (R;DK;In Danish)
Fuelling with wet wood-fuel chips. Fuelling experiment at district heating plants with wood-fuel chips consisting of fresh, mechanically de-needled whole trees, 20:15254 (R;DK;In Danish)
WOOD ALCOHOL
See METHANOL
WOOD BURNING APPLIANCES
Health hazards from wood firing, 20:15262 (R;SE;In Swedish)

Regional formation of oxidants. Caused by emissions from wood firing, 20:16510 (R;SE;In Swedish)
Small-scale wood firing and cancer risks. Review of data, 20:15263 (R;SE;In Swedish)

WOOD FUELS
100 Hour test of the pressurized woodchip-fired gravel bed combustor, 20:15252 (R;US)
Development of a gravel bed combustor for a solid fueled gas turbine for the period February 1, 1989 to June 30, 1991, 20:15251 (R;US)
Electricity and heating based on wood chips for Mosbjerg and Tolne. A pilot project (Denmark), 20:15256 (R;DK;In Danish)
Wood fuel resources from the Danish forests bigger than 0.5 ha. Status and forecast, 20:15259 (R;DK;In Danish)

WOOD PRODUCTS INDUSTRY
See also PAPER INDUSTRY
Branch analysis of energy for the Danish timber industry, 20:15790 (R;DK;In Danish)
Responding to Agenda 2020: A technology vision and research agenda for America's forest, wood and paper industry, 20:16619 (R;US)

WOOD STOVES
See WOOD BURNING APPLIANCES

WORKERS
See PERSONNEL

WORKING (MATERIALS)
See MATERIALS WORKING

WUERENLINGEN PROTEUS REACTOR
See PROTEUS REACTOR

WWER TYPE REACTORS
See also BOHUNICE V-2 REACTOR
LOVIISA-1 REACTOR
LOVIISA-2 REACTOR
TEMELIN-1 REACTOR
WWER-3 REACTOR
APROS computer code, new developments, 20:15398 (RA;FI)
HEXTRAN - a 3-D reactor dynamics code for VVER accident analysis, 20:15399 (RA;FI)
Industrial safety studies for VVERs in FRAMATOME, 20:15393 (RA;FI)
Mitigation of irradiation embrittlement by annealing, 20:15425 (RA;US)
PACTEL - facility for VVER thermal hydraulics, 20:15394 (RA;FI)
Research of severe accidents in Finland, 20:15383 (RA;FI)
Review of main activities concerning computer codes used for VVER thermal-hydraulic safety analyses in OKB Gidropress, 20:15397 (RA;FI)
The loadings and strength of nuclear power plant structures in core damage accidents, 20:15390 (R;FI;In Finnish)
VVER and RBMK reactors, 20:15392 (RA;FI)

WWER-3 REACTOR
1% cold leg break experiment on PMK-2. Test results and computer code analysis, 20:15389 (R;DE)
Investigation of templets cut out of operating reactor vessels before and after annealing, 20:15416 (RA;US)
Prototype of an expert system based nuclear power plant information systems, 20:15497 (RA;XA)
Russian annealing experience and application to U.S. plants, 20:15415 (RA;US)

WWER-440 REACTOR
See WWER-3 REACTOR

X

X RADIATION
Inter-element effects correction due to the secondary x-ray fluorescence in pixe analysis technic, 20:16926 (I;DZ;In French)

X-RAY DIFFRACTION
Nuclear metallurgy lectures. Chapter 3, 20:16130 (R;US)

X-RAY FLUORESCENCE ANALYSIS
An investigation of a novel approach to elemental imaging in three dimensions, 20:16174 (R;US)
Quantitative schemes in energy dispersive X-ray fluorescence implemented in AXIL, 20:17350 (I;DZ)

X-RAY SPECTROMETERS
High-resolution superconducting x-ray spectrometers with aluminum trapping layers of different thicknesses, 20:16453 (R;US)

Y

Y-12 PLANT

Abandoned Wells
Fiscal Year 1993 Well Plugging and Abandonment Program Summary Report Y-12 Plant, Oak Ridge, Tennessee, 20:15206 (R;US)

Chemical Wastes
Final report from VFL Technologies for the pilot-scale thermal treatment of lower East Fork Poplar Creek floodplain soils. LEFPC appendices, Volume 4, Appendix V-C, 20:15131 (R;US)

Decommissioning
Y-12 Plant decontamination and decommissioning technology logic diagram for Building 9201-4. Volume 3: Technology evaluation data sheets; Part B: Decontamination, robotics/automation, waste management, 20:15203 (R;US)
Y-12 Plant decontamination and decommissioning technology logic diagram for Building 9201-4. Volume 2: Technology logic diagram, 20:15201 (R;US)
Y-12 Plant decontamination and decommissioning technology logic diagram for Building 9201-4. Volume 3: Technology evaluation data sheets; Part A: Characterization, dismantlement, 20:15202 (R;US)

Decontamination
Y-12 Plant decontamination and decommissioning technology logic diagram for Building 9201-4. Volume 3: Technology evaluation data sheets; Part A: Characterization, dismantlement, 20:15202 (R;US)
Y-12 Plant decontamination and decommissioning technology logic diagram for Building 9201-4. Volume 3: Technology evaluation data sheets; Part B: Decontamination, robotics/automation, waste management, 20:15203 (R;US)
Y-12 Plant decontamination and decommissioning technology logic diagram for Building 9201-4. Volume 2: Technology logic diagram, 20:15201 (R;US)

Hydrology
Chemical characteristics of waters in Karst Formations at the Oak Ridge Y-12 Plant, 20:16577 (R;US)
Insights into quick flow in a karst aquifer: Usefulness of infrequently collected geochemical data from wells, 20:16578 (R;US)

Radiation Accidents
An assessment of the radiological doses resulting from accidental uranium aerosol releases and fission product releases from a postulated criticality accident at the Oak Ridge Y-12 Plant, 20:15159 (R;US)

Radioactive Waste Management
Analysis of well hydrographs in a karst aquifer: Estimates of specific yields and continuum transmissivities, 20:15139 (R;US)
Evaluation of cavity occurrence in the Maynardville Limestone and the Copper Ridge Dolomite at the Y-12 Plant using logistic and general linear models, 20:15138 (R;US)
Y-12 Plant Decontamination and Decommissioning Technology Logic Diagram for Building 9201-4. Volume 1: Technology evaluation, 20:15200 (R;US)

Remedial Action
Decision document for performing a long-term pumping test at the S-3 Site, Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 20:15204 (R;US)
Fiscal Year 1993 Well Plugging and Abandonment Program Summary Report Y-12 Plant, Oak Ridge, Tennessee, 20:15206 (R;US)
Post-closure permit application for the Upper East Fork Poplar Creek hydrogeologic regime at the Y-12 Plant: New Hope Pond and Eastern S-3 ponds plume. Revision 2, 20:15205 (R;US)

Site status monitoring report for underground storage tanks 1219-U, 1222-U, 2082-U, and 2068-U at the Rust Garage Facility, Buildings 9720-15 and 9754-1, Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, Facility ID No. 0-010117, 20:16575 (R;US)
Site-specific standard request for underground storage tanks 1219-U, 1222-U, 2082-U, and 2068-U at the rust garage facility buildings 9754-1 and 9720-15: Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, Facility ID No. 0-010117, 20:16574 (R;US)

Sanitary Landfills
Construction quality assurance report for the Y-12 Construction/Demolition Landfill VII (CDL VII), Oak Ridge, Tennessee, 20:15137 (R;US)

Site Characterization
Analysis of well hydrographs in a karst aquifer: Estimates of specific yields and continuum transmissivities, 20:15139 (R;US)
Chemical characteristics of waters in Karst Formations at the Oak Ridge Y-12 Plant, 20:16577 (R;US)
Site status monitoring report for underground storage tanks 1219-U, 1222-U, 2082-U, and 2068-U at the Rust Garage Facility, Buildings 9720-15 and 9754-1, Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, Facility ID No. 0-010117, 20:16575 (R;US)

Storage Facilities
Underground storage tank management plan, 20:15135 (R;US)

Surface Waters
Sampling and analysis plan for groundwater and surface water monitoring at the Y-12 Plant during calendar year 1995, 20:16576 (R;US)

Waste Disposal
Construction quality assurance report for the Y-12 Construction/Demolition Landfill VII (CDL VII), Oak Ridge, Tennessee, 20:15137 (R;US)
Water balance report for the Oak Ridge Y-12 Plant, 20:16573 (R;US)

Waste Storage
Calendar year 1993 groundwater quality report for the Upper East Fork Poplar Creek hydrogeologic regime Y-12 Plant, Oak Ridge, Tennessee: 1993 groundwater quality data interpretations and proposed program modifications, 20:15136 (R;US)

Water Quality
Calendar year 1993 groundwater quality report for the Chestnut Ridge Hydrogeologic Regime Y-12 Plant, Oak Ridge, Tennessee. 1993 Groundwater quality data interpretations and proposed program modifications, 20:15158 (R;US)
Fiscal year 1994 well installation program summary report, Y-12 Plant, Oak Ridge, Tennessee, 20:15157 (R;US)

Water Resources
Water balance report for the Oak Ridge Y-12 Plant, 20:16573 (R;US)

Water Use
Water balance report for the Oak Ridge Y-12 Plant, 20:16573 (R;US)

Wells
Fiscal Year 1993 Well Plugging and Abandonment Program Summary Report Y-12 Plant, Oak Ridge, Tennessee, 20:15206 (R;US)

YANG-MILLS THEORY
Some New Integrable Equations from the Self-Dual Yang-Mills Equations, 20:16794 (R;XJ)

YANKEE EVENT
See NUCLEAR EXPLOSIONS

YIELD (FISSION)
See FISSION YIELD

YTTERBIUM
Sythesis of rare earth metal - GIC graphite intercalation compound in molten chloride system, 20:16189 (IA;JP;In Japanese)

YTTRIUM ALLOYS
Effect of nearest surrounding on the formation of intervalent state in Ce-Ni compounds, 20:15872 (IA;RU;In Russian)

YTTRIUM ALUMINIUM GARNETS
See ALUMINIUM OXIDES
YTTRIUM COMPOUNDS

YTTRIUM COMPOUNDS
See also YTTRIUM NITRIDES

Absorption Spectra
Coexistence of localized (polarons) and delocalized (band) states at the Fermi energy of the Bi-2212 Y/Ca superconductors, 20:17107 (IA;RU)

Antiferromagnetism
Weak Antiferromagnetism in $YFeO_3$ and $HoFeO_3$, 20:16994 (R;XJ;In Russian)

Chemical Preparation
Solution based temperature of Perovskite-type oxide films and powders, 20:16043 (R;US)

Electric Conductivity
Temperature dependence of normal resistance of HTSC Josephson junction on bicrystal substate, 20:16032 (IA;RU;In Russian)
Temperature dependence of the electromagnetic penetration depth and fluctuation paraconductivity in the $(Y,Sm)_1Ba_2Cu_3O_{7-x}$ epitaxial films, 20:17097 (IA;RU)

Hall Effect
Anomalous Hall effect and current-voltage characteristics in $REBa_2Cu_3O_{7-\delta}$ epitaxial films, 20:17116 (IA;RU)

High-Tc Superconductors
New correlations between critical temperature, structural and optical characteristics of high-temperature superconducting materials, 20:17115 (IA;RU)
Studies of magnetization processes in high-T_c superconductors using magnetooptic techniques, 20:17112 (IA;RU)

Josephson Effect
Investigation of AC Josephson effect in YBaCuO, 20:17098 (IA;RU)

Josephson Junctions
Investigation of AC Josephson effect in YBaCuO, 20:17098 (IA;RU)

Lattice Parameters
Localized and low measuring phonons in multilayer crystals, 20:16023 (IA;RU;In Russian)

Magnetic Flux
Neutron depolarization in the rotating $YBa_2Cu_3O_{6.9}$, 20:17065 (IA;RU;In Russian)

Magnetization
Studies of magnetization processes in high-T_c superconductors using magnetooptic techniques, 20:17112 (IA;RU)

Penetration Depth
Studies of magnetization processes in high-T_c superconductors using magnetooptic techniques, 20:17112 (IA;RU)

Physical Radiation Effects
Damages in Y-Ba-Cu-O films produced by ^4He ions, 20:16040 (IA;RU)

Raman Effect
Anisotropy of electronic light scattering in $YBa_2Cu_3O_{6+x}$ crystals, 20:17114 (IA;RU)

Stacking Faults
Microstructure investigations of melt-textured $YBa_2Cu_3O_x$, 20:16042 (IA;RU)

Superconducting Films
Anomalous Hall effect and current-voltage characteristics in $REBa_2Cu_3O_{7-\delta}$ epitaxial films, 20:17116 (IA;RU)
Damages in Y-Ba-Cu-O films produced by ^4He ions, 20:16040 (IA;RU)
Phase states and transitions in flux lattice in superconducting films, 20:17099 (IA;RU)

Temperature Dependence
Temperature dependence of normal resistance of HTSC Josephson junction on bicrystal substate, 20:16032 (IA;RU;In Russian)

YTTRIUM NITRIDES
An experimental search for high ZT semiconductors: A survey of the preparation and properties of several alloy systems, 20:15726 (R;US)

YUCCA MOUNTAIN
Behavior of spent fuel under unsaturated conditions, 20:14949 (R;US)
Scenarios constructed for nominal flow in the presence of a repository at Yucca Mountain and vicinity, 20:15025 (R;US)
Status of volcanism studies for the Yucca Mountain Site Characterization Project, 20:14998 (R;US)

Summary of lithologic logging of new and existing boreholes at Yucca Mountain, Nevada, March 1994 to June 1994, 20:15149 (R;US)
Yucca Mountain Site Characterization Project Bibliography, January–June 1993. An update: Supplement 4, Addendum 1, 20:14973 (R;US)

Z

Z NEUTRAL BOSONS
A search for jet handedness in hadronic Z^0 decays, 20:16843 (R;US)
B-hadrons at LEP, 20:16832 (R;PL)
Studies of the strong and electroweak interactions at the Z_0 pole, 20:16842 (R;US)
ZEA MAYS
See MAIZE
ZEOLITES
Direct catalytic decomposition of nitric oxide. Quarterly technical progress report No. 13, October–December 1994, 20:14758 (R;US)
Microstructural aspects of zeolite formation in alkali activated cements containing high levels of fly ash, 20:15054 (R;US)
Removal of ammonia from wastewaters by natural zeolites as ion exchanging, 20:16580 (R;IT;In Italian)
Visualization of parallel molecular dynamics simulation on a remote visualization platform, 20:17382 (R;US)
ZET PINCH
See LONGITUDINAL PINCH
ZHURAVLEV PROCESS
See COAL GASIFICATION
ZINC
Development of a catalyst for conversion of syngas-derived materials to isobutylene. Quarterly technical report No. 12, January 1, 1994–March 31, 1994, 20:15268 (R;US)
Trace element emissions. Semi-annual report, October 1994–February 1995, 20:14723 (R;US)
ZINC 67
Recovery of enriched stable isotopes in radionuclide production, 20:16127 (RA;US)
ZINC 68
Recovery of enriched stable isotopes in radionuclide production, 20:16127 (RA;US)
ZINC HALIDE PROCESS
See COAL LIQUEFACTION
ZINC SELENIDES
Investigation of polycrystalline thin film $CuInSe_2$ solar cells based on ZnSe windows. Annual subcontract report, 15 February, 1993–14 February, 1994, 20:15297 (R;US)
ZIRCALOY 2
Basic study on the secondary hydride in zircaloy cladding by the nuclear reaction $D(^3He,p)^4He$ and thermal desorption, 20:15843 (IA;JP;In Japanese)
Basic study on the secondary hydride in zircaloy claddings by means of the nuclear reaction analysis, 20:15478 (IA;JP;In Japanese)
Quarterly progress report - metallurgy unit - April 1954–June 1954, 20:15838 (R;US)
ZIRCALOY 4
Basic study on the secondary hydride in zircaloy cladding by the nuclear reaction $D(^3He,p)^4He$ and thermal desorption, 20:15843 (IA;JP;In Japanese)
Basic study on the secondary hydride in zircaloy claddings by means of the nuclear reaction analysis, 20:15478 (IA;JP;In Japanese)
ZIRCON
Comparative study between geochronological methods used in zircons; the case of Maria River granodiorite, Carajas Province - Brazil, 20:16133 (I;BR;In Portuguese)
Geochronology from Carajas Mineral Province; data synthesis and new challenges, 20:16132 (I;BR;In Portuguese)
Pb/Pb geochronology in zircon from Cumaru granodiorite, Gradaus Sierra, Para State, Brazil, 20:16135 (I;BR;In Portuguese)
ZIRCONATES
See also PZT
Irradiation of lithium zirconate pebble-bed in BEATRIX-II, Phase II, 20:17230 (RA;US)
ZIRCONIUM 89
Purification of ^{89}Zr using a hydroxamate column, 20:16220 (RA;US)
ZIRCONIUM 90 TARGET
Benchmarking of multiple preequilibrium routines in GNASH, 20:16922 (R;US)
ZIRCONIUM OXIDES
Ion-bombardment etching of nuclear materials, 20:15904 (R;IN)
Porous spherical shells and microspheres by electrodispersion precipitation, 20:15908 (R;US)
RBS measurements of optical thin films, 20:16967 (IA;JP;In Japanese)
ZPPR REACTOR
Pyrophoricity of uranium in long-term storage environments, 20:14917 (R;US)

Contract Number Index

Numbers assigned to DOE contracts announced in documents in this publication are listed. Contract numbers are sorted alphanumerically and list the primary corporate author of the document cited, the citation number, and the report number or other document identification.

Report Number Index

The report number index consists of the alphanumeric identifiers assigned to report literature as well as patent and conference literature cited in this publication. Entries provide the abstract number; the source(s) of availability of the document; the GPO file prefix for GPO depository library documents; the order number for OSTI and NTIS report ordering purposes; and, if the document was distributed under the DOE distribution program, the category number is shown for paper copy (PC), microfiche (MF), or no distribution (ND). These categories are included to assist DOE librarians in responding to requests for reports in their collections. The index also lists secondary numbers, with the corresponding abstract numbers and cross-references to other identifying numbers.

Report Number	*Abstract Number*	*Source of Availability*	*GPO Dep.*	*Order Number*	*Distribution Category*

ORDER FORM

DOE and DOE Contractors: Fill in Parts I, II, and IV. **Others:** Fill in Parts I, III, and IV. Mark appropriate blanks in Part IV to indicate quantity and form (microfiche or paper copy).

I. SHIPPING AND PAYMENT INFORMATION

Ordering Address

Name _____ Telephone _____

Address _____

City _____ State _____ Zip _____

Shipping Address (if different from above)

Name _____

Address _____

City _____ State _____ Zip _____

_____

SIGNATURE (Required to validate ALL orders)

II. OSTI ORDERS (DOE and DOE contractors can order from OSTI.)

☐ Charge OSTI deposit account no. _____

☐ Charge to my ☐ VISA ☐ Mastercard

_____ _____

Account Number **Card expiration date**

Mail orders to: U.S. Department of Energy
Office of Scientific and Technical Information
P.O. Box 62
Oak Ridge, TN 37831

III. NTIS ORDERS

☐ Charge NTIS deposit account no. _____

☐ Check/Money Order enclosed for $ _____

☐ Charge to my ☐ American Express ☐ VISA ☐ Mastercard

_____ _____

Account Number **Card expiration date**

☐ Ship and Bill (see below for restrictions) _ _ _ _ _ _ _ _ _

Employer identification number (9 digits) —

Purchase Order number _____

Phone number of billing office _____
(Required for Ship & Bill orders)

Ship & Bill service is restricted to North American business locations for an extra $7.50 per order (or per Custom Search). The business' employer identification number plus the phone number of the office paying the bill are required to process these requests. A late payment charge will be applied to billings more than 30 days overdue. Prepaying, using an NTIS Deposit Account or a charge account, speeds order processing. Be sure payment and order are sent together. Checks, payable to NTIS, must be in U.S. dollars.

Mail orders to: U.S. Department of Commerce
Technology Administration
National Technical Information Service
Springfield, VA 22161

IF NO METHOD OF PAYMENT IS INDICATED, YOUR ORDER WILL BE RETURNED TO YOU AS A PRICE QUOTE UNPROCESSED.

IV. SELECTIONS

Order number _____ Report number _____

Abstract number (with vol., issue) _____

No. of fiche _____ No. of paper copies _____

Order number _____ Report number _____

Federal Depository Library Program

As a result of an agreement between the U.S. Government Printing Office (GPO) and the Department of Energy, beginning in 1984 DOE reports with unlimited distribution are now included in the Federal Depository Library Program. The Regional Depository Libraries listed below receive and retain at least one copy of nearly every Federal Government publication, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are not sales outlets. You may wish to ask your local library to contact a Regional Depository to help you locate specific publications, or you may contact the Regional Depository yourself. Do not send checks or orders to these libraries.
